ANGELA BARTZ

Content Engineering | Docs-as-Code | Developer Documentation | Information Architecture

abartzmail@gmail.com • 650.521.6624

PROFESSIONAL SUMMARY

Senior technical writer and developer documentation leader with 10+ years of experience building documentation systems for APIs, SDKs, machine learning, and complex software platforms. Specializes in docs-as-code, information architecture, content automation, and self-service developer experiences. Experienced in using LLMs to generate structured documentation, validating technical content through code and SQL testing, and building automated publishing workflows using GitHub APIs and JavaScript. Combines technical implementation expertise with a systems-oriented approach to documentation quality, discoverability, and maintainability.

TECHNICAL SKILLS

- **Content Engineering & Docs-as-Code:** Git, GitHub, GitLab, Markdown, reStructuredText, Sphinx, MkDocs, GitHub APIs, Documentation Automation
- **Programming & Developer Tools:** Python, JavaScript, Google Apps Script, SQL, R, C#, HTML/CSS, OpenAPI, Postman, Docker
- **AI-Assisted Documentation:** Claude, ChatGPT, LLM-Assisted Content Generation, Prompt Engineering, AI Output Evaluation
- **Information Architecture & Knowledge Systems:** Content Modeling, Structured Authoring, Documentation Portals, Self-Service Documentation, Knowledge Retrieval
- **Additional Documentation Platforms:** MadCap Flare, DITA/Ixiasoft, FrameMaker, RoboHelp, GitBook, Adobe Experience Manager, LaTeX

SELECTED TECHNICAL PROJECTS

- **Documentation publishing automation.** Designed and built a docs-as-code publishing system using Google Apps Script, JavaScript, and the GitHub API. Converts structured Google Docs content into Markdown, detects changed files, and automates GitHub publishing. Implemented test builds to validate generated content before committing changes.
- **Lightweight CMS.** Developed a lightweight CMS using Google Sheets, Google Apps Script, JavaScript, and HTML/CSS to manage structured website content, subscriber records, and automated email communications.
- **Documentation search chatbot.** Developed and integrated a JavaScript-based documentation search chatbot for a MadCap Flare help system. Used structured documentation content and JSON-based search to provide users with relevant help topics through a self-service interface.

PROFESSIONAL EXPERIENCE

Senior Technical Writer – Snowflake, Bellevue, WA ***Feb 2025 – Mar 2026***

- Created end-user documentation for Snowflake products, including feature overviews, SQL command references, release notes, and code examples.
- Collaborated with a global team of writers, product managers, and engineers to document new features and functionality.
- Used Claude to transform feature requirements into structured documentation drafts, including conceptual topics, SQL references, release notes, and table-of-contents entries.
- Evaluated AI-generated documentation for technical accuracy, testing SQL commands and code examples to verify actual product behavior.

Senior Manager, Developer Documentation – Avalara, Seattle, WA ***July 2020 – Mar 2025***

- Built the developer documentation program from the ground up, establishing documentation practices, processes, and a self-service developer portal.
- Designed and improved documentation information architecture and taxonomy, separating integration guides from API references and organizing integration content by tax and return type to improve navigation and discoverability.
- Developed integration guides and self-service resources that reduced partner certification time from several months to approximately two weeks.

- Led documentation tool conversion and workflow improvements, reducing turnaround time for small content updates from 1–2 days to 1–2 hours.
- Owned the developer documentation experience within the portal, establishing quarterly and long-term plans for content and functionality improvements.
- Created and maintained API documentation, reviewed OpenAPI specifications, and collaborated with product managers and engineers to improve developer-facing content.
- Hired, mentored, and managed developer documentation writers, establishing standards for documentation quality and consistency.

Documentation Manager – H2O.ai, Mountain View, CA ***Apr 2016 – July 2020***

- Led documentation strategy and development for open-source machine learning platforms, working closely with engineers and data scientists.
- Led documentation conversion from Slate to Sphinx, making content easier to navigate and find.
- Created and maintained developer documentation and SDK references using Sphinx, Markdown, reStructuredText, and LaTeX.
- Reviewed source code in C++, Java, Python, R, and Go to understand product functionality and ensure documentation accuracy.
- Developed and tested code samples in Python and R.
- Collaborated with the open-source developer community through GitHub pull request reviews and technical support on Stack Overflow.
- Owned the documentation portal, established documentation plans, and hired and mentored a remote team of writers.

Lead Technical Writer – Skytree, The Machine Learning Company, San Jose, CA ***Feb 2014 – Mar 2016***

- Owned all documentation for machine learning software, including installation, REST API, Python SDK, CLI, GUI, admin, and user guides – 14 guides in total.
- Designed and built the documentation portal.
- Created and tested code samples for REST API, Python SDK, and CLI guides.

Technical Writer – Consultant – Stanford University, Palo Alto, CA (remote) ***Aug 2014 – present***

- Assist with reviewing, editing, and writing content for various Land, Buildings & Real Estate (LBRE) process and safety guides.
- Built and incorporated a chatbot into the LBRE Safety Manual.
- Rearchitected the LBRE Safety Manual to allow for print and HTML versions from a single source.
- Continue to maintain the LBRE Safety Manual web site and coordinate with outside vendors for printed copies of the LBRE Safety Manual.

EARLIER EXPERIENCE

- Lead Technical Writer – Aruba Networks, Sunnyvale, CA | Jan 2012 – Jan 2014
- Documentation Manager – Phoenix Technologies, Milpitas, CA | Jun 2008 – Sep 2011
- Senior Technical Writer – Green Hills Software, Ann Arbor, MI | Dec 2007 – Jun 2008
- Documentation Manager – NextHop Technologies, Ann Arbor, MI | Jun 2001 – Dec 2007

EDUCATION & CREDENTIALS

B.A., English – University of Detroit Mercy, Detroit, MI

MadCap Advanced Developer for MadCap Flare

Additional coursework in C++, Visual Basic, HTML, and Java

PATENT

Versatile integration framework for software-as-a-service (SaaS) functionality | US 12095881 | Sept 2024

VOLUNTEER WORK

Business Coach — Defy Washington

Review personal statements, resumes, and business plans for female inmates at the Washington Corrections Center for Women. The Entrepreneurs in Training program is designed to prepare incarcerated women to return to society and to potentially earn a business grant.
