Chapter 1

RetailerConnection Website Overview

This chapter identifies primary reasons for a RetailerConnection website based on consumer behaviors and primary features. It also provides a walk-through of what the public-facing website will look like to the consumer.

Required actions:

- Review the strategy behind RetailerConnection (page 2).
 - Review RetailerConnection primary features list (page 6).
 - Review the website overview (page 4).
 - Review the public facing site (page 7).
-

RetailerConnection Strategy

Branded Retailer Websites Drive Business Results

In 2001, according to Jupiter data, an estimated 74 million U.S. Automotive Consumers researched vehicles online. What are these consumers doing on the web?

- Accessing multiple sites for product and pricing information.
- Comparing vehicle specifications and pricing.
- Initiating the purchase process -- requesting a quote or direct sale.
- 76% of the consumers that use the Internet during their purchase experience visit the manufacturer's website.
- When consumers visit the manufacturer's site, over 80% are looking for product information.

How do you serve and profit from today's informed shopper? The key is to have the right consumer information on your website, and the tools in place to properly respond to the consumer when they visit your site or submit a lead.

Consumers are seeking relevant, updated information on your website. You can utilize integrated tools to facilitate the consumer's buying and ownership processes.

RetailerConnection is your integrated online solution to effectively manage and profit from the informed customer.

The RetailerConnection Website and Utility will enhance the consumer's purchase experience and bring new revenue opportunities to your retailer store.

Branded Retailer Websites provide consumers with a consistent shopping experience whether they are accessing the manufacturer's website or going directly to the retailer's site. Through a combined manufacturer-retailer approach (2 to 1), RetailerConnection assists your retailer store in achieving key sales, service, and ownership objectives by:

-
- Increasing Traffic - RetailerConnection Website provides a dynamic interactive destination for consumers to reach your retailer store wherever they are in the purchase cycle.
 - Increasing Vehicle and Service Sales - by integrating RetailerConnection into your retailer store operations, you can increase your vehicle and service sales.

Consumer Paths

Consumers progress through numerous decisions in making a purchase. It is crucial to be able to provide the consumer what they want, when they want it, wherever they go to look for it.

Wherever consumers are searching for information, RetailerConnection assures it is readily available when they want it, where they want it.

Manufacturer-to-Retailer Path

The RetailerConnection Retailer Locator enables the consumer who visits the manufacturer's site to quickly locate the Branded Retailer Website.

Retailer Resources: Training and Support

Comprehensive training and support for RetailerConnection are in place to:

- Ensure retailer's technical readiness.
- Educate retailer's personnel on the tools and applications.
- Maximize utilization of RetailerConnection tools.
- Provide application best practices to help drive vehicle and service sales.

Branded Retailer Websites will ensure that you are positioned to respond to consumers regardless of the path they take to get to your retailer store or where they are in the purchase cycle. For more information on support and training, refer to Sources of Support on page 25.

We encourage you to utilize the User Guide and to learn more about how a Branded Retailer Website can assist you in building your Internet business and add more profits to your bottom line.

Website Overview

The RetailerConnection Website Utility is a tool that allows you to customize and personalize your Branded Retailer Website. Use the RetailerConnection Website Utility to provide your website visitors with current information about your retailer store. When visitors view your site, you can provide them with information such as new vehicle deals and hours of operation. You can even include photos of your retailer store, staff members, and logos.

Because it is web-based, you can access the RetailerConnection Website Utility anywhere you have Internet access and Internet Explorer 6.0 (or higher).

The RetailerConnection Website is designed to keep customers within your site. From the RetailerConnection Website, users can do everything from researching vehicles, to building a vehicle, to financing a vehicle. With the use of themes, photos, and customized text, RetailerConnection allows you to personalize your site.

- 1 Retailer Branding and Contact Information** - You can now upload your logo and retailer store pictures to reflect your retailer's identity. Your retailer store address and contact information is also prominently displayed.

-
-
- 2 **Navigation** - You have easy navigation with drop-down menus and an intuitive layout of functional elements. You can also rename tabs to conform to your market.
 - 3 **Quick Links** - These are links to sections of your website that will be helpful in shopping for new or pre-owned Land Rovers.
 - 4 **Quadrants** - By using quadrants, you have the opportunity to display vehicle specials, promotions, etc. There are numerous custom and corporate quadrants from which to choose.
 - 5 **Customized Text** - Create great-looking customized content for your pages using the WYSIWYG Content Editor. This feature allows you to colorize text, format text using specified fonts and font sizes, and customize the layout of the page to your own unique design.
 - 6 **Themes** - Use themes to easily update the look and feel of your site. Themes can be set to automatically rotate. There are several holiday, vehicle, and promotional themes to choose from.

RetailerConnection Primary Features List

The following is a list of RetailerConnection's primary features and their benefits.

- **Your own customer-facing website.** Your customized internet site that integrates with up-to-date Land Rover.com Website content, including vehicle specifications and promotions.
- **RetailerConnection Website Utility.** A retailer-friendly tool that guides you through personalizing your customer-facing website.
- **Navigation.** Easy navigation with drop-down menus, intuitive placement of key retailer information, and the ability to rename navigation tabs to conform to the market.
- **Integration.** Contains information consistent with Land Rover websites and leverages corporate technology for no additional effort or cost.
- **Themes.** Theme designs differentiate your site. There are several holiday and promotional themes to choose from, and themes can be set to automatically rotate.
- **Retailer Branding.** Upload logo and retailer's pictures to brand your site, and prominently display retailer store address and contact information consistently throughout your site.
- **Quadrants.** Feature vehicle specials, retailer store promotions, etc. Provides the ability to tie into Land Rover promotions, includes numerous corporate quadrants to choose from, and an unlimited amount of custom quadrants can be created.
- **Retailer Message Area.** Fully customizable messages - font, size, color, etc. Preview, resize, and align your pictures. Drive customers to important information with links.
- **WYSIWYG Content Editor.** Easy-to-use editing capabilities.
- **eBusiness Support Center.** Your single point-of-contact for all RetailerConnection questions and technical support.
- **Site Hosting.** A web server infrastructure built to optimize the performance of your site with application monitoring 24 hours a day, 7 days a week.

Available RetailerConnection pages

The pages that follow describe the sections (or tabs) that display on your website, and the pages that can be added or removed from those sections through Manage Navigation. (Refer to Manage Site Navigation on page 74 for more information on adding and removing pages.)

Home

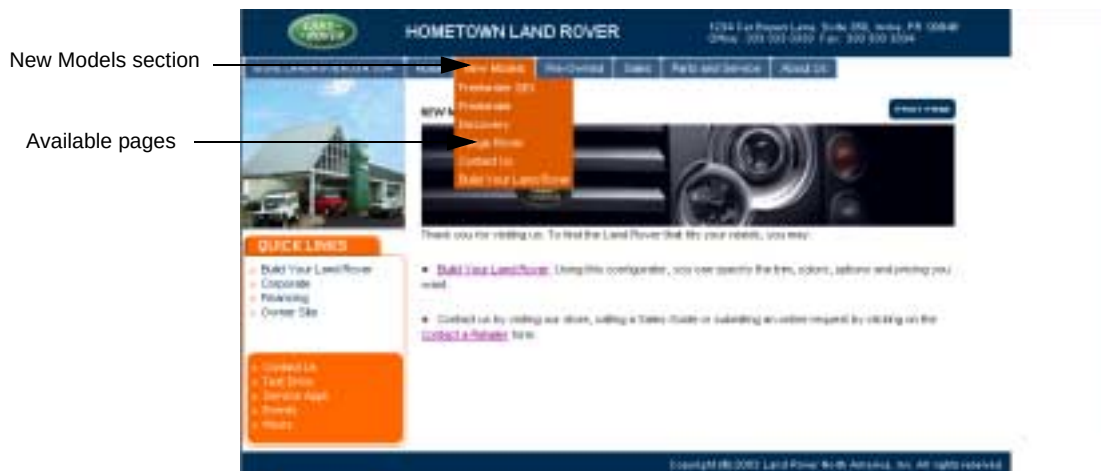

This is the first page users see upon entering your website. It welcomes visitors and describes your retailer store. The Home section is required and cannot be removed; however, the wording and content of this page can be modified using the Content Editor.

The Home section has only one page: the Home page. No other pages are available under the Home section.

New Models

From the New Models section, viewers can “build” a vehicle, view the model line-up, and obtain contact information for your retailer store. The New Models section is required and cannot be removed or edited.

These pages are required pages under the New Models section:

- New Models Home
- Freelander
- Discovery
- Range Rover
- Contact Us
- Build Your Land Rover

These available pages are optional under the New Models Home page:

- Range Stormer Concept SUV
- Wanaume: The Voyage
- Custom Web Page

These available pages are optional under the Freelander, Discovery, and Range Rover pages:

- Model Page
- Custom Web Page

Pre-Owned

From the Pre-Owned section, viewers can search a warranty program, view information about Land Rover's 140 point inspection, and view contact information. The Pre-Owned section is required and cannot be removed or edited.

Pre-Owned
section

Available pages

These pages are required pages under the Pre-Owned Vehicles section:

- Pre-Owned Home
- Contact Us
- Warranty Program
- 140 Pt. Inspection

These pages are optional:

- Search Inventory
- Custom Web Page

Sales

From the Sales section, your website visitors can view financing information, retailer store hours, and schedule a test drive. The Sales section is not required. In addition, the wording and content of this page can be modified using the Content Editor.

These pages are optional pages under the Sales section:

- Sales Home
- Contact Us
- Test Drive
- Financing
- Hours
- Custom Web Page

Parts and Services

From the Parts and Services section, your website visitors can schedule a service appointment and order Land Rover Vehicle Kit accessories. The Parts and Services section is not required. In addition, the wording and content of this page can be modified using the Content Editor.

These pages are optional pages under the Parts and Services section:

- Parts and Services Home
- Schedule a Service Appointment
- Kit (Accessories)
- Hours
- Custom Web Page

About Us

From the About Us section, your web site visitors can view information specific to your retailer store, including retailer history, upcoming special events, location, and information about retailer store staff. The About Us section is required and cannot be removed; however, the wording and content of this page can be modified using the Content Editor.

These pages are required pages under the Services section:

- About Us Home
- Location
- Our People
- Hours
- My Land Rover

These pages are optional:

- GEAR (Merchandise)
- Events
- History/Overview of the Dealership
- Custom Web Page

Chapter 2

Getting Started

This chapter focuses on primary actions that you need to take in order to successfully access and use the RetailerConnection Website Utility.

Required actions:

- Optimize your PC for RetailerConnection (page 15).
 - Optimize your monitor settings (page 17).
 - Provide Feedback (page 23).
 - Sources of Support (page 25).
-

Before You Begin

Because RetailerConnection pulls data over the Internet and contains information from various sources, the performance of the tool depends on the speed of your Internet connection, your computer's processing speed, the amount of memory on your computer, the size and resolution of your monitor, as well as the performance of other websites.

About This Guide

The *RetailerConnection Website Utility User Guide* is written for those involved in the setup, maintenance, and day-to-day use of this product. The user guide does not replace the *RetailerConnection Online Help*. Use the *RetailerConnection Online Help* for additional detailed information about specific events and procedures.

Is the User Guide online?

You can view the user guide online at the RetailerConnection InfoSite by going to: <http://infosite.retailerconnection.com/etools/landrover/rcwebsite/userguide.html>.

Download and Print Information

You can download and print revisions as needed and add these to your binder. To download the most recent revision, visit the user guide on the InfoSite by going to: <http://infosite.retailerconnection.com/etools/landrover/rcwebsite/userguide.html>. Select **Click here to download** from the **Download** section.

RetailerConnection Website Utility User Guide Icons

Throughout this user guide, the following icons will appear on the necessary pages and will offer brief but important information about RetailerConnection.

**Tip:**

The Tip icon offers assistance with performing a task.

**Note:**

The Note icon offers additional, noteworthy information about a topic.

**Warning:**

The Warning icon informs you of what you should or should not do while working in RetailerConnection.

Optimize Your PC for the RetailerConnection Utility

The following sections describe the equipment you need in order to run the RetailerConnection Utility.

System Requirements

The following is a list of requirements your system must have in order to utilize RetailerConnection:

**Note:**

Netscape, Windows ME, Windows 95, and Windows XP Home Edition are not supported.

- ☐ **Is your default browser set to Microsoft Internet Explorer version 6.0 or higher?**

RetailerConnection requires the use of Internet Explorer 6.0 or higher. If you do not have this browser on your computer, contact your retailer store's System Administrator. For more information on upgrading your browser, go to <http://microsoft.com/downloads>.
- ☐ **Do you have a WSLx ID and password?**

RetailerConnection requires that you have a WSLx ID and password in order to access the Internet site. To obtain a User ID and password, contact the System Administrator in your retailer store who can add new users or modify passwords. The Administrator can contact the Land Rover Support Center (LRSC) at 1 (888) 426-3658.
- ☐ **Are you connected to the Internet with at least a 56K V.90 modem?**

A 56K V.90 modem is the minimum requirement to use for your Internet connection.

RetailerConnection may run slowly or incorrectly and may even time-out if your system does not meet these minimum requirements.

☐ **Are you using a Pentium III 500 Mhz processor?**

A Pentium III 500 Mhz processor is the minimum requirement with at least 128 Mbytes of memory and 4 Gbytes or higher of hard disk space.

☐ **Do you have Adobe Acrobat 5.0 or higher?**

The RetailerConnection User Guide requires the use of Adobe Acrobat 5.0 or higher for screen resolution. If you have a lower version on your computer, you will be unable to view the screen shots in the User Guide.

Recommendations

The following is a list of recommended system requirements:

☐ **Are you using a 17" color monitor?**

17" is the minimum recommended monitor size. Although you can run RetailerConnection on smaller monitors, the information may be difficult to read.

☐ **Is your operating system Windows 98se or higher?**

RetailerConnection recommends that your operating system be Windows 98se or higher.

☐ **Is your monitor resolution set to 800 by 600?**

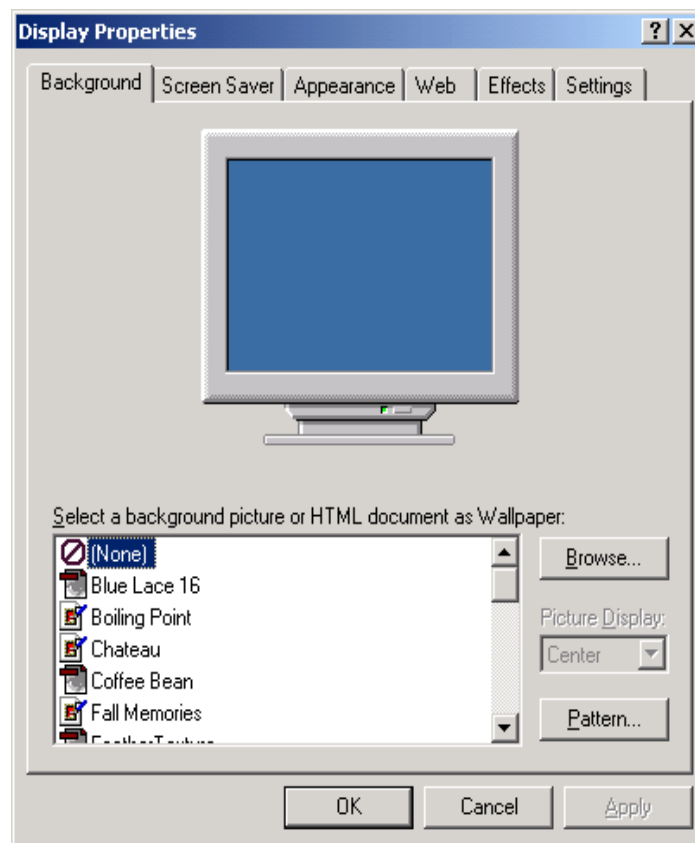

RetailerConnection is designed to work best at a resolution of 800 x 600; however, higher resolutions allow you to see more of the active screen at a glance. Refer to "*Screen Settings*" on page 17 for assistance with determining or changing your screen setting.

Screen Settings

As stated in the *Recommendations* section, it is recommended that your monitor setting be set to at least 800 x 600 pixels.

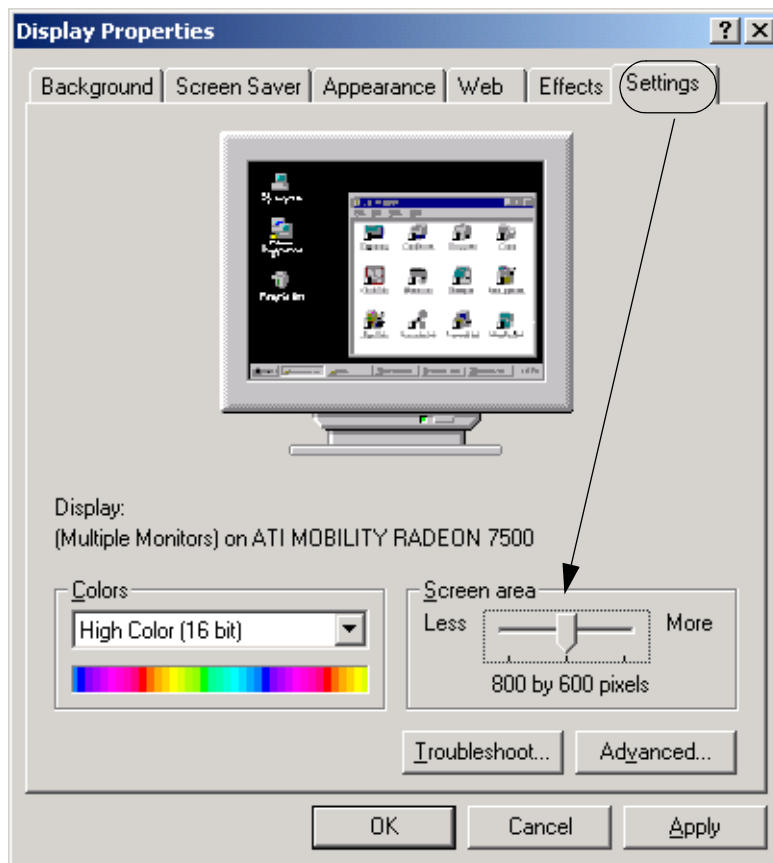

Follow these steps to ensure that your monitor settings are correct:

- 1 Right-click on your desktop and click **Properties**. (The desktop on your computer refers to the background that you see when the computer is on and you have no programs running.) The Display Properties page displays.

Use the Display Properties page to change the overall look and feel of your desktop.

- 2 On the Settings tab, slide the Desktop Area bar toward More or Less until it reads 800 x 600 pixels. Click **Apply** to apply the changes.

On the Settings tab, adjust the Desktop Area value until it says 800 x 600 pixels.

You are now ready to use RetailerConnection.

Logging in

For enhanced security, it is important that you do not share your ID or password with anyone. This ensures that your data and information are protected and secure.

Tip:

For help getting a WSLx ID, contact LRSC at 1 (888) 426-3658.

You can access your RetailerConnection Website Utility by performing the following steps.

- 1 Access <http://landroversetup.dealerconnection.com> The Secure Web Logon page displays.

The screenshot shows a web browser window titled "Secure Web Logon". The page has a blue header bar. Below the header, the text "Enter your userid and password to login" is displayed. There are two input fields: "userid" and "password". A "Login" button is located below the "password" field. A note at the bottom of the page reads: "NOTE: PLEASE DO NOT SHARE YOUR USER ID OR PASSWORD WITH ANYONE". Annotations with arrows point to the fields and button: "Click here to access the Gateway page." points to the "Login" button; "Enter your ID here." points to the "userid" field; "Enter your password here." points to the "password" field.

Log on to <http://landroversetup.dealerconnection.com>

- 2 Enter your WSLx ID and password in the **Userid** and **Password** fields.
- 3 Select **Login**. A screen briefly displays verifying that your information is correct, then the Gateway page displays.
Note: When you log in for the first time, you will be prompted to change your password. If you do not have (or have forgotten) a password, contact the System Administrator in your retailer store.

The Gateway page is your welcome page to the Content Management Utility. You should see several sections on this page, including What's New (includes links to the eBusiness Support Center), User Guide Links (includes links to each section of the User Guide), the Toolbox (includes links to the WYSIWYG Content Manager, InfoSite, Feedback, and Logout), and the Welcome to the RetailerConnection Gateway (includes information on what you need to know to publish your site, features of the WYSIWYG Content Manager and Content Editor). Along the bottom of the page is the email and phone number of the eBusiness Support Center.

Click here to access the WYSIWYG Content Manager.

Selecting **WYSIWYG Content Manager** takes you to the utility.

4 Select **WYSIWYG Content Manager**.

The following message may display. (**Note:** This message will only display if you have previously gone into your RetailerConnection site, made changes, and did **not** publish your changes. If this is the first time your RetailerConnection site is being accessed, this message will not display):

You still have changes that were made during previous session(s), but that have not yet been published. Changes will not be visible on your public site until they are published.

publish now and Continue

continue, but do not publish

Selecting **publish now and Continue** publishes changes and takes you to the Gateway page.

- 5 This screen contains two options:
 - Select **publish now and Continue** if you would like to publish any changes and continue to the utility.
 - Select **continue, but do not publish** if you do not yet wish to publish your changes and would like to continue to the utility.
- 6 The Content Management Utility home page displays.

RetailerConnection Content Management Utility Home page.

User Roles

Retailers have the ability to assign two levels of access to retailer employees:

- **DC Manage** - this user role allows the user to have access to all functions except the **Publish** function. In order for changes to be published, this user will have to notify a user with the user role of **DC Publish**.
- **DC Publish** - this user role allows the user to have access to all functions, including the ability to publish changes to the live site using the **publish my changes** button in the utility.

If you think you should have publish access (**DC Publish**) and do not, contact your local System Administrator. He/she will give you access, if appropriate.

Feedback

The Feedback feature can be used to send comments, feedback, or ideas about the website.

To access this feature, perform the following steps:

- 1 Access the Gateway page.

Click here to access
the Feedback form.

Selecting **Feedback** takes you to the Feedback form.

-
- 2 Select the **Feedback** link. The Feedback form displays:

Click here to select a category.

Enter your comments here.

- 3 From the **Category** drop-down list, select a category.
- 4 In the text box area, enter your comments.
- 5 To send your feedback, select **send** or click **cancel** to cancel your feedback.

Sources of Support

We have tried to anticipate and answer your questions in the printed and online documentation. However, the user guide is not a replacement for the *RetailerConnection Online Help*. If you have a question about RetailerConnection, first look in this guide or consult the *RetailerConnection Online Help* by selecting the **help** button in the utility. Further assistance is also available through the eBusiness Support Center.

RetailerConnection InfoSite

The InfoSite is your enrollment portal for the RetailerConnection Website and is available twenty-four hours a day, seven days a week. It contains updated RetailerConnection FAQs. View the InfoSite by going to <http://infosite.retailerconnection.com> To enroll, select the **Enrollment** link and then select the **RC Website** link.

Accessing the InfoSite requires a Web Single Login. Contact the System Administrator in your retailer store who can add you as a new user and provide you with a User ID and Password. The Administrator can contact the LRSC at (888) 426-3658 for assistance.

eBusiness Support Center

The eBusiness Support Center (eBSC) is the single point of contact for all RetailerConnection-related questions, hardware and software issues, problem resolution, and product training support for Land Rover participating retailers.

The retailer support provided by the eBSC analysts will help transform your website into an effective integration of eCommerce solutions (within the retailer's traditional business practice), integrated with Land Rover's vision. All of the analysts are highly specialized; they are technically skilled and have educations in hardware, software, network environments, the internet, and technical training. They are able to troubleshoot internet issues as well as technical issues in the Windows operating environment.

The eBSC is available Monday through Friday, 8:00 am to 7:00 pm EST. You can reach an eBusiness Support Center representative using any of the following methods:

- Phone the eBSC at (800) 446-5066
- Fax the eBSC at (313) 271-9114

-
- Email the eBSC at retailerconnection@channelnet.com

The eBSC plays a critical part to an effective eCommerce strategy being integrated within your retailer store. The eBSC can assist you with the following:

- Step-by-step walkthrough of the Content Management Utility.
- Assist and train retailers in customizing their websites including navigation, content, layout, images, and development of an update plan.
- Integration of hyperlinks (internal to site and external).
- Troubleshoot Microsoft Operating System functionality issues.
- Step-by-step checklist for issues correction.
- Basic training such as attach fields to email, save, copy, cut and paste, etc.
- Assist you in basic understanding of your system. To ensure you have the appropriate requirements for RetailerConnection
- Connectivity issues - recommend alternatives for internet access, modem type, and settings.
- Educate you on hardware and software requirements for each application.
- Make recommendations such as system requirements, training, upgrading systems, software, browsers, ISPs, monitor settings/display, type of PC, compatibility issues, and other general problems.

Training

RetailerConnection was designed to be a very straight-forward and simple to use tool. Should you need clarification on how to use the application, there are several resources at your disposal:

- This user guide will provide more detailed information on the application.

-
- Should you need additional assistance, the eBusiness Support Center is available to answer your questions at (800) 446-5066, Monday through Friday, 8:00 am to 7:00 pm EST.

Conference Call Training

RetailerConnection conference call training is available and is recommended for those retailers who are new to RetailerConnection. Call RetailerConnection eBSC at (800) 446-5066, Monday through Friday, 8:00 am to 7:00 pm EST, to schedule a training course.

Web-Based Training

Web-based training is available by going to <http://www.landroverlearning.com>

Chapter 3

RetailerConnection Website Utility

This chapter assists you in becoming familiar and comfortable with the RetailerConnection tool that allows you to modify your site.

Required actions:

- Utility orientation (page 31).
 - Review quadrants (page 33).
 - Add quadrants (page 34).
 - Edit quadrants (page 36).
 - Delete quadrants (page 38).
 - Review customize theme (page 39).
 - Review WYSIWYG Content Manager functions:
 - Manage Online Inventory (page 46)
-

-
- Manage departments and hours (page 50).
 - Manage external links (page 55).
 - Manage locations (page 60).
 - Display Schedule a Service Appointment Page (page 67).
 - Manage site look and feel (page 68).
 - Add themes (page 68).
 - Edit themes (page 71).
 - Delete themes (page 72).
 - Manage site navigation (page 74).
 - Manage staff (page 79).
 - Manage website administrator email (page 86).
 - Manage default theme image (page 93).
 - Manage custom quadrants (page 95).
 - Review the Go To Utility (page 113).
 - Publish changes (page 114).
 - Preview information (page 117).

RetailerConnection Website

Welcome to the RetailerConnection Website Utility. With this utility, you can quickly and easily customize your retailer's website.

When you enter the site, the Gateway page displays. The Gateway page introduces you to the utility. It also provides you with information about new features in the utility and updates to the utility.

Using the links on the Gateway page, you can modify your site, manage inventory, access the InfoSite, or send an email with your comments.

New features added to the utility will be communicated here.

From the Gateway page, you can email your comments, access the InfoSite, or begin to modify your site.

Learning How The Utility Works

The following page displays after you select **WYSIWYG Content Manager** on the Gateway page. Take the time to get acquainted with this page before modifying data. The numbers on this page identify sections that can be edited by you.

Modifying data is easy once you get to know your site.

Orientation to the Utility Tool -- What Can be Changed

- 1 **Text And Graphics Changes (see page 33)** - can be modified by selecting the orange **modify** icon (see left). Any page with an orange icon can be modified. The Content Editor form will display, enabling you to enter information related to that page. After modifying a page, the orange icon changes to a red icon, so you can see areas that you have modified. Once you publish your changes, the icon will once again be orange.
- 2 **Manage Site Look and Feel (see page 68)** - refers to the overall layout of your site.
- 3 **Quadrants (see page 33)** - display on the left side of your site. Quadrants contain a graphic and text and can provide a quick link to another page in your site. You can also customize quadrants that display with an orange **modify** button.
- 4 **Manage Site Navigation (see page 74)** - enables you to select the pages that you want to activate on your website as well as the order of those pages.
- 5 **Navigation Bar (see page 43)** - enables you to move around within the different active pages on your site.

Text And Graphics Changes

You can edit the text and graphics on most RetailerConnection website pages by selecting the orange **modify** icon. For example, you can modify the text on the first page of each section (such as Home, New Models, etc.), you can enter the hours of business for your sales departments, and you can build out advertisements for great new vehicle deals. Simply select the page you want to edit (for example, Finance), then select the orange **modify** icon.

Not all pages are editable. For example, the Warranty Information page contains verbiage that has been linked from the Warranty and Assistance page on www.landrover.com. Remember that you can only edit pages that have an orange **modify** icon. The following pages can be edited:

- Home
- Sales
- Parts and Services
- About Us

For more information on modifying text and graphics using the WYSIWYG Content Editor, refer to WYSIWYG Content Editor on page 119.

Quadrants

Quadrants are small areas of text and/or graphics that display on your site. Quadrants offer visitors a link to another page without requiring them to search the Navigation Bar. For example, a quadrant could contain information about a special sales promotion. This feature allows you to set up multiple quadrants for a range of dates. Using this feature will allow you to arrange all of the quadrants in advance for sales, events, or general time-stamped information. Only quadrants with an orange icon can be modified.

Add Quadrants

Note: If you do not set any quadrants to display, the default quadrant will display. This default quadrant cannot be modified.

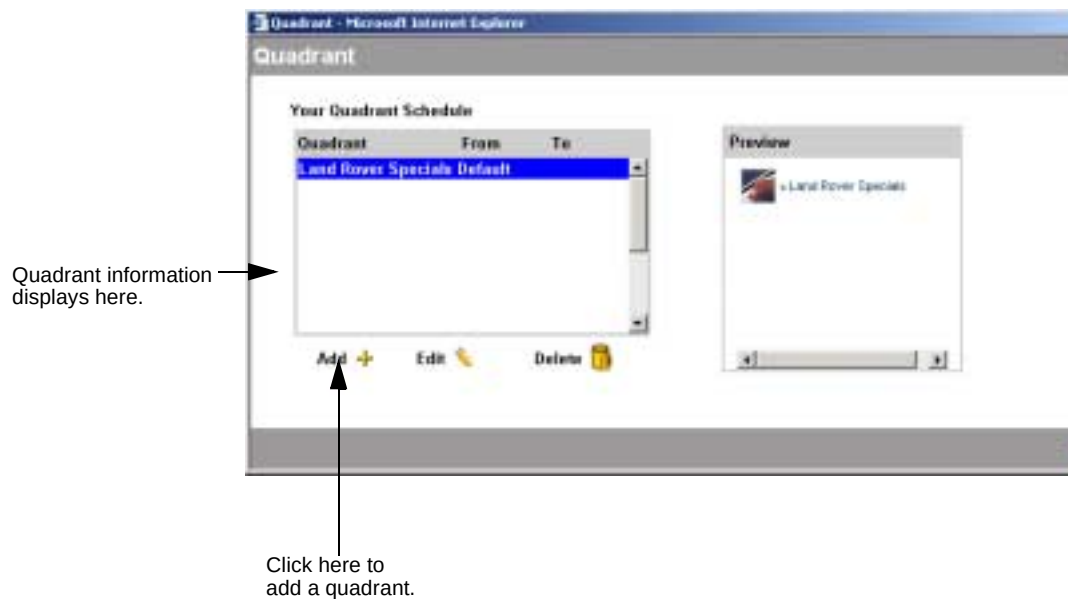

To add a quadrant, perform the following steps (in this example, we are modifying a quadrant on the Home page):

- 1 Selecting the orange **modify** icon in the corner of the desired quadrant.

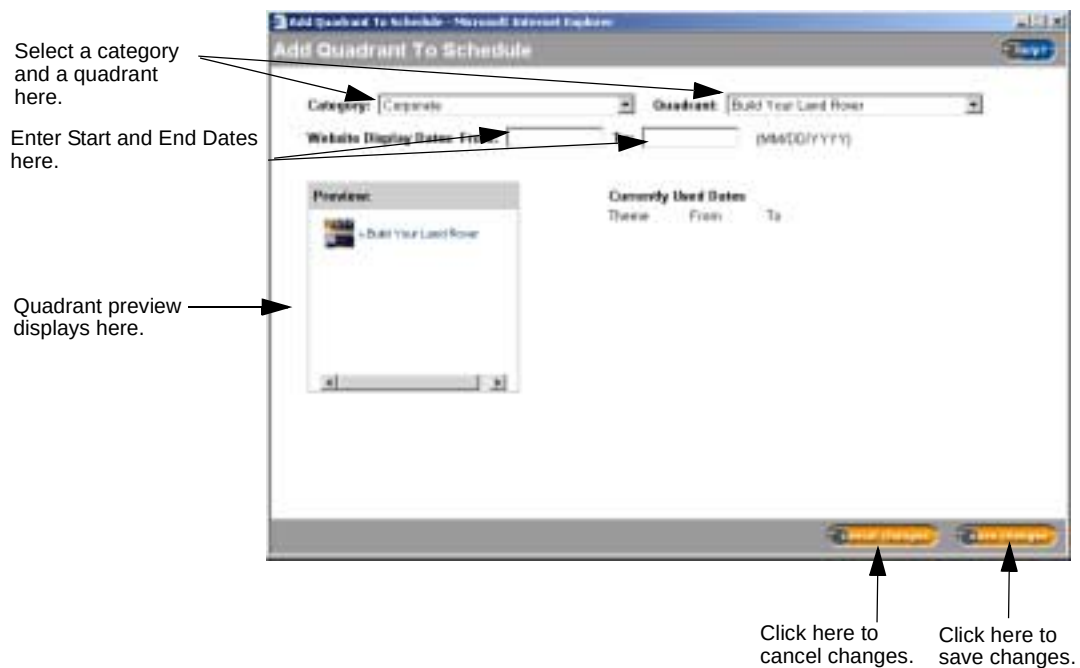

Select the **modify** icon to change a quadrant.

2 The Modify Quadrant form displays.

The Modify Quadrant form displays the quadrants you have selected to display on your site.

3 Select **Add**. The Add Quadrant to Schedule form displays.

4 Select a category from the **Category** drop-down list.

- 5 Select a quadrant from the **Quadrant** drop-down list.
- 6 Enter a start and end date in the **Website Display Dates From** and **To** fields. The format is **MM/DD/YYYY**. A preview will display in the **Preview** area.
- 7 To cancel your changes, select **cancel changes** or to save your changes, select **save changes**. The Add Quadrant To Schedule form closes and the Modify Quadrant form re-displays.
- 8 Select **close** to close the Modify Quadrant form.

Edit Quadrants

To edit a quadrant, perform the following steps (in this example, we are modifying a quadrant to the Home page):

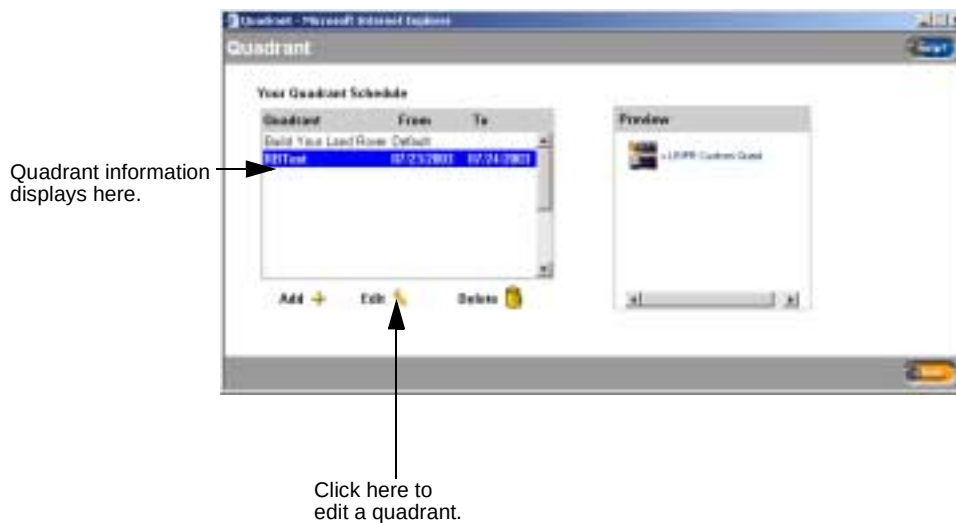

- 1 Select the orange **modify** icon in the corner of the desired quadrant.

Click here to
modify the quadrant.

Select the **modify** icon to change a quadrant.

2 The Modify Quadrant form displays.

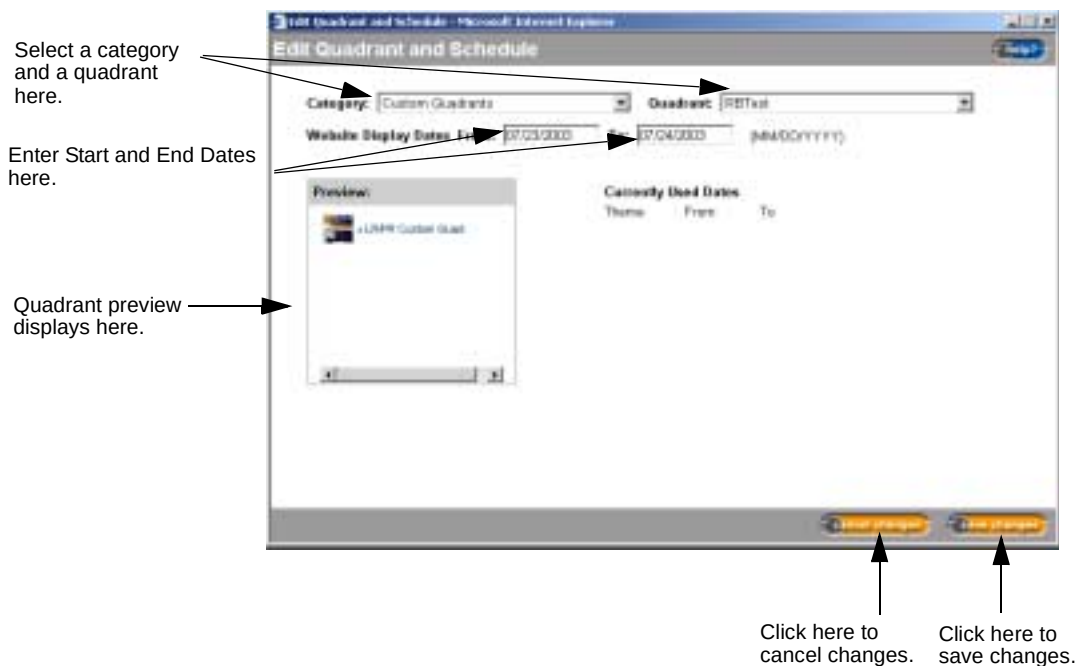

Note:
The Default quadrant
cannot be edited.

The Modify Quadrant form displays the quadrants you have selected to display on your site.

Highlight the quadrant you want to edit in the **Your Quadrant Schedule** area and select **Edit**.

3 The Edit Quadrant and Schedule form displays.

4 Make the necessary changes.

**Warning:**

Use caution when selecting **cancel changes**, as all changes will be lost.

- 5 To cancel your changes, select **cancel changes** or to save your changes, select **save changes**. The Add Quadrant To Schedule form closes and the Modify Quadrant form re-displays.
- 6 Select **close** to close the Modify Quadrant form.

Delete Quadrants

To delete a quadrant, perform the following steps (in this example, we are modifying a quadrant on the Home page):

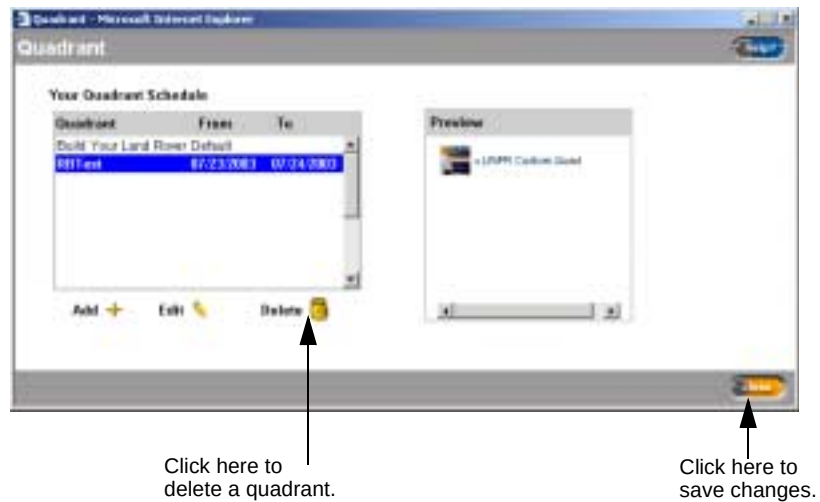

- 1 Select the orange **modify** icon in the corner of the desired quadrant.

Click here to modify the quadrant.

Select the **modify** icon to change a quadrant.

2 The Modify Quadrant form displays.

- 3 Highlight the quadrant to be deleted in the **Your Quadrant Schedule** area.
- 4 Select **Delete**.
- 5 The system will prompt you to confirm the delete action. Select **OK**.
- 6 Select **close** to exit the Modify Quadrant form.

Note:

The Default quadrant cannot be deleted.

Customize Theme

This feature allows you to change the image on a portion of any theme to reflect your retailer identity. A new image library will be created called "**Your Retailer Images**", which will contain all of the default logo images to be used when you do not modify a theme. All of these images will be available in the image library in the WYSIWYG Content Editor. Theme images that are selected will be associated with the theme and will be saved with the theme until they are changed by you.

Prerequisites

In order to use this feature, you must:

- have an active RetailerConnection site
- have an image library available that contains corporate images (in other words, copies of images on a disk or hard drive), or you can follow a process using the eBusiness Support Center to make other images available. Email your

Note:

When emailing logo images, the recommended size is 150 x 160 pixels. The format should be .jpg or .gif.

images to retailerconnection@channelnet.com Be sure to specify that you would like these images available for customizing themes/logos You must include your Retailer Code and Retailer name in the subject line of the email. Photos should be in .jpg or .gif format.

Note: Your site will initially populate with a default theme that cannot accommodate a custom logo. To add the Retailer logo, you can copy the default theme or choose a different theme. To do this, perform the following steps:

- 1 Select **Site Look and Feel** from the **Manage** drop-down menu. For more information on Site Look and Feel, refer to "Manage Site Look and Feel" on page 68.
- 2 Select **Add** to activate a new theme.
- 3 Highlight the added theme and select a category from the **Category** drop-down.
- 4 Select a theme from the **Theme** drop-down.
- 5 Enter start and end dates using the **Start** and **End** fields (in the format MM/DD/YYYY).
- 6 Select **save changes**. Your Home page will re-display. You should now notice a new edit icon on the image portion of the theme. You can now proceed to customize your theme.

Note: If you do not see the new edit icon, you are still using the default theme. Copy the default theme and enter start and end dates or select a non-default theme and the button will appear.

To customize a theme to reflect your retailer identity, perform the following steps from the Home page.

- 1 Select the edit icon in the upper left-hand corner of the theme image, or select **Global Theme Image** from the **Manage** drop-down.

Select the edit icon.

2 The Modify Theme Image form displays.

The screenshot shows the 'Modify Theme Image' form with the following sections and annotations:

- Space Available:** Height: 83 pixels, Width: 135 pixels. Please select an image with the above dimensions; otherwise the image may be distorted. (Annotation: The space available displays here.)
- Existing Image:** Displays a thumbnail of a building. Below it, Image Size: 5kb, Download time on 56k modem: Approx. 0.8 Seconds. (Annotation: The existing image displays here.)
- Selection Options:** Please select the image you would like to add to the theme.
 - ☐ Use the original theme image.
 - ☐ Use my global theme image (*).
 - ☐ Use the image selected below for this theme.
- Image Selection:** Select a Library (dropdown) and Select an Image (dropdown). (Annotation: Select the Retailer Library here.)
- Image Preview:** A large empty box for the preview. (Annotation: Select the image here.)
- Image Size:** Image Size: Download time on 56k modem: (This section is partially obscured by the preview box).
- NOTES:**
 - * To manage your "Global theme image" close this screen and go to the "Manage" drop down.
 - Any changes you make to this theme will not be automatically overridden with the changes you made on page "Manage global theme".
- Buttons:** Cancel changes and Save changes. (Annotations: Click here to cancel your changes. Click here to save your changes.)

Note:

When emailing logo images, the recommended size is 150 x 160 pixels.

Under **Space Available**, the system displays the image size properties.

After **Space Available**, the system displays the existing image in the **Existing Image** area along with its image size and approximate download time.

- 3 Select one of the following options:
 - **Use the original theme image** - for example, a silver Freelander in the Freelander theme.
 - **Use my global theme image (*)** - an image of your retailer store, for example, that you want to display on all or most of your themes.
 - **Use the image selected below for this theme** - an image that you want to display on a specific theme only, e.g., an image of a Land Rover Discovery in front of your retailer store that matches nicely with the Land Rover theme.

- 4 If you selected **Use the image selected below for this theme**, from the **Select a Library** drop-down list, select **Dealer Theme Images**.

- 5 From the **Select an Image** drop-down list, select the desired image.

The system will display a preview of the image in the **Image Preview** area that is scaled to the boundaries of the template. The system will also display the image size.

- 6 To select this image, select **save changes**.

- 7 To discard this selection, select **cancel changes**.

The Modify Theme Image form closes, and the Home page redisplayes with the applied image in the appropriate section of the theme.

Tip:

If you need assistance, please contact the eBusiness Support Center at (800) 446-5066.

Navigation Bar

Note:

Only active pages display on the navigation bar.

Use the navigation bar to move around (or navigate) the different pages in your site. The pages that display on the navigation bar are set in Manage Navigation. The higher-level tabs provide information about the main sections of the site (for example, New Models, Pre-Owned, and so on). The lower-level sections display more detailed, specific information about a section (for example, Build Your Land Rover, Contact Us, and so on) or custom pages that can be used to create completely unique pages to your retailer store.

Level 1 tabs display general information.

Level 2 tabs display more specific information about a section.

RetailerConnection Default Pages

When retailers access their Website Utility for the first time they will see the following pages:

- Home
- New Models
- Pre-Owned
- Sales
- Parts and Services
- About Us

Additional subsections can be added or removed through Manage Navigation (refer to "Manage Site Navigation" on page 74).

Explanation of RetailerConnection Default Content

Initial default content is provided with each RetailerConnection application. Feel free to customize this content to reflect your retailer's identity.

Corporate Integration

The RetailerConnection Website Utility integrates with several other parties, including the following:

- Land Rover USA
- Build Your Land Rover
- Inventory
- Mapping
- Warranty Information

WYSIWYG Content Manager

You can begin modifying data after you login to the Content Management Utility. The WYSIWYG Content Manager - (What You See Is What You Get) tool is located in the Utility Area of the Home page.

Click here to access the WYSIWYG Content Manager.

Use the WYSIWYG Content Manager to modify the contents of your site.

The WYSIWYG Content Manager contains the following Manage features, accessible through the Manage dropdown box:

- Department and Hours
- External Links
- Location
- Site Look and Feel
- Site Navigation
- Staff
- Website Administrator
- Global Theme Image
- Custom Quadrants
- Lead Management Preferences

Manage Online Inventory

The RetailerConnection Inventory Management System, provided by Digital Motorworks, LP (DMi), allows you to make changes to the inventory being displayed online and upload vehicle photos to be shown with your inventory.

Select Online Inventory from the Manage drop down box or from the Gateway page. The Inventory Management System Home page displays.

From the Inventory Management System Home page, you can access the following links:

- Frequently Asked Questions - Provides information on using Inventory Services as well as help for common PhotoLoad issues.
- Manage Inventory - Add or search for vehicles.
- View Manufacturer Supplied Information (CIS) - A report that displays vehicles with Manufacturer Supplied Information for your retailer store.
- Configure Inventory Management - Add or search for vehicles, or choose features that you want to appear as default choices when you are editing a vehicle (for example, 4WD).
- View Vehicle Exception Report - A summary of the types and numbers of errors that are causing your vehicles not to display on the website.
- Run PhotoLoad - Manage photos to be placed on your website. You can run a Photo Availability Report that will list all vehicles currently without photos, or you can upload photos to the server.
- Modify Retailer Information - Enter your retailer's information including the retailer store name, address, and phone number. Also include business contact and technical contact information.
- Contact Support - An email link to the Inventory Support Department.

Manage Inventory

Use the Data Management form to manage your inventory. You can access this form directly from the Inventory Management Systems Home page, or by selecting the Configure Inventory Management followed by the View/Edit Inventory link.

The Data Management form displays. From this page, you can add vehicles or search for a specific vehicle or set of vehicles.

Search for a Vehicle

- 1 Select the **Search** button to search for a specific vehicle. The Search window displays, and the default search type is **By Type**.
- 2 To search by vehicle type, select either the **New** or **Used** radio button. Select a vehicle make, type, and model, then select the **Search** button.
or
To search by stock number, select the **By Stock #** tab. Enter a stock number, then select the **Search** button.

Add a Vehicle

- 1 Select the **Add Vehicle** button. The Properties page displays. This page has the following four tabs: General, Attributes, Std Features, and Dealer Added.
- 2 On the **General** tab, enter the Stock number and VIN number. Select whether the vehicle is new or used, and select the type of vehicle (for example, Luxury Car or SUV). Enter the Year, Make, and Model. Finally, enter the Engine, Package, and Body information.
- 3 Select the **Attributes** tab. On this tab, enter the vehicle color, and enter the interior, transmission, and mileage information. Finally, enter a price for the vehicle.
- 4 Select the **Std Features** tab. Enter standard vehicles for the vehicle by typing directly into the Features text box. You can also select features from the left-pane window. Simply double click on a feature, and it will display in the Features text box. **Note:** The features list can be edited using the Inventory Management Features form. See "Edit Template Features" on page 48 for more information.
- 5 Select the **Dealer Added** tab. In the text box provided, enter any features that have been added to the vehicle by your retailer store.
- 6 Select **Save** when you have finished enter information about the vehicle that you are adding to your inventory. The vehicle will display in the Data Management form. To cancel your edits without saving, select **Cancel**.

Note:

See "Edit Template Features" on page 48 for information on how to add or edit the features that appear on the left pane of the Std Features tab.

Edit a Vehicle

- 1 In the Data Management form, select a vehicle entry from the list to edit its properties. You can sort the vehicles by clicking on the column headers. You can also click the **Search** button to select vehicles to view and modify.
- 2 The Properties form displays. Edit any necessary information, or select **Delete Entry** to remove the vehicle from your online inventory.

Edit Template Features

You can manage the list of features that displays on the **Std Features** tab of the Properties form. (See "Add a Vehicle" on page 47 for more information.)

- 1 On the Inventory Management welcome screen, select the **Configure Inventory Management** link. This opens the Inventory Management form.
- 2 On the Inventory Management form, select the **Edit template features** link.
- 3 In the Features text box, type the features that you want to display in the list of standard features. Select **Save** when you have finished.

Note:

Features can be deleted directly in the text box.

Run PhotoLoad

Use the PhotoLoad utility to manage photos that will be viewable on your website. With this utility, you can run a Photo Availability Report that will list all vehicles currently without photos, or you can upload photos to the server.

Select the **Run PhotoLoad** link from the Inventory Management System Home page. The PhotoLoad page displays. From this page you can run a Photo Availability Report and manage your photos.

Photo Availability Report

Use the Photo Availability Report to view a list of vehicles in your inventory that do not have photos. You can run this report specifically for New, Used, or New and Used vehicles.

-
- 1 On the PhotoLoad page, select the Photo Availability Report link.
 - 2 To run the Photo Availability Report, select one of the following links: New Vehicles, Used Vehicles, or Both New and Used Vehicles. A photo availability report for new vehicles is shown below.

Manage Photos

Use the Manage Photos page to add vehicle photos to your online inventory.

Tip:

The **Settings** button determines the search type for PhotoLoad. If the photos are on a floppy, select the **Search All Floppy Disks** radio button. If the photos are in a specific file, select **Search folder** radio button and the path for the photos.

Note:

The **Settings** button determines whether photos are uploaded for a single retailer store or for multiple retailer stores.

- 1 On the PhotoLoad page, select the **Manage Photos** link.
- 2 The **Load Photos** button uploads photos directly from your floppy drive or from a selected folder. When photos are uploaded, you will see "thumbnails" of each of your photos with their current name directly beneath them.

If your photo has a sound file associated with it, a speaker icon will appear in the bottom right corner of the thumbnail image.
- 3 The **Photo Properties** button allows you to rename photos. Double click on a photo to open the Photo Properties form. Enter the stock number for the vehicle exactly the way that it displays in the inventory. When saving photos for multiple retailer stores, select the appropriate retailer store for each vehicle from the drop down menu. If a sound file is available for the photo, you can click on the Play Sound button to hear the recording.

When you have finished editing the photo properties, select **OK** to save your new settings.
- 4 When all photos have been renamed to their respective stock number and assigned to the appropriate retailer store, select the **Upload Photos** button to transfer your photos to the DMi server. A summary screen displays during the transfer to show the status of each photo. If any photos are unsuccessful, you will need to re-process and send them again.
- 5 The **Settings** button allows you to edit PhotoLoad settings. You can select to upload photos for your retailer store or for multiple retailer stores. You can also specify to search for photos on a floppy disk or from a specific file.

Manage Departments and Hours

Use this feature to add, edit, or delete departments for a location. The information appears on the Hours page of the website. Departments are also used to control the display on Staff pages. **Note:** Departments will appear in the order shown on the Hours page. Departments can only be sorted within a location.

Add Departments & Hours

To add a department and its hours, perform the following steps from the Home page.

- 1 Select **Departments and Hours** from the **Manage** drop-down list. The Modify Department Information form displays.

Modify Department Information [help?](#)

Department(Location)

New Department(4 Parklane Blvd)
New Vehicles(4 Parklane Blvd)

▲ Move Up
▼ Move Down

Click here to add a department to the website.

Add + Edit ✎ Delete 🗑

Departments will appear in the above order on the "Hours" and "Contact Us" pages. Select a department and use the "Move Up" and "Move Down" arrows to sort departments. Departments can only be sorted within a location.

close save changes

Click here to close the form.

Click here to save changes.

- 2 Select **Add**. The Modify Department form displays.

Select the department name here. If you are creating a department, select **Custom Department**.

If you are creating a custom department, enter the name here.

Select the location of the department here.

Enter the contact method information here.

Enter hours of operation here.

Click here to cancel changes.

Click here to save changes.

The screenshot shows the 'Modify Department' form. At the top, there is a 'Department Name' dropdown menu currently set to 'Custom Department'. Below it is an 'English' text field. Underneath is a 'Location' dropdown menu showing 'Parklane Blvd'. The 'Contact Methods' section contains a table with columns 'Type' and 'Detail', with five rows, each having a 'Phone' dropdown in the 'Type' column. Below this is a table for hours of operation with columns 'Day', 'Open', 'Close', 'Open 24 Hours', and 'Closed'. The 'Day' column lists Sun, Mon, Tues, Wed, Thurs, Fri, and Sat. The 'Open' and 'Close' columns contain time inputs (e.g., 8:00AM, 5:00PM). The 'Open 24 Hours' and 'Closed' columns contain checkboxes. At the bottom right, there are two buttons: 'Cancel Changes' and 'Save Changes'.

Day	Open	Close	Open 24 Hours	Closed
Sun	8:00AM	5:00PM	☐	☐
Mon	8:00AM	5:00PM	☐	☐
Tues	8:00AM	5:00PM	☐	☐
Wed	8:00AM	5:00PM	☐	☐
Thurs	8:00AM	5:00PM	☐	☐
Fri	8:00AM	5:00PM	☐	☐
Sat	8:00AM	5:00PM	☐	☐

- 3 Select the department you would like to add from the **Department Name** drop-down list. If you would like to create a department, select **Custom Department** and enter the department name in the **English** field. If you would like to show all staff for your retailer store on the Staff page, you will need to create a custom department called "Retailer Staff" and then associate every staff member with that department.
- 4 Select the location from the **Location** drop-down list.
- 5 Enter the contact methods using the **Type** drop-down lists and the **Detail** fields.
- 6 Enter the hours of operation using the **Open** and **Close** fields. The format is **HH:MM**. You must indicate whether the time is **AM** or **PM**.
- 7 To indicate that the department is open 24-hours, check the **Open 24 Hours** checkbox.
- 8 To indicate that the department is closed on a particular day, check the **Closed** checkbox. If you select **Closed** on all days, the entire department will not display on the Hours pages. The contact information, however, will still display on the Contact Us page.

- 9 Select **save changes** to save your changes or **cancel changes** to cancel your changes. The Modify Department Information form re-displays. (See page 46.)
- 10 On the Modify Department Information form, select **save changes** to save your changes or select **close** to close the form. The Home page re-displays.

Edit Departments and Hours

To edit a department and its hours, perform the following steps from the Home page.

- 1 Select **Departments and Hours** from the **Manage** drop-down list. The Modify Department Information form displays.

Click here to edit a department.

Click here to close the form.

Click here to save changes.

- 2 Highlight the department you want to edit and select **Edit**.

3 The Modify Department form displays.

The screenshot shows the 'Modify Department' form. Annotations with arrows point to specific fields:

- 'Edit the department name here if this is a custom department.' points to the 'English' text field.
- 'Select a different location for the department here.' points to the 'Location' dropdown menu.
- 'Edit the contact method information here.' points to the 'Contact Methods' table.
- 'Edit hours of operation here.' points to the 'Hours' row in the 'Open/Close' table.

At the bottom right, two buttons are annotated:

- 'Click here to cancel changes.' points to the 'Cancel Changes' button.
- 'Click here to save changes.' points to the 'Save Changes' button.

- 4 Make the necessary changes. If you are modifying a custom department, you can modify the name of the department using the **English** field.
- 5 To save your changes, select **save changes** or select **cancel changes** to cancel your changes. The Modify Department Information page re-displays. (See page 48.)
- 6 On the Modify Department Information form, select **save changes** to save your changes or select **close** to close the form. The Home page re-displays.

Sort Departments

With this feature, you can determine in what order the departments will appear on the Hours page. If you have more than one location, the primary location will always display at the top of the list.

To sort departments, perform the following steps from the Home page.

- 1 Select **Departments and Hours** from the **Manage** drop-down list. The Modify Department Information form displays.

Click here to change the order of the departments displayed on the Hours page.

Move Up
Move Down

Add + Edit ✎ Delete 🗑

Departments will appear in the above order on the "Hours" and "Contact Us" pages. Select a department and use the "Move Up" and "Move Down" arrows to sort departments. Departments can only be sorted within a location.

Close save changes

Click here to close the form. Click here to save changes.

- 2 Highlight the department you want to sort and use the **Move Up** and **Move Down** arrows to move the department to the desired location in the list.
- 3 To save your changes, select **save changes** or select **close** to close the form. The Home page re-displays.

Warning:

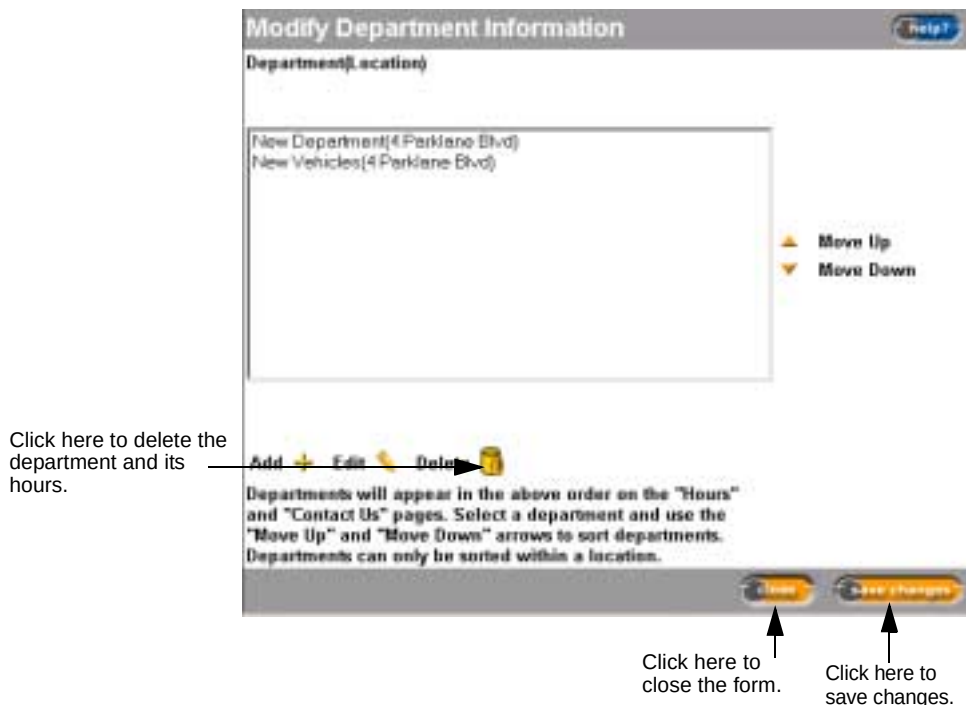

If you delete a department and its hours, all hours and contact information for that department will be deleted.

Delete Departments and Hours

With this feature, you can delete a department and its hours.

To delete a department and its hours, perform the following steps from the Home page.

- 1 Select **Departments and Hours** from the **Manage** drop-down list. The Modify Department Information form displays.

- 2 Highlight the department you wish to delete and select **Delete**. The system displays a warning message verifying the delete action.
- 3 Select **OK**.
- 4 To save your changes, select **save changes** or select **close** to close the form. The Home page re-displays.

Manage External Links

This function allows you to submit links to third party websites for approval. The approved links will be available under the **Email and Links** section on the WYSIWYG Content Editor page, in the **Outside Link Type** drop-down list. For more information on the WYSIWYG Content Editor, refer to Add Web Page and Email Links on page 143.

- Blue links are links awaiting approval for use on your site as determined by The Retailer Association and Land Rover requirements.
- Red links are links that have been rejected for use on your site as determined by The Retailer Association and Land Rover requirements. It is possible the link was rejected because incorrect information was provided. If this is the

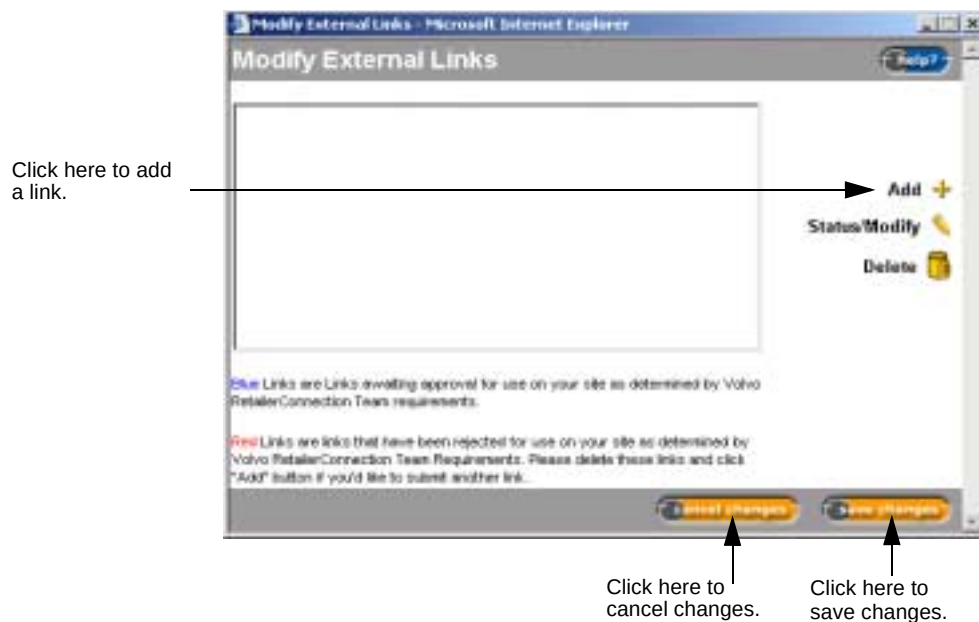

case, please re-submit the link with the correct information. Please delete the incorrect links.

- Black links are links that have been approved for use on your site as determined by The Retailer Association and Land Rover requirements.

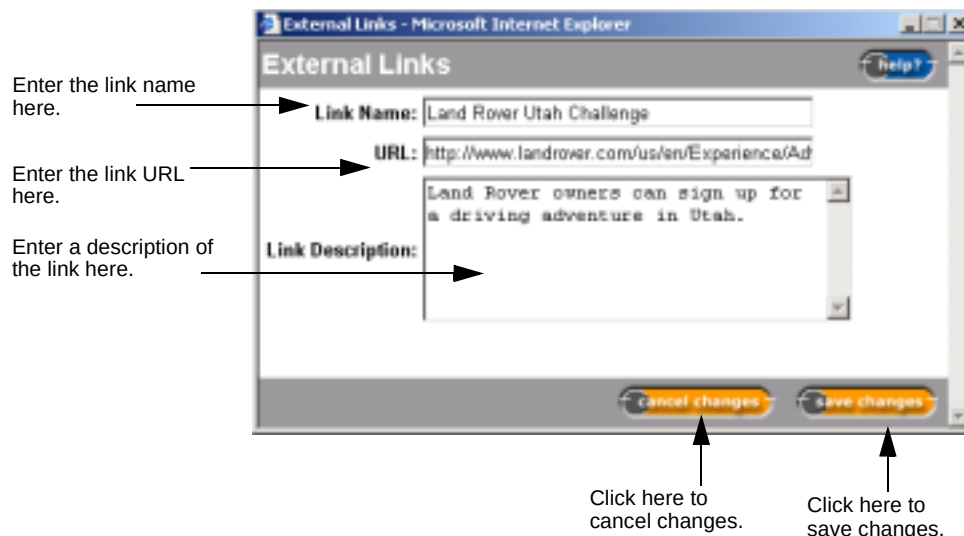

Add External Links

To add an external link, perform the following steps from the Home page.

- 1 Select **External Links** from the **Manage** drop-down list. The Modify External Links form displays.

- 2 Select **Add**. The External Links form displays.

- 3 In the **Link Name** field, enter a name for the link. This name is for your reference and will not be seen by customers viewing your site.
- 4 In the **URL** field, enter the URL for the link. The format is **http://www.<url>.<extension>**
- 5 In the **Link Description** text box, enter a description for the link.
- 6 To save your changes, select **save changes**. An email will be sent with the link information, and you will be notified if the link is approved.
- 7 To delete your changes, select **cancel changes**.

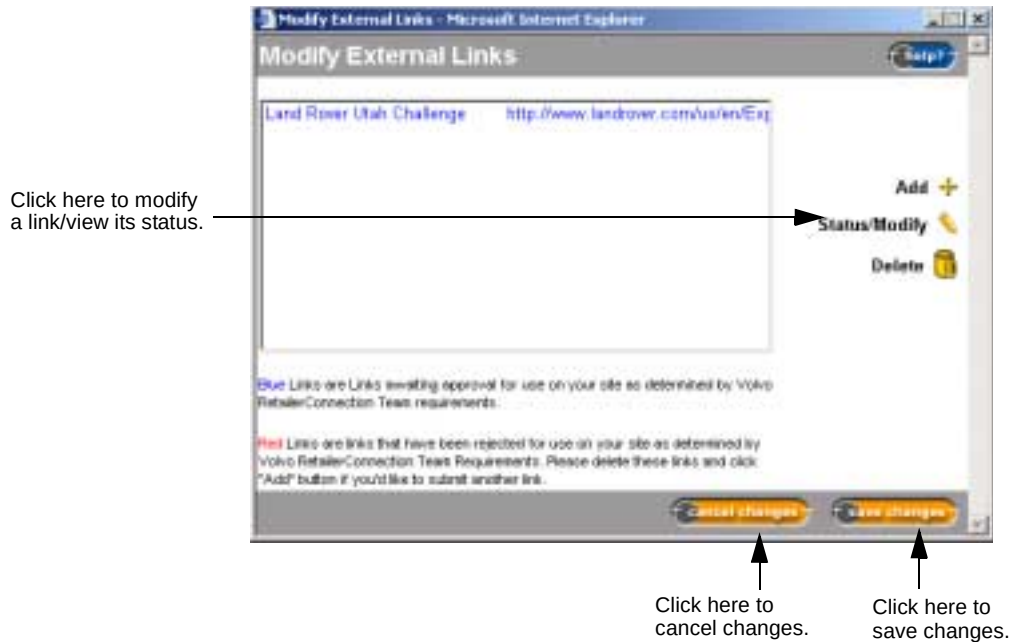

Modify External Links/View Status

If a link has been rejected, and it is due to an error in the information you provided, you can modify the link using this feature and re-submit the link for approval. This feature can also be used to view the status of a link and read administrator comments, if applicable. (See graphic at the bottom of page 54.) The following statuses are available:

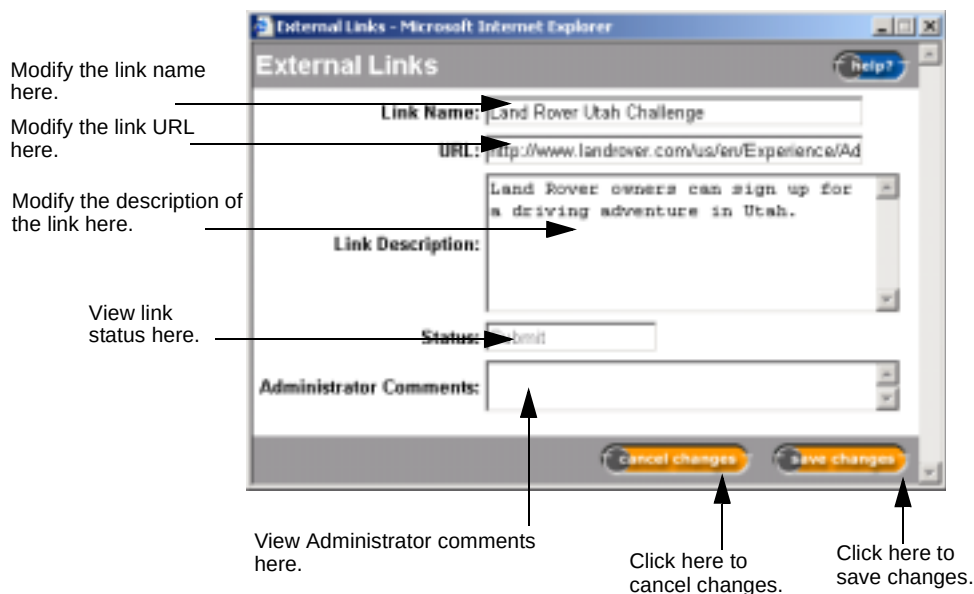

- **Submit** - this means the link has been submitted and is pending.
- **Approved** - this means the link has been approved.
- **Rejected** - this means the link has been rejected. Usually, if a link is rejected, the administrator will provide comments in the **Administrator Comments** text box.

To modify an external link/view its status, perform the following steps from the Home page.

- 1 Select **External Links** from the **Manage** drop-down list. The Modify External Links form displays.

- 2 Highlight the link you wish to modify/view status and select **Status/Modify**. The External Links form displays.

-
- 3 Make the necessary changes using the **Link Name**, **URL**, and **Link Description** fields.

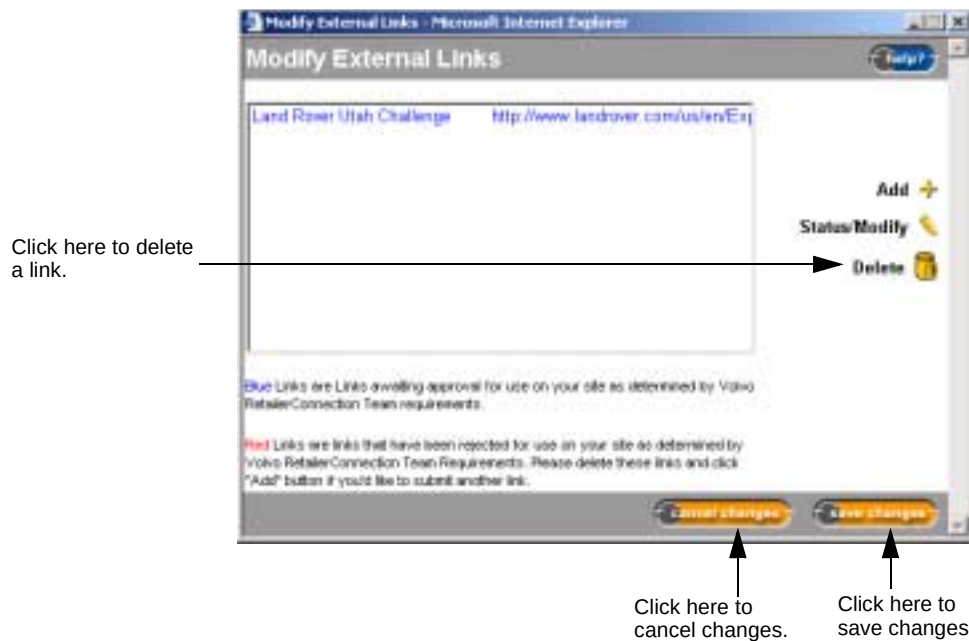

The status of the link displays in the **Status** field and cannot be modified. Administrator comments display in the **Administrator Comments** scroll box and cannot be modified.

- 4 To save your changes, select **save changes** or select **cancel changes** to delete your changes.

Delete External Links

To delete an external link, perform the following steps from the Home page.

- 1 Select **External Links** from the **Manage** drop-down list. The Modify External Links form displays.

- 2 Highlight the link you wish to delete and select **Delete**. A warning message displays verifying the delete action.
- 3 Select **OK** to delete the link or **Cancel** to return to the Modify External Links form without deleting the link.
- 4 Select **save changes** to save your changes, or select **cancel changes** to ignore your changes.

Manage Location

This feature allows you to add addresses for all of your physical locations and manage all of your retailer location information in one place. The ability to create multiple retailer locations is useful when there are departments that are not located at the main address.

Note:

If the displayed information is incorrect or to change your retailer website name, please contact eBSC at (800) 446-5066.

Edit Primary Location Information

You can edit the fax number of your primary location, your primary location email address, your email for Service appointment requests, and additional contact information. To edit your primary location information, perform the following steps:

- 1 From the **Manage** drop-down list, select **Locations**. The Locations form displays.

Click here to edit your primary location.

All the information displayed on this form is the information that will display throughout your site as part of your retailer's contact information.

- 3 Enter or modify the primary FAX number in the **Primary Fax** field.
- 4 Enter up to five fields of additional contact information for the location using the drop-down menus and text boxes in the **Additional Contact Information for this location** section.
- 5 To save your changes, select **save changes** or select **cancel changes** to cancel your changes. The Locations form re-displays.
- 6 On the Locations form, select **save changes** to save your changes then select **close** to close the form.

Note:

The Contact and Locate Us pages show Contact information in this order: Primary Phone, Fax, & Email, plus any additional contact methods in the order they are entered in the system.

Add Additional Locations

You can now name your additional locations for your retailer store. This name will be displayed in all places of your website where this location is referenced (for example, the Contact us page).

Note: If you do not enter a location name, your website will display a generic name, such as "Location 2".

To add an additional location, perform the following steps:

- 1 From the **Manage** drop-down list, select **Locations**. The Locations form displays.

Click here to add additional locations.

Click here to close the form.

Click here to save changes.

- 2 Select **Add** under the **Additional Locations** section. The Add Additional Location form displays.

Enter the location name here.

Enter the address information here.

Use the drop-downs and text fields to enter additional contact information.

Click here to cancel changes.

Click here to save changes.

- 3 Enter the location name in the **Location Name** field.
- 4 Enter the address information in the appropriate address fields. You can enter up to three lines of address information.
- 5 Enter the contact information using the **Select Contact Type** drop-down lists and associated text boxes in the **Additional Contact Information for this location** section.
- 6 To save your changes, select **save changes** or select **cancel changes** to cancel your changes. The Locations form re-displays.
- 7 On the Locations form, select **save changes** to save your changes then select **close** to close the form.

Note:

The contact method information will display in the order of the system list, not in the order in which it was entered.

Note:

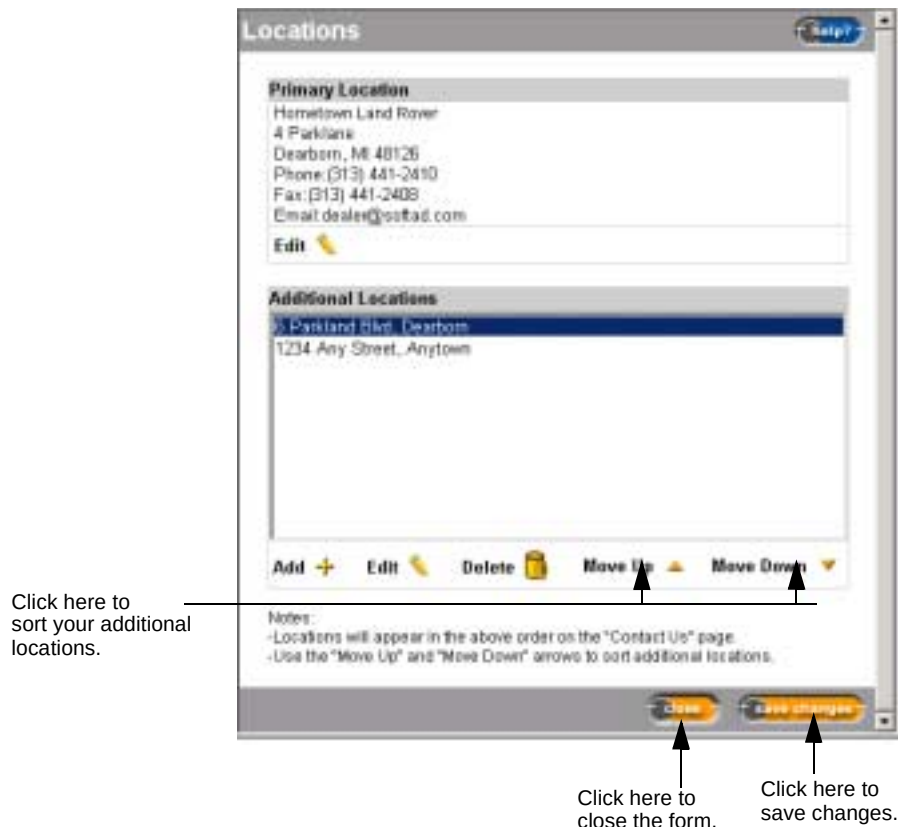

Your primary location cannot be sorted; it will always remain at the top of the list.

Sort Additional Locations

This option is useful since the locations will display on the Contact Us page in the order they were entered into the system.

To sort locations, perform the following steps:

- 1 From the **Manage** drop-down list, select **Locations**. The Locations form displays.

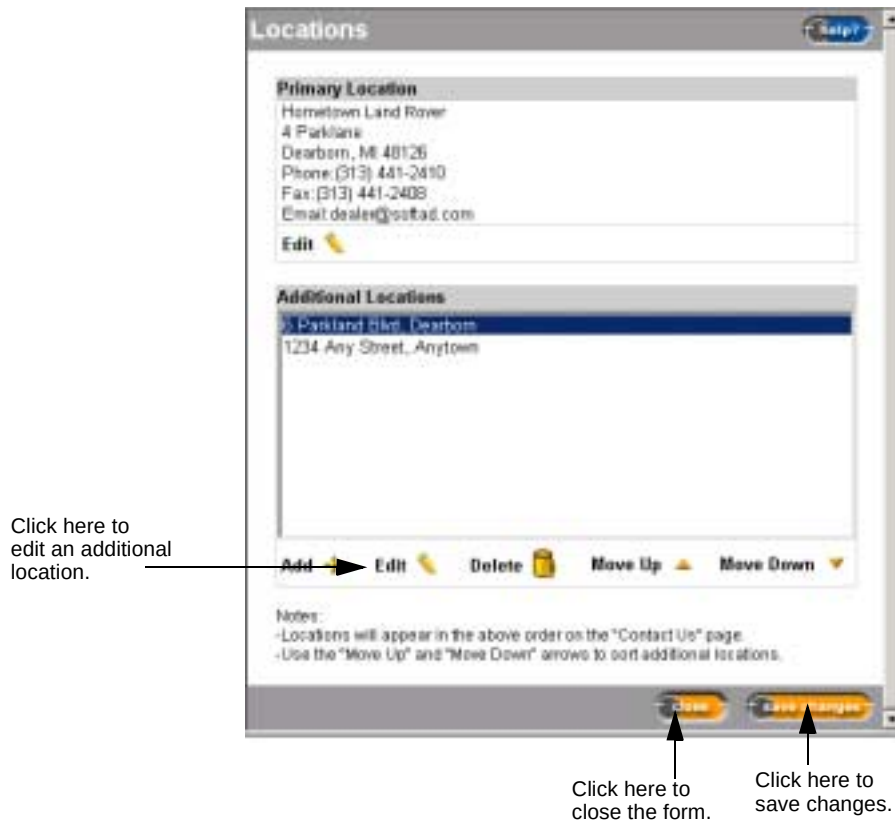

- 2 Highlight the location you wish to sort and use the **Move Up** and **Move Down** buttons to move it to the desired position in the list.
- 3 To save your changes, select **save changes** or select **close** to close the form.

Edit Additional Locations

To edit a location, perform the following steps:

- 1 From the **Manage** drop-down list, select **Locations**. The Locations form displays.

- 2 Highlight the location you wish to edit in the **Additional Locations** section and select **Edit**. The Modify Location form displays. This screen is pre-populated with the existing information.

Modify the address information here.

Modify the contact information here.

Click here to cancel changes.

Click here to save changes.

- 3 Modify the location name using the **Location Name** field.
- 4 Modify the address information in the appropriate address fields.
- 5 Modify the contact information using the **Select Contact Type** drop-down lists and associated text boxes in the **Additional Contact Information for this location** section.
- 6 To save your changes, select **save changes** or select **cancel changes** to cancel your changes. The Locations form re-displays.
- 7 On the Locations form, select **save changes** to save your changes or select **close** to close the form.

Note:

The contact method information will display in the order of the system list, not in the order in which it was entered.

Delete Additional Locations

Use this feature to delete an additional location from your website. Your primary location cannot be deleted. To delete a location, perform the following steps:

- 1 From the **Manage** drop-down list, select **Locations**. The Locations form displays.

- 2 Highlight the location you wish to delete and select **Delete**. A warning message displays verifying the delete action. To cancel the delete action, select **cancel** or select **OK** to delete the location. The Locations form refreshes without the deleted location in the list.
- 3 On the Locations form, select **save changes** to save your changes or select **close** to close the form.

Display the Schedule a Service Appointment Page

In order to display the Schedule a Service Appointment page, you must add the Level 2 menu item, **Request a Service Appointment**, to the Level 1 menu item, **Parts and Services**. For information on Level 1 and Level 2 menu items, refer to Navigation Bar on page 43. For information on adding pages, refer to "Add Pages" on page 74.

After the prerequisite step has been performed, the Schedule a Service Appointment page will display when the user selects **Schedule a Service Appointment** from the **Parts and Services** menu.

Manage Site Look and Feel

The Themes function determines the overall look of your website Home page. This will help you to design a website that best fits your needs and give the website a distinct visual appearance. For example, you can change a graphic that displays in your site's background by selecting one of the many templates provided by RetailerConnection. You can set up multiple themes to occur over a length of time (for example, a weekend sale, a holiday theme, etc.). You can also customize a theme to reflect your retailer identity. For more information, refer to "Customize Theme" on page 39.

Note:

Dates for themes can **not** overlap. If the dates overlap, you will receive an error message.

Add Themes

Note: If you do not set any themes to display, the default theme will display.

To add a theme to your website, perform the following steps from the Home page:

- 1 Select the edit icon in the upper left-hand corner of the website or select **Site Look and Feel** from the **Manage** drop-down list.

Select **Site Look and feel** from the **Manage** drop-down menu or click the edit icon.

2 The Modify Theme form displays.

Scheduled Themes display here.

Click here to add a theme.

The Modify Theme form displays the themes you have selected to display on your site.

3 Select **Add**. The Add Theme To Schedule form displays.

- 4 Select a category from the **Category** drop-down list.
- 5 Select a theme from the **Theme** drop-down list.
- 6 Enter the beginning and end dates in the **Website Display Dates From** and **To** fields. The format is **MM/DD/YYYY**. The new theme information will display in the **Preview** area.
- 7 To save your changes, select **save changes** or select **cancel changes** to cancel your changes. The Add Theme To Schedule form closes and the Modify Theme form re-displays.
- 8 Select **close** to close the Modify Theme form.

Edit Themes

Note: You cannot edit the default theme.

To edit a theme to your website, perform the following steps from the Home page:

- 1 Select the edit icon in the upper left-hand corner of the website or select **Site Look and Feel** from the **Manage** drop-down list.

Select **Site Look and feel** from the **Manage** drop-down menu or click the edit icon.

- 2 The Modify Theme form displays.

Click here to edit a theme.

- 3 Highlight the theme you wish to edit in the **Your Theme Schedule** area and select **Edit**. The Edit Theme and Schedule form displays.

- 4 Make the necessary changes.
- 5 To save your changes, select **save changes** or select **cancel changes** to cancel your changes. The Edit Theme and Schedule form closes and the Modify Theme form re-displays.
- 6 Select **close** to close the Modify Theme form.

Delete Themes

Note:
You cannot delete the default theme.

To delete a theme from your website, perform the following steps from the Home page:

- 1 Select the edit icon in the upper left-hand corner of the website or select **Site Look and Feel** from the **Manage** drop-down list.

Select **Site Look and feel** from the **Manage** drop-down menu or click the edit icon.

2 The Modify Theme form displays.

Click here to delete a theme.

- 3 Highlight the theme you wish to delete in the **Your Theme Schedule** area and select **Delete**.
- 4 The system will prompt you to confirm the delete action. Click **OK** to confirm the delete action.
- 5 Select **close** to close the Modify Theme form.

Manage Site Navigation

Use Manage Site Navigation to manage the order that pages display on your website, remove pages, and/or to add additional pages. This feature also allows you to modify the start and end dates of all custom web pages in your website. This is the only method available for accessing inactive pages.

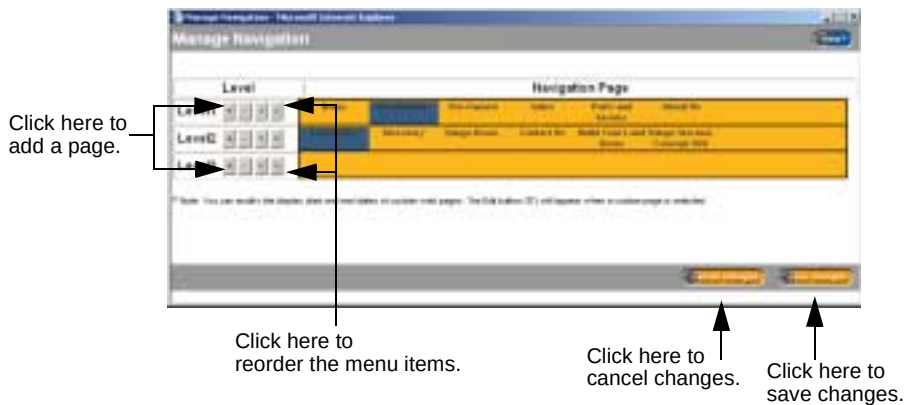

A total of 12 custom web pages can be added. Level 1 items can have one custom web page added. Level 2 items can have up to 11 custom web pages added. Level 2 contains pre-set items for each Level 1 selection.

Add Pages

To add a page, perform the following steps from the Home page:

- 1 From the **Manage** drop-down list, select **Site Navigation**. The Manage Navigation form displays.

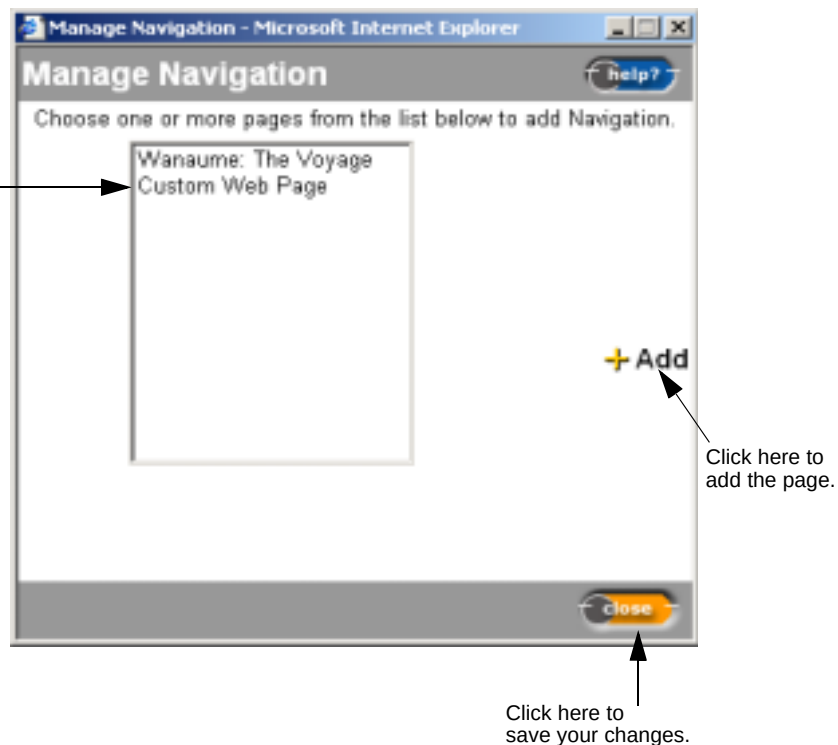

Note:

When adding Level 2 navigation, the Level 1 category must be selected first.

- 2 Select the **+** button on the level to which you would like to add the page. The Manage Navigation Add form displays with a list of all pages that are available to add.

Highlight the page you want to add.

Tip:

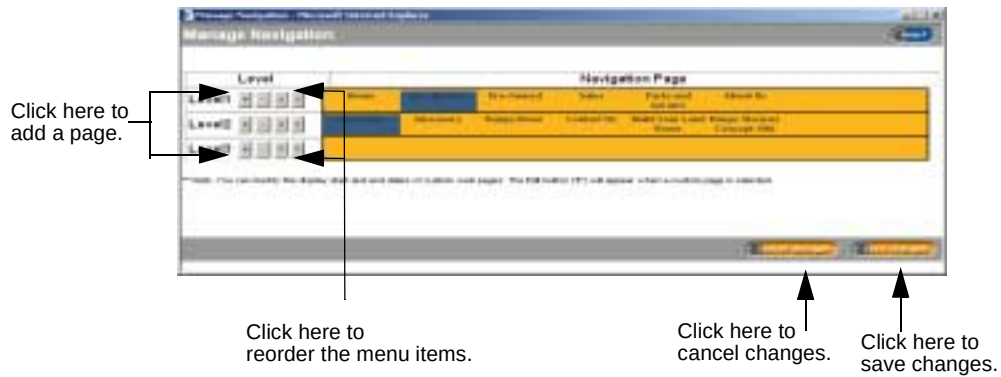

To select more than one page, use the Shift or Ctrl keys on your keyboard.

- 3 Highlight one or more pages from the list (use the **Ctrl** key to select more than one page) and select **Add**. The Manage Navigation page re-displays with the new selection.
- 4 To save changes, select **close**.

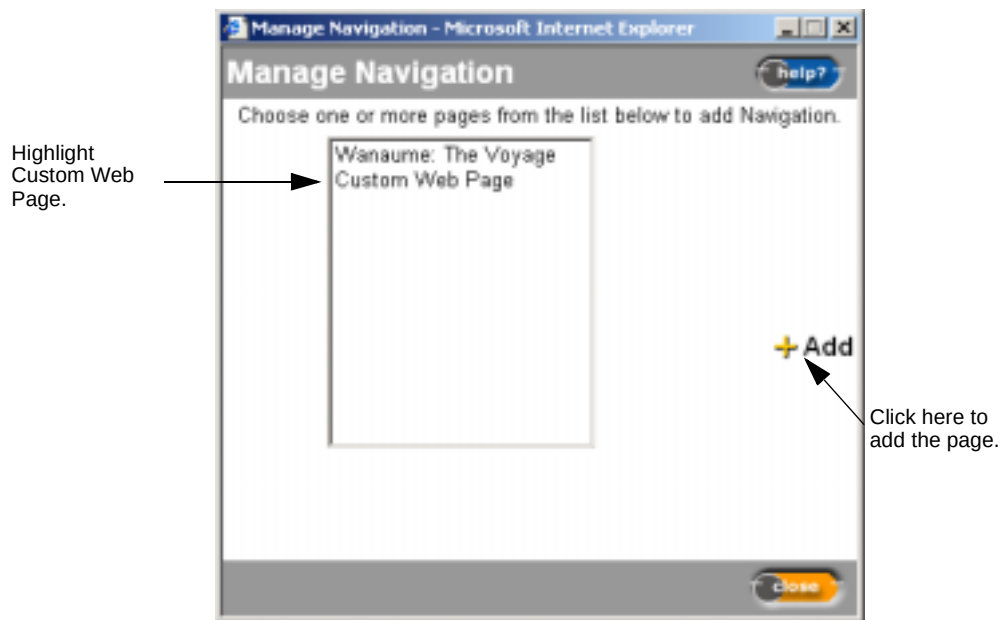

Add Custom Pages

Custom web pages are pages that you create from scratch and which contain content created entirely by you. To add a custom page, perform the following steps from the Home page:

- 1 From the **Manage** drop-down list, select **Site Navigation**. The Manage Navigation form displays.

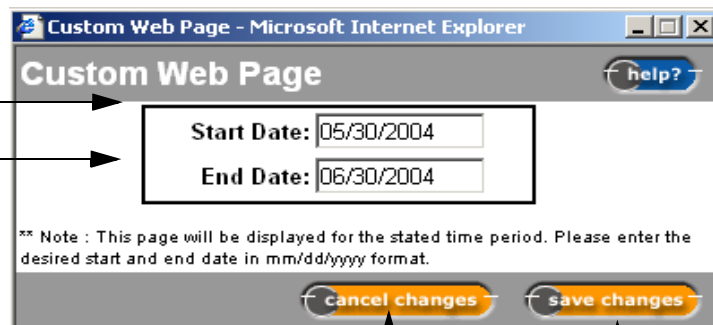

- 2 Select the **+** button on the level to which you would like to add the custom page. The Manage Navigation Add form displays with a list of all pages that are available to add.

- 3 Highlight **Custom Web Page** and select **Add**, then **close**. The Custom Web Page form displays.

Enter a start and end date here.

Click here to cancel your changes.

Click here to save your changes.

Note:

After the page expires, it is not deleted from the site; the tab just no longer displays on the active site.

- 4 Enter a start date in the **Start Date** field. The format is **MM/DD/YYYY**.
- 5 Enter an end date in the **End Date** field. The format is **MM/DD/YYYY**.
- 6 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Edit Start and End Dates of Custom Pages

To edit the start and end dates for a page, perform the following steps from the Home page:

- 1 From the **Manage** drop-down list, select **Site Navigation**. The Manage Navigation form displays.

Click here to reorder the menu items.

Click here to edit a custom page.

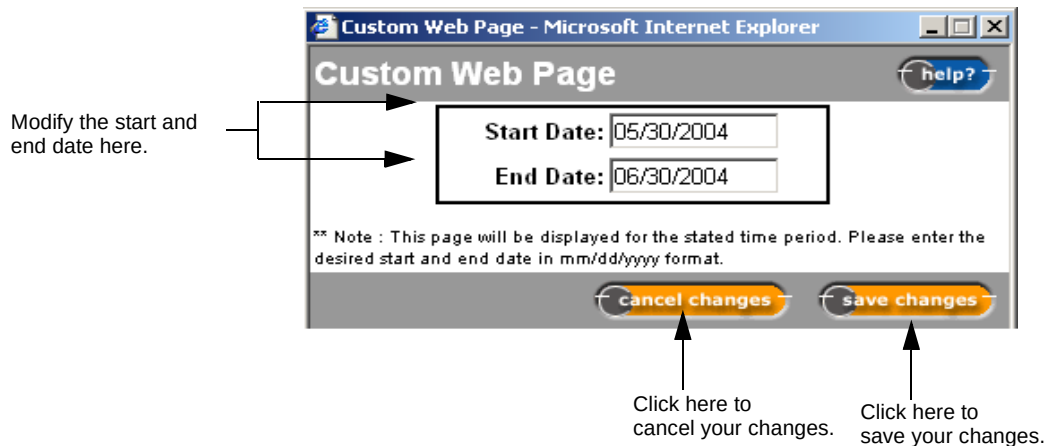

Click here to cancel changes.

Click here to save changes.

- 2 Click the custom page you wish to edit. An **E** will display in the **Level** area. **Note:** Only custom pages are editable and will display an **E** when double-clicked.

- 3 Select the **E**. The Custom Web Page form displays.

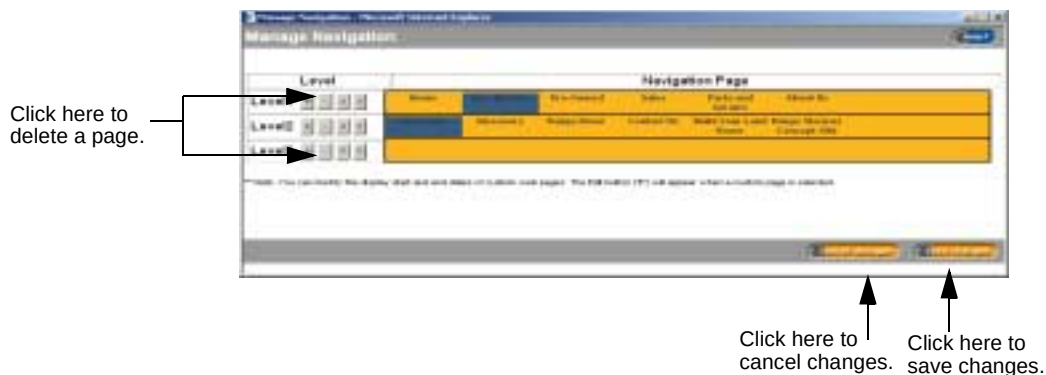

- 4 Modify the start date in the **Start Date** field. The format is **MM/DD/YYYY**.
- 5 Modify the end date in the **End Date** field. The format is **MM/DD/YYYY**.
- 6 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Delete Pages

To delete a page, perform the following steps from the Home page:

- 1 From the **Manage** drop-down list, select **Site Navigation**. The Manage Navigation form displays.

- 2 Highlight the page you want to delete and select the - button. The system displays a warning message verifying the delete action.

-
- 3 Select **OK**.
 - 4 To save changes, select **save changes** or select **cancel changes** to cancel your changes.

Manage Staff

Use this feature to add, edit, or delete employees who appear in the Staff page of the website. You can include additional staff members, edit staff member information, sort staff information, or delete staff members using this feature. Initially, staff members will display on the Staff form in alphabetical order by first name. On the Staff Page, they will display in the order in which you entered them into the system. To change the order displayed on the Staff page, use the sort feature (refer to "Sort Staff" on page 83).

Prerequisites

Before staff information can be displayed on your website, several steps must be performed:

- 1 Define your locations using the **Locations** feature. For more information, refer to "Manage Location" on page 60.
Note: This step only needs to be performed if your staff or department is located at a location other than your primary location.
- 2 Define your departments using the **Departments and Hours** feature. For more information, refer to "Manage Departments and Hours" on page 50.

Once these steps are complete, you can proceed with defining your staff information.

Add Staff

Use this feature to enter information about employees you are adding to the website. This is especially useful when there are new employees that need to be added to the website. The information will be displayed on the Staff form in alphabetical order by first name. The information will display on the Staff page in the order in which you entered the information. To change the order displayed on the Staff page, refer to "Sort Staff" on page 83.

To add staff information, perform the following steps from the Home page.

- 1 Select **Staff** from the **Manage** drop-down list. The Staff form displays.

The Key assists in referencing different locations.

Click here to add staff.

Staff Name	Title
Scott Edwards	General Manager
Scott Langley	Sales Principal

Click on the name to add staff information.

Click here to cancel changes.

Click here to save changes.

The top of the form displays a key for the different locations. For example, your primary location will automatically be assigned Key #1. Any subsequent locations that you enter will be assigned the next available key (i.e., Key #2, Key #3, etc.). This key assists in referencing the staff locations.

- 2 Select **Add**. The Modify Staff form displays.

Enter staff name, title, and additional comments here.

Select the staff photo here.

Enter contact methods here.

Click here to cancel changes.

Click here to save changes.

Note:

When emailing staff images, the recommended size is 86 x 97 pixels.

Note:

The contact method information will display in the order of the system list, not in the order in which it was entered.

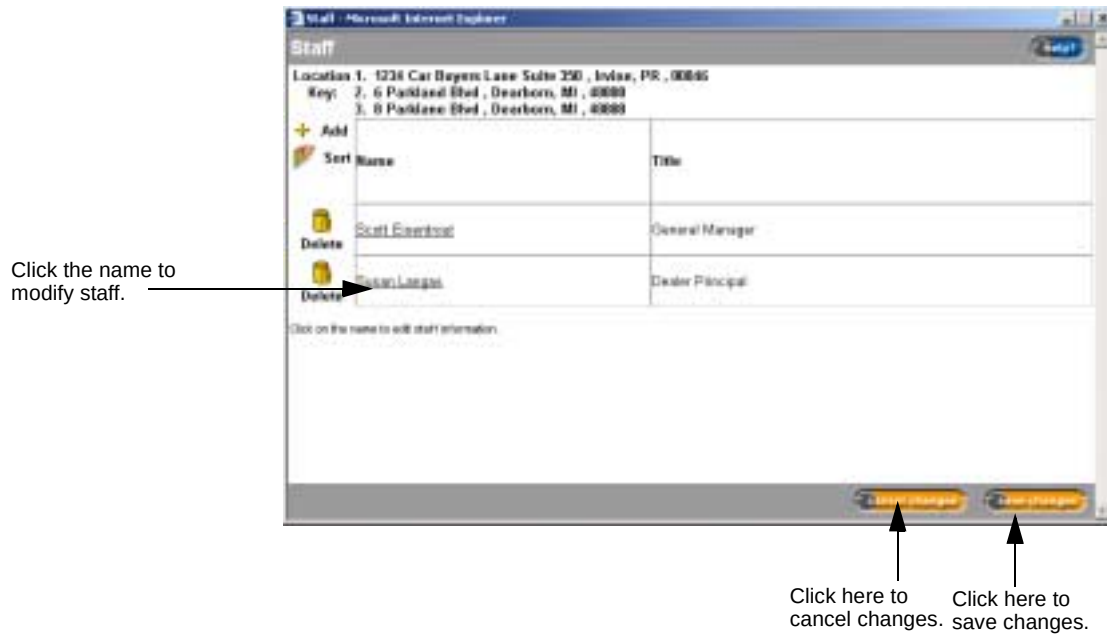

- 3 Enter the staff member's name in the **Name** field.
- 4 Enter the staff member's title in the **Title** field.
- 5 Enter additional information in the **Bio** field.
- 6 Email staff photos to the eBusiness Support Center at retailerconnection@channelnet.com. If you have emailed staff photos to the eBusiness Support Center, you can include a photo of the staff member by selecting it from the **Photo** drop-down list.
- 7 Enter contact method information for the staff member using the **Type** drop-down lists and the **Detail** fields.
- 8 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Edit Staff

Use this feature to modify employee information. This is especially useful if an employee's address, contact method, or department changes.

To modify staff information, perform the following steps from the Home page.

- 1 Select **Staff** from the **Manage** drop-down list. The Staff form displays.

- 2 Click the staff member whose information you would like to modify. The Modify Staff form displays.

The screenshot shows a web browser window titled 'Modify Staff - Microsoft Internet Explorer'. The form is titled 'Modify Staff' and contains the following fields and sections:

- Name:** A text box containing 'Susan Lange'.
- Title:** A text box containing 'Dealer Principal'.
- Bio:** A text box containing 'Top selling used Rover dealer in 2002.'.
- Photo:** A dropdown menu showing '<None>' and a button 'No Photo Selected'.
- Dept:** A text box.
- Contact Methods:** A section with a 'Type:' dropdown menu showing 'Phone' and a 'Detail:' text box containing '(313) 313-1313'.
- Buttons:** At the bottom right, there are two buttons: 'Cancel changes' and 'Save changes'.

Annotations with arrows point to the following areas:

- 'Modify staff name, title, and additional comments here.' points to the Name, Title, and Bio fields.
- 'Select the staff photo here.' points to the Photo dropdown menu.
- 'Modify contact methods here.' points to the Contact Methods section.
- 'Click here to cancel changes.' points to the 'Cancel changes' button.
- 'Click here to save changes.' points to the 'Save changes' button.

Note:

The contact method information will display in the order of the system list, not in the order in which it was entered.

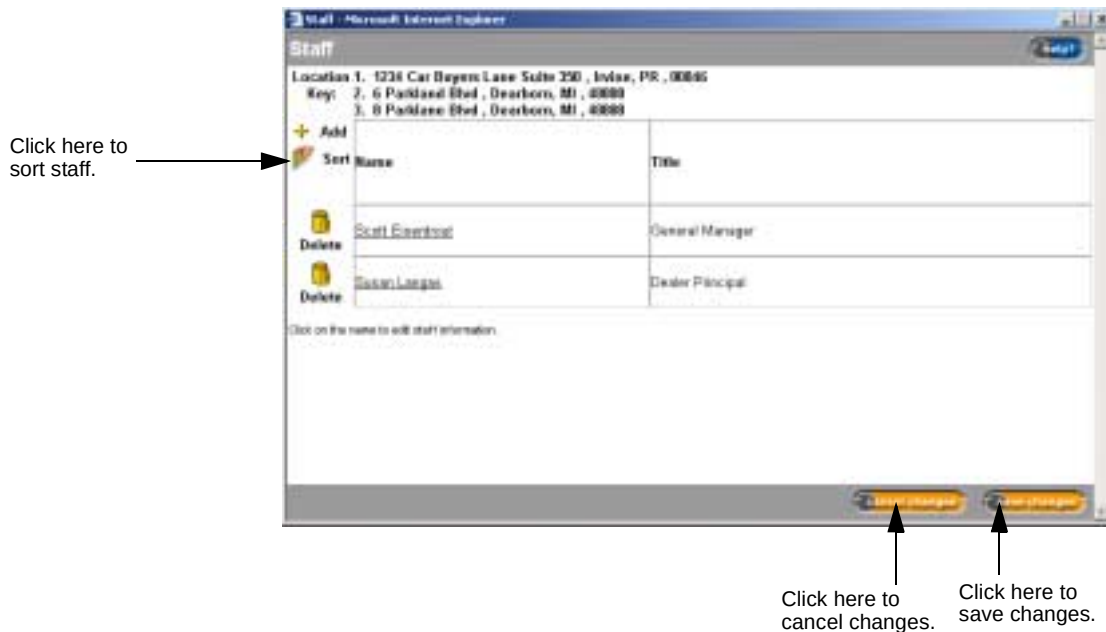

- 3 Make the necessary changes.
- 4 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Sort Staff

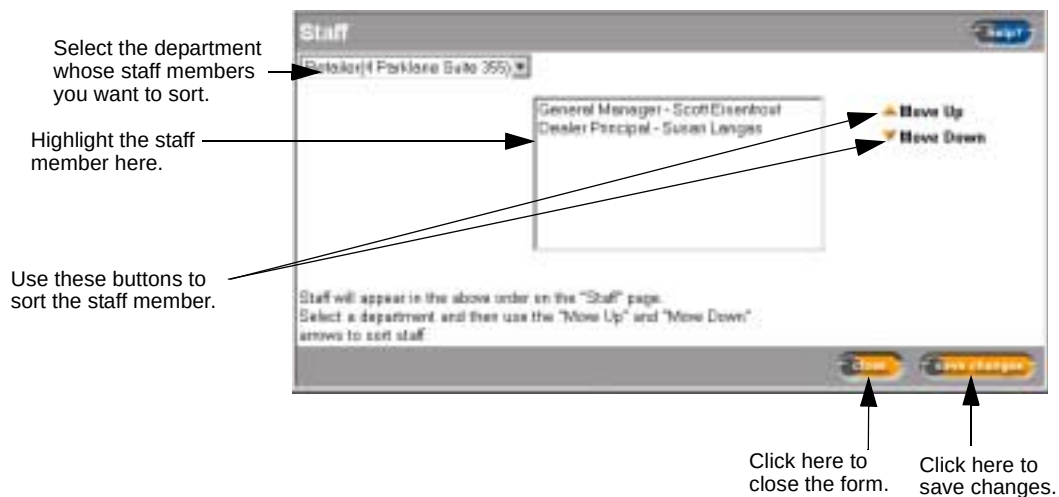

Staff members display on the Staff form in alphabetical order by first name. Staff members display on the Staff page on your site in the order they were entered into the system. You can re-arrange the order of the staff displayed on the Staff page using the Sort feature. (**Note:** the sort feature does not rearrange the order of the staff on the Staff form; it rearranges the order of the staff displayed on the Staff page.)

To sort staff information, perform the following steps from the Home page.

- 1 Select **Staff** from the **Manage** drop-down list. The Staff form displays.

2 Select **Sort**. The Staff form displays.

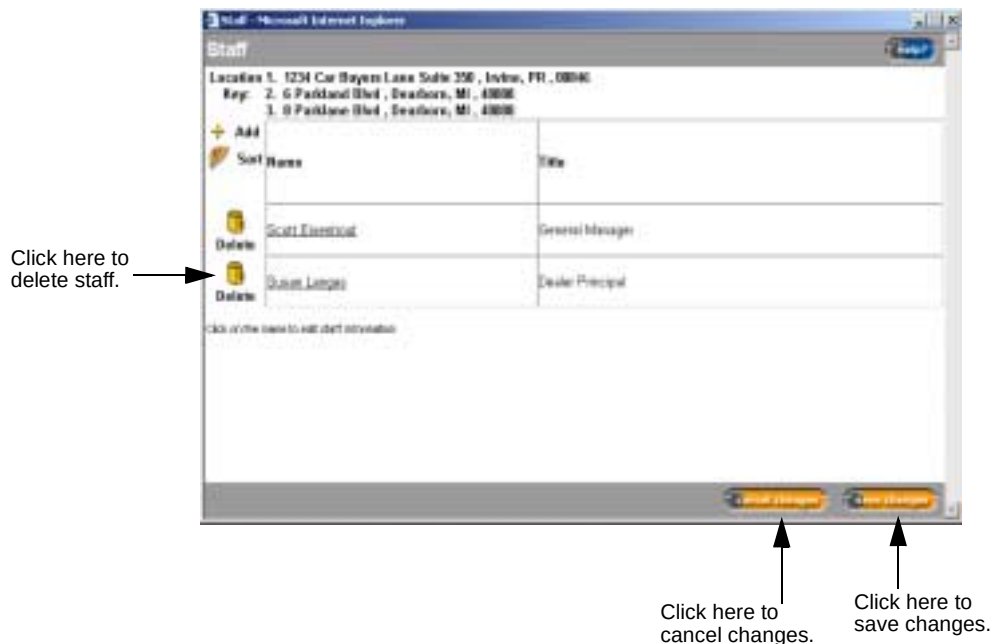

- 3 Select the department whose staff members you want to sort from the top drop-down list.
- 4 In the middle scroll list, select the staff member you wish to sort.
- 5 Use the **Move Up** and **Move Down** buttons to move the staff member to the desired location in the list.
- 6 To save your changes, select **save changes** or select **close** to close your form.

Delete Staff

If necessary, you can remove staff members from your website.

To delete staff, perform the following steps from the Home page.

- 1 Select **Staff** from the **Manage** drop-down list. The Staff form displays.

- 2 Select the **Delete** icon next to the name of the staff member you wish to delete. The Delete Staff page will display verifying that you would like to delete the selected staff member.

A screenshot of a web application dialog box titled "Delete Staff". The dialog box has a grey header bar with the title "Delete Staff" on the left and a "help?" link on the right. The main content area is white and contains the text "Are you sure you want to delete this staff member?". Below this text, the staff member's details are listed: "Name: Scott Eisentrout", "Title: General Manager", "Bio: """, and "Photo: None". At the bottom of the dialog box, there are two buttons: "No" and "Yes". The "No" button is on the left and the "Yes" button is on the right. Both buttons are yellow with black text and have a slight 3D effect.

Click here to
cancel the delete
action.

Click here to
delete the staff
member.

- 3 If you want to cancel the delete action, select **No**. The Staff form re-displays.
- 4 If you want to delete the staff member, select **Yes**. The Staff form re-displays without the deleted staff member.
- 5 On the Staff form, select **save changes** to save your changes or select **cancel changes** to cancel your changes.

Manage Website Administrator Email

Use this feature to define your email preferences for email communications with consumers and Ford Motor Company so that the right people receive the right emails. Email addresses can include emails from the RetailerConnection Team, Ford Motor Company brand managers, or from your website visitors. Each email will be sent to the appropriate roles, such as "Internet Coordinator" or "Service Appointment Request Recipient", and you can enter any number of email addresses for these roles.

For example, you might want to copy your sales team on all emails about "Featured Themes and Quadrants" that you might receive from the RetailerConnection Team, as these emails indicate a particular marketing program in your area, and potential clients might ask your sales people about this program. This feature is also useful if you want to assign backup recipients, ensuring that a second person always receives important email communications.

Note: If no email recipients are established with this feature, all email communications related to RetailerConnection will be sent to the Internet Coordinator email address (if available) or to the primary retailer's email address for your website.

Adding an Email Recipient and Assigning Roles

Use this feature to add a new email address for email communications. The roles you assign to each email address define which type of RetailerConnection email communications this person or email box will receive.

To add an email recipient and assign a role(s), perform the following steps from the Home page:

- 1 Select **Website Administrator** from the **Manage** drop-down menu list.

Select **Email Communication Pref** from the Manage drop-down menu.

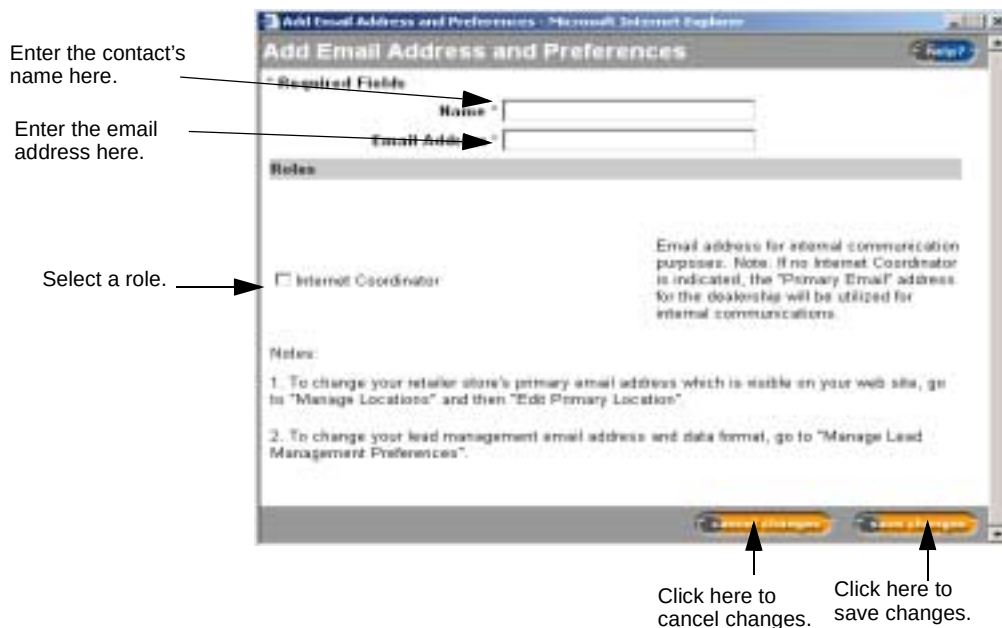

- 2 The Modify Website Administrator Email form displays.

The Modify Website Administrator Email form displays the email addresses, contact names, and roles you have assigned.

- 3 Select **Add**. The Add Email Address and Preferences form displays.

-
- 4 Enter a contact name in the **name** field. This is a required field.
 - 5 Enter the email address in the **Email Address** field. This is a required field.
 - 6 Select a role or roles using the checkboxes in the **Roles** area. The following roles are available:
 - **Internet Coordinator** - Email address for internal communication purposes.
 - 7 To save your changes, select **save changes** or select **cancel changes** to cancel your changes. The Add Email Address and Preferences form closes and the Modify Website Administrator Email form re-displays with the email address, contact name, and role(s) information displayed.
 - 8 Select **close** to close the Modify Website Administrator Email form.

Editing an Email Recipient and Assigned Roles

Use this feature to edit an email address for email communications.

To edit an email recipient and assigned role(s), perform the following steps from the Home page:

- 1 Select **Website Administrator** from the **Manage** drop-down menu list.

Select **Email Communication Pref** from the **Manage** drop-down menu.

2 The Modify Website Administrator Email form displays.

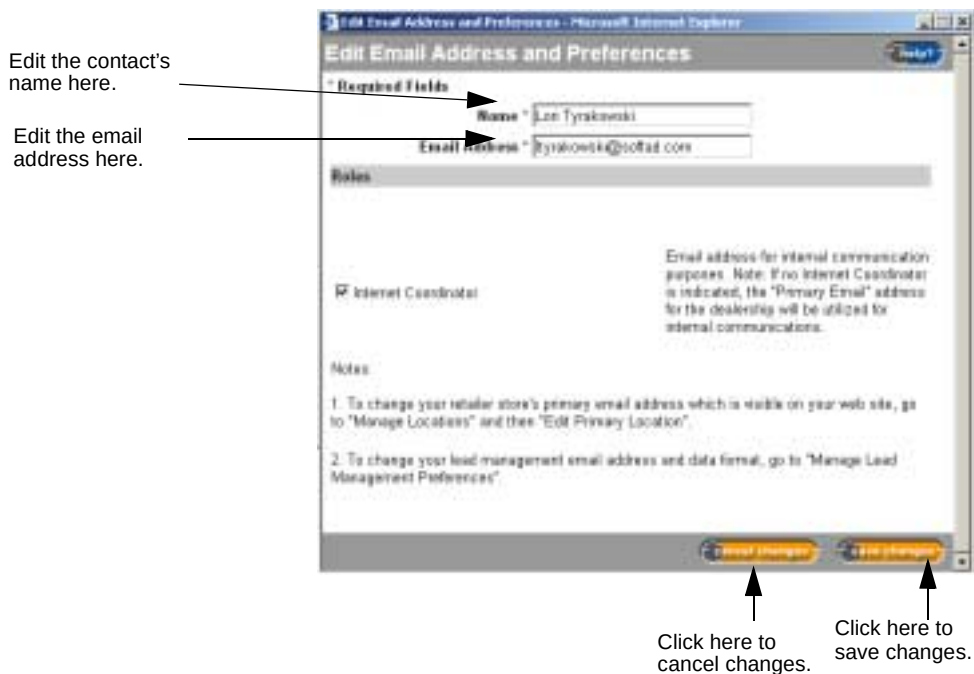

Assigned email addresses and roles display here.

Click here to edit an email address and assigned role(s).

Email addresses, contact names	Roles
dslaw@softtel.com, Service Center	Internet Coordinator
lfrakowski@softtel.com, Lari Trakowski	

The Manage Website Administrator Email form displays the email addresses, contact names, and roles you have assigned.

3 Highlight the information you want to edit and select **Edit**. The Edit Email Address and Preferences form displays.

- 4 Edit the contact name in the **Name** field. This is a required field.
- 5 Edit the email address in the **Email Address** field. This is a required field.
- 6 Edit the role or roles using the checkboxes in the **Roles** area. The following roles are available:
 - **Internet Coordinator** - Email address for internal communication purposes. **Note:** If no Internet Coordinator is indicated, the "Primary Email" address for the retailer store will be utilized for internal communications.
- 7 To save your changes, select **save changes** or select **cancel changes** to cancel your changes. The Edit Email Address and Preferences form closes and the Modify Website Administrator Email form re-displays with the email address, contact name, and role(s) information displayed.
- 8 Select **close** to close the Modify Website Administrator Email form.

Deleting an Email Recipient and Assigned Roles

Use this feature to delete an email address for email communications.

Note: If you remove ALL email recipients for a given email role, the email communications for that role will be sent to the Internet Coordinator email address (if available) or to the Primary Email address for your website.

To delete an email recipient and assigned role(s), perform the following steps from the Home page:

- 1 Select **Website Administrator** from the **Manage** drop-down menu list.

Select **Email Communication Pref** from the Manage drop-down menu.

- 2 The Modify Website Administrator Email form displays.

Assigned email addresses and roles display here.

Click here to delete an email address and assigned role(s).

Email addresses, contact names	Roles
dwan@boston.com, Service Center	Internet Coordinator
Tetakovsk@stadi.com, Lari Tetakovsk	

Add Edit Delete

The Modify Website Administrator Email form displays the email addresses, contact names, and roles you have assigned.

- 3 Highlight the information you wish to delete and select **Delete**. A message displays asking you to confirm the delete action.
- 4 Select **OK**. The Modify Website Administrator Email form re-displays with the email address, contact name, and role(s) information removed.
- 5 Select **close** to close the Modify Website Administrator Email form.

Manage Default (Global) Theme Image

This feature allows you to add a unique image (for example, your retailer store), which will be automatically displayed on all themes in the space just above your retailer store address. You only need to add this image once, and it will be applied to all themes you schedule for the future; it will be applied globally across themes. You can access the Manage Default Theme Logo feature using the **Manage** drop-down menu.

Note: Once you have set a global theme image, you are able to make exceptions for individual themes. Refer to "Edit Themes" on page 71 for more information.

To manage a global theme image, perform the following steps:

- 1 Select **Global Theme Image** from the **Manage** drop-down list. The Manage Global Theme Image form displays.

The screenshot shows the 'Manage Global Theme Image' form. It includes a 'Space Available' section with dimensions (Height: 121 pixels, Width: 171 pixels). The 'Choose Default Settings' section has two radio buttons: 'Use the original theme images as default for all new themes.' (selected) and 'Use the image below as my global theme image. This image will be the default for all new themes.' Below these are two dropdown menus: 'Select a Library' and 'Select an Image'. An 'Image Preview' section states 'Image Preview not applicable for selected option. Image will vary for theme'. At the bottom, there are 'cancel changes' and 'save changes' buttons. Annotations with arrows point to the first radio button, the 'Select a Library' dropdown, and the 'cancel changes' button.

Click here to select a default setting.

Click here to select a library and an image.

Image Preview not applicable for selected option. Image will vary for theme

Image Size
Download time on 56k modem:

NOTES:
- You can override your default theme image on a particular theme by selecting the orange edit button for the theme and choosing a different image for that theme.
- Themes previously modified with a particular image will not be automatically overridden with your default theme image selected above.

cancel changes save changes

Click here to cancel changes. Click here to save changes.

- 2 Choose one of the following default settings:
 - **Use the original theme images as default for all new themes.**
 - **Use the image below as my global theme image. This image will be the default for all new themes.**
- 3 If you selected the second option, select **Custom Theme Images** from the **Select a Library** drop-down list.
- 4 If you selected the second option, select an image from the **Select an Image** drop-down list.

The system will display a preview of the image in the **Image Preview** area that is scaled to the boundaries of the template.

5 Select **save changes**.

Notes:

- Your global theme image will not replace images on already scheduled themes unless the theme is set to use the global theme image.
- Any time you change your global theme image, all existing themes set to use the global theme image will be automatically updated.
- You can always revert back to the original theme images. Choosing the **Use the original theme images as default for all new themes** option will apply this change globally. Use the Modify Image Theme function to apply the change just to a single theme.
- In order to add a unique image to the library of this feature, email your images to retailerconnection@channelnet.com
- The Manage Global Theme Image form looks very similar to the Modify Theme Image page, but the functionality is different: your settings are applied to **ALL** themes you schedule in the future.

Manage Custom Quadrants

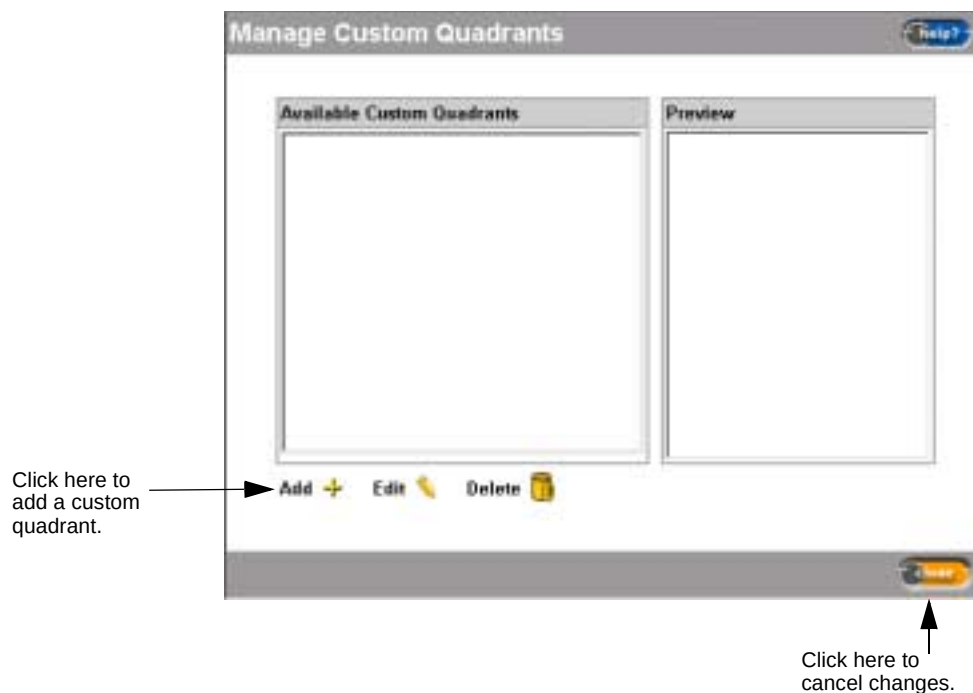

Quadrants are small areas of text and/or graphics that display on your site. Quadrants offer visitors a link to another page without requiring them to search the Navigation Bar. For example, a quadrant could contain information about a special sales promotion. This feature allows you to create custom quadrants. The custom quadrant will be added to your quadrant library and will be available to display in any quadrant section of your website. Only quadrants with an orange icon can be modified.

Add Custom Quadrants

Custom quadrants must have names when created. By default, the name or title will be "Custom Quadrant". You can set up a series of custom quadrants for later use or create or edit a custom quadrant for use in a particular quadrant on your RetailerConnection site.

To add a custom quadrant, perform the following steps:

- 1 From the **Manage** drop-down menu, select **Custom Quadrants**. The Manage Custom Quadrants form displays.

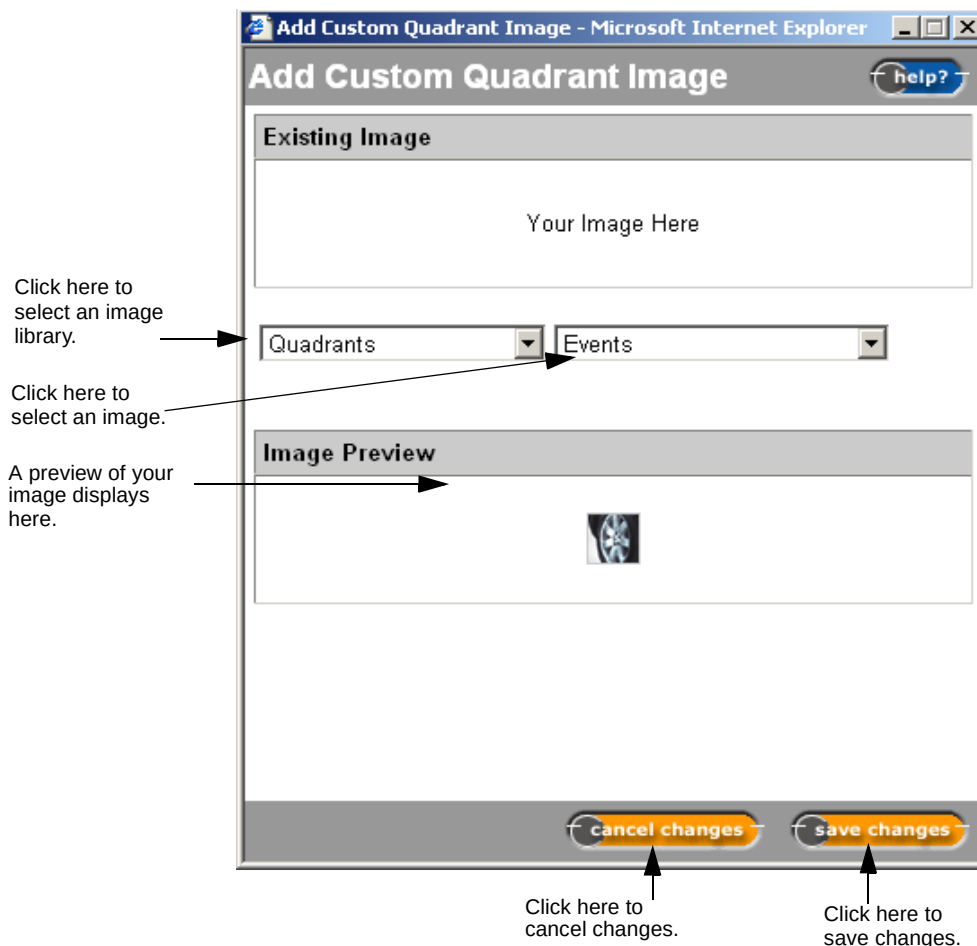

- 2 Select **Add**. The Add Custom Quadrant form displays. This screen displays a preview of the custom quadrant template. The default title is "Custom Quadrant".

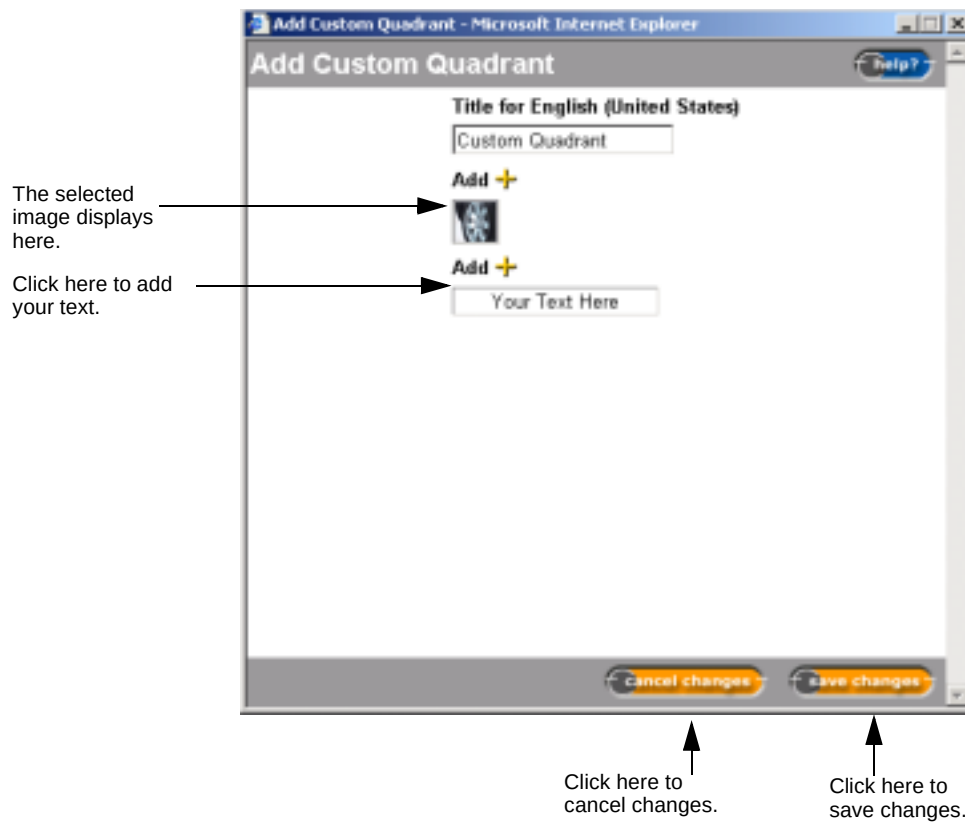

The screenshot shows a web form titled "Add Custom Quadrant" with a "help?" link in the top right corner. The form contains the following elements:

- A text input field labeled "Title for English (United States)" with the placeholder text "Custom Quadrant". An arrow points to this field with the instruction: "Enter a name for the custom quadrant here."
- An "Add +" button. An arrow points to it with the instruction: "Click here to add your image."
- A placeholder box labeled "Your Image Here".
- Another "Add +" button. An arrow points to it with the instruction: "Click here to add your text."
- A placeholder box labeled "Your Text Here".
- At the bottom, two buttons: "cancel changes" and "save changes". Arrows point to them with instructions: "Click here to cancel changes." and "Click here to save changes."

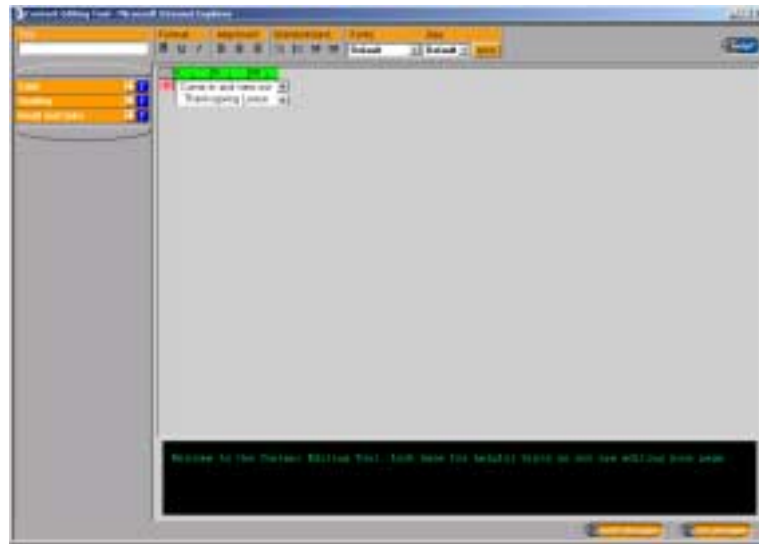

- 3 Select the **Add** button above the **Your Image Here** section. This is a required field. If you do not select your own image to be displayed, the system will display the following message: "Please select a quadrant image". The Add Custom Quadrant Image form displays.

- 4 From the **Select an Image** drop-down, select the desired image. The selected image will display in the **Image Preview** section. This is a required field. If you do not select your own image to be displayed, the system will display the following message: "Please select a quadrant image".
- 5 To cancel your changes, select **cancel changes**. To save your changes, select **save changes**. The Add Custom Quadrant Image form closes and a refreshed Add Custom Quadrant form displays.

- 6 Select the **Add** button above the **Your Text Here** section. The WYSIWYG Content Editor displays.

Click here to
cancel changes.

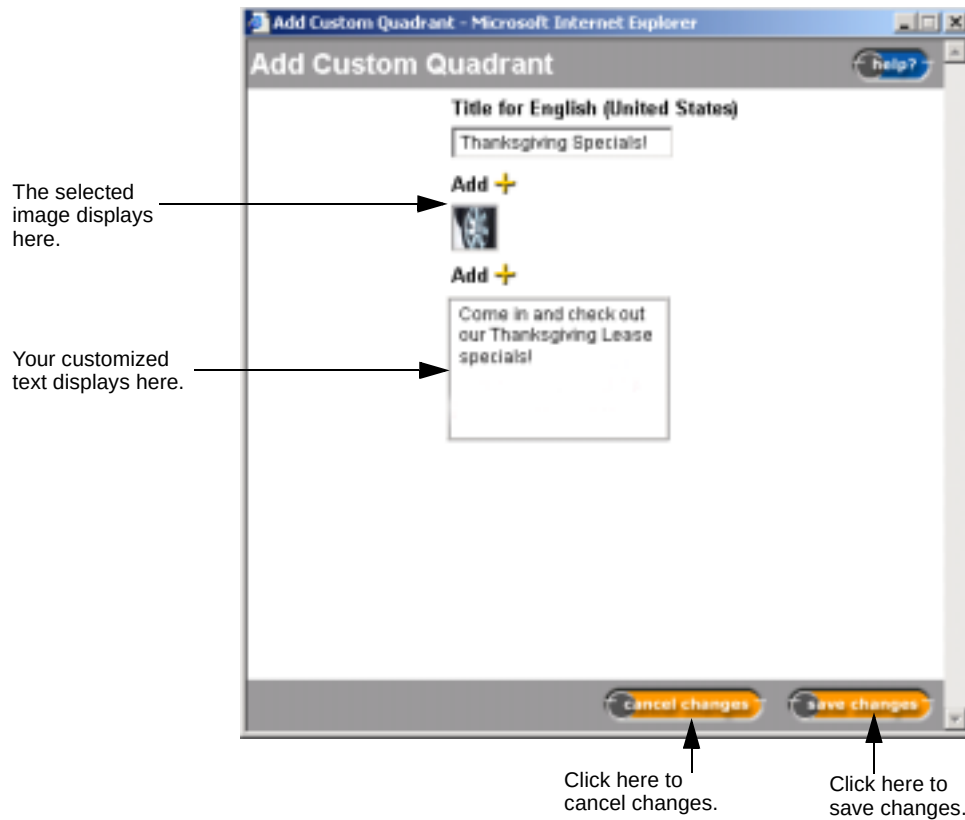

Click here to
save changes.

The following functions are available on the WYSIWYG Content Editor when working with Custom Quadrants:

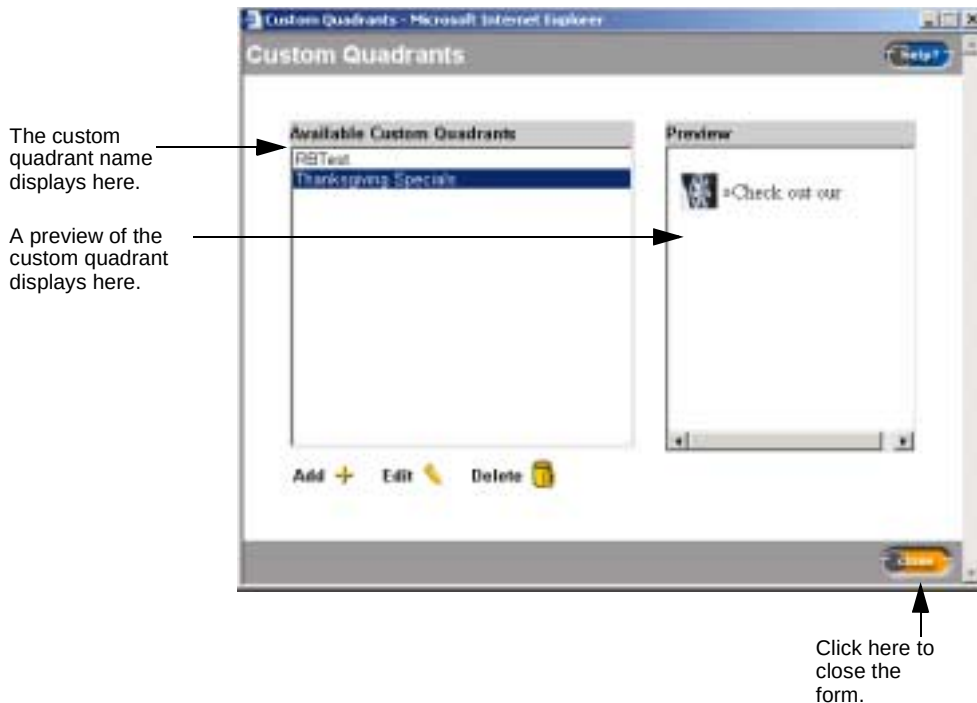

- Vertical and Horizontal Ruler (see "Text Formatting" on page 125)
- Color (see "Add Foreground and Background Colors" on page 135)
- Spelling (see "Spell Checking" on page 141)
- Email and Links (see "Add Web Page and Email Links" on page 143)
- Format (see "Text Formatting" on page 125)
- Alignment (see "Text Formatting" on page 125)
- Bullets/Indent (see "Text Formatting" on page 125)

Using the WYSIWYG Content Editor you can change and format text, add approved links to the entered text, add email links to the text, and perform a spell check of the text. For more information on the WYSIWYG Content Editor, refer to "WYSIWYG Content Editor" on page 119.

- 7 When you have finished formatting your content, select **save changes**. The WYSIWYG Content Editor closes and the refreshed Add Custom Quadrant form displays.

- 8 In the **Title** field, enter the name for the custom quadrant. This is a required field. If you do not enter a name in this field, the system will display the following message: "Please enter a quadrant title. This is a required field." The new quadrant title will be added to the **Custom** category in the quadrant library on the Modify Custom Quadrant form.
- 9 To cancel your changes, select **cancel changes** or to save your changes, select **save changes**. The Add Custom Quadrants form closes and a refreshed Manage Custom Quadrants form displays.

The new quadrant displays at the top of the list in the **Available Custom Quadrants** section.

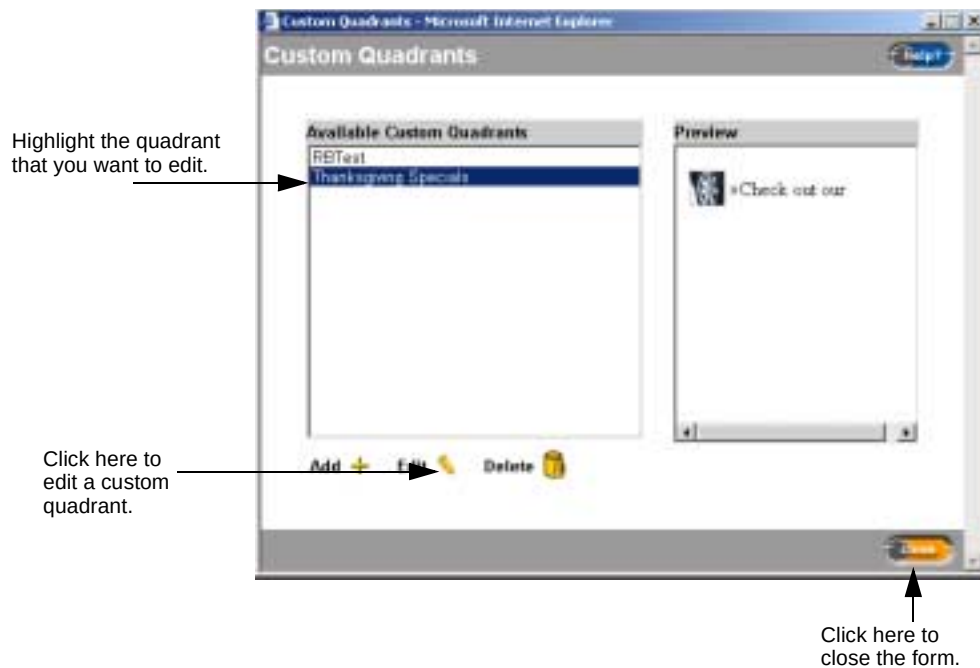

10 Click **close** to close the Manage Custom Quadrant form.

After you have added a custom quadrant to your quadrant library, you need to use the Modify Quadrant feature to actually show the quadrant on your site. For more information, refer to "Display a Custom Quadrant on the Website" on page 108.

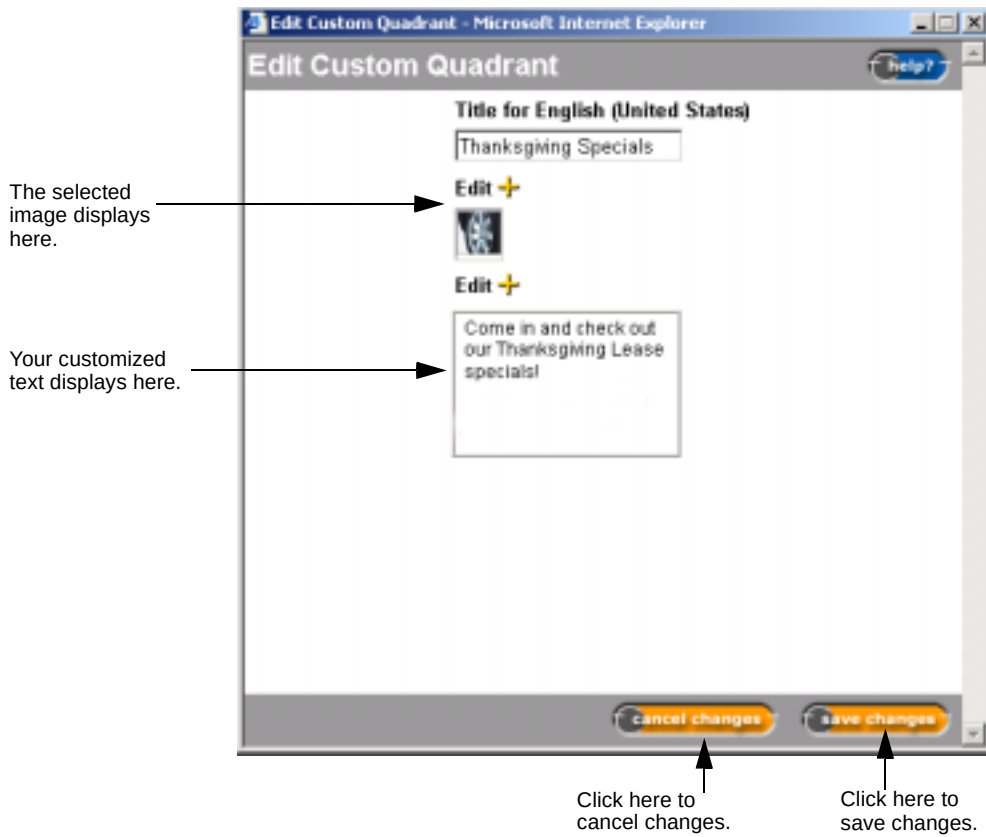

Edit Custom Quadrants

This feature allows you to edit a previously created custom quadrant and save it in the quadrants library. To edit a custom quadrant, perform the following steps:

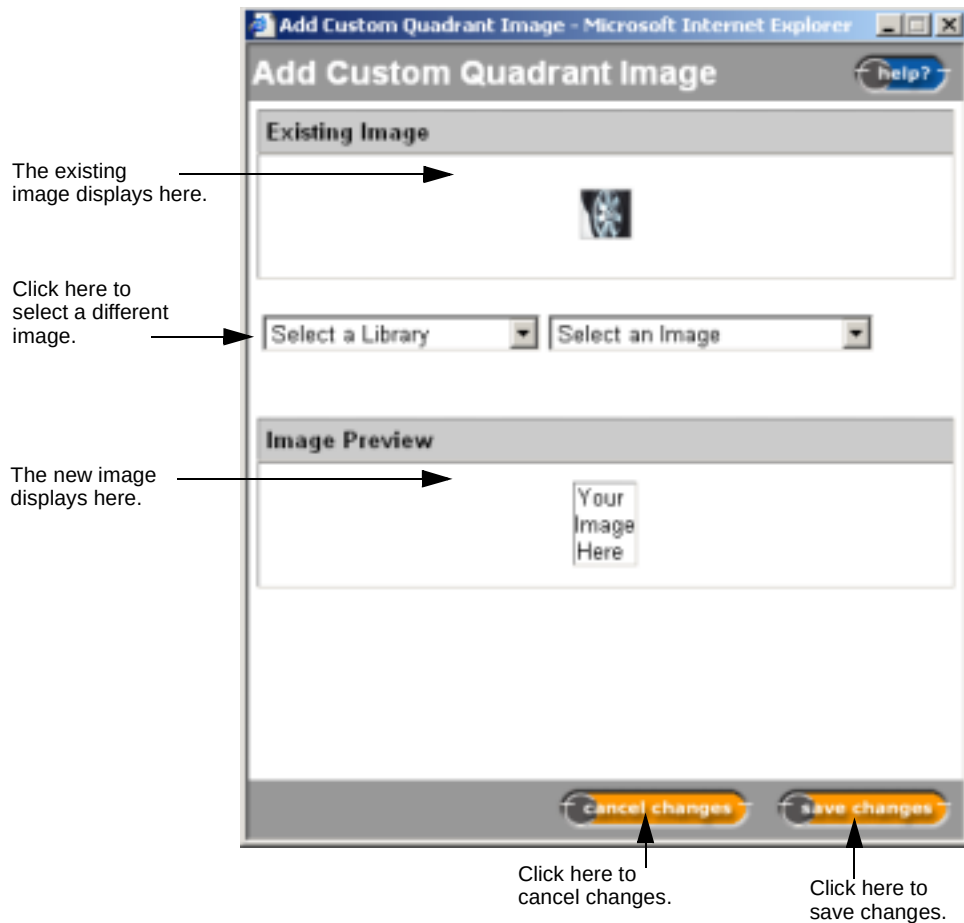

- 1 From the **Manage** drop-down menu, select **Custom Quadrants**. The Manage Custom Quadrants form displays.

- 2 Highlight the quadrant you wish to edit in the **Available Custom Quadrants** section.
- 3 Select **Edit**. The Edit Custom Quadrant form displays. This screen displays a preview of the customized quadrant, and the Title of the quadrant.

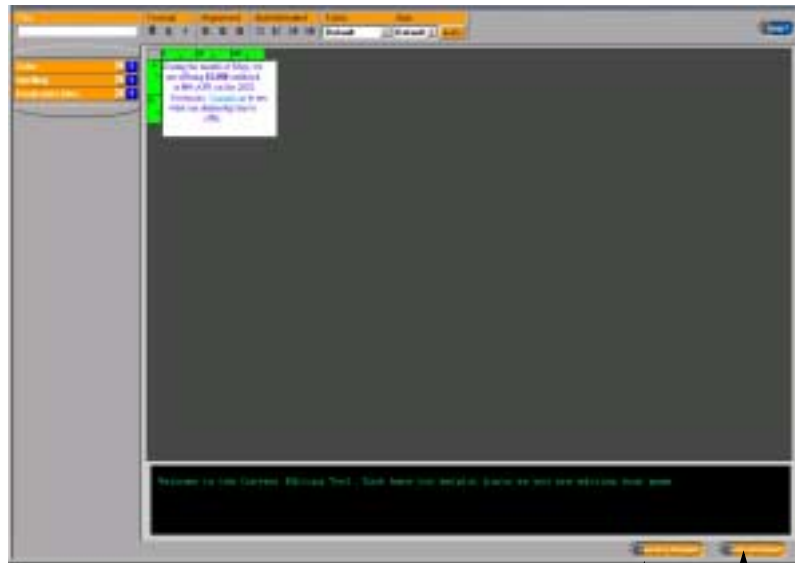

- 4 Select the **Edit** button above the image section. The Edit Custom Quadrant Image form displays.

The default image displays in the **Existing Image** area.

- 5 From the **Select an Image** drop-down, select the desired image. The selected image will display in the **Image Preview** section.
- 6 To cancel your changes, select **cancel changes**. To save your changes, select **save changes**. The Edit Custom Quadrant Image form closes and a refreshed Edit Custom Quadrant form displays.
- 7 Select the **Edit** button above the text section. The WYSIWYG Content Editor displays.

Click here to
cancel changes.

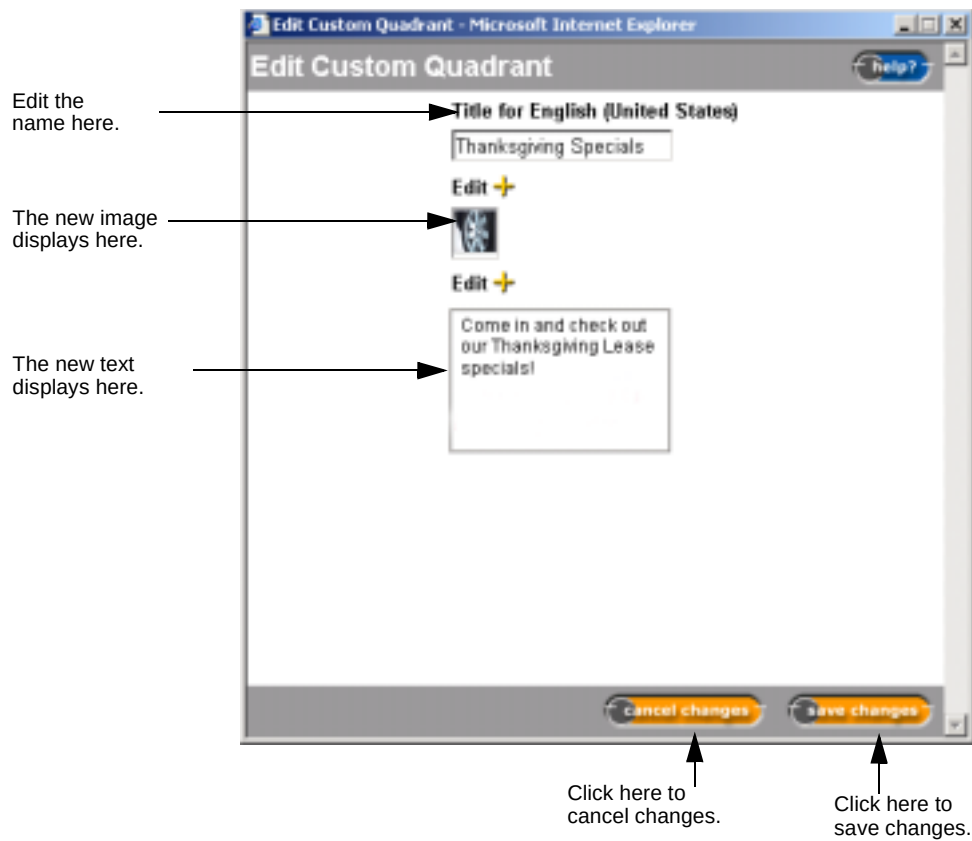

Click here to
save changes.

The following functions are available on the WYSIWYG Content Editor when working with Custom Quadrants:

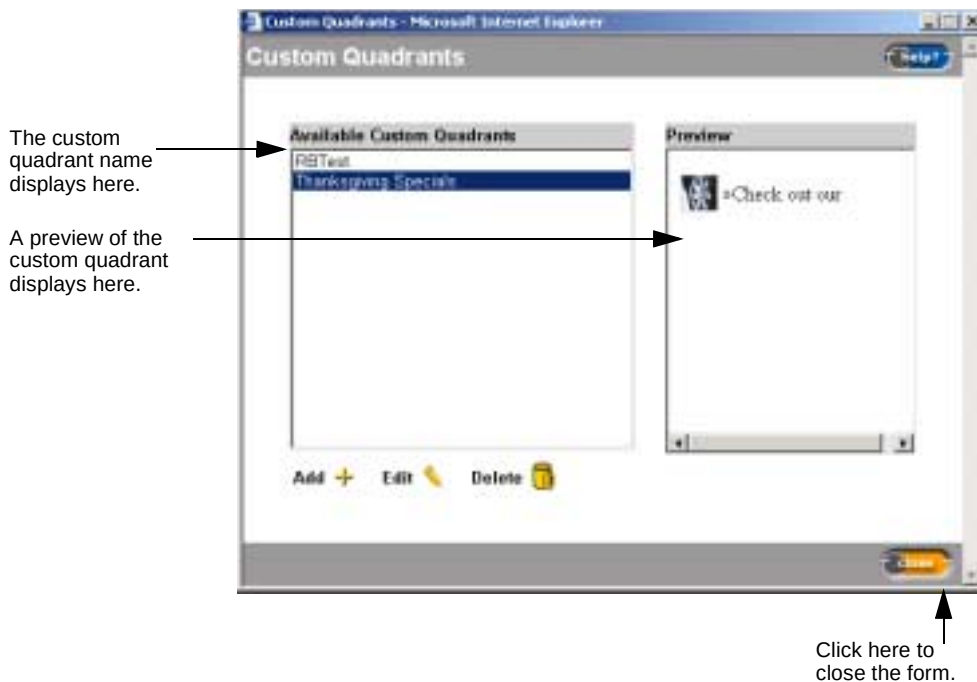

- Vertical and Horizontal Ruler (see "Text Formatting" on page 125)
- Color (see "Add Foreground and Background Colors" on page 135)
- Spelling (see "Spell Checking" on page 141)
- Email and Links (see "Add Web Page and Email Links" on page 143)
- Format (see "Text Formatting" on page 125)
- Alignment (see "Text Formatting" on page 125)
- Bullets/Indent (see "Text Formatting" on page 125)

Using the WYSIWYG Content Editor you can change and format text, add approved links to the entered text, add email links to the text, and perform a spell check of the text. For more information on the WYSIWYG Content Editor, refer to "WYSIWYG Content Editor" on page 119.

- 8 When you have finished formatting your content, select **save changes**. The WYSIWYG Content Editor closes and the refreshed Edit Custom Quadrant form displays.

- 9 In the **Title** field, modify the name for the custom quadrant, if applicable.
- 10 To cancel your changes, select **cancel changes** or to save your changes, select **save changes**. The Edit Custom Quadrants form closes and a refreshed Manage Custom Quadrants form displays.

11 Select **close**. The Manage Custom Quadrant form closes.

Display a Custom Quadrant on the Website

This feature allows you to display a custom quadrant on your site. To display a custom quadrant, perform the following steps:

- 1 Select the orange **modify** icon in the corner of the desired quadrant.

Click here to display the custom quadrant or use the **Manage** drop-down menu.

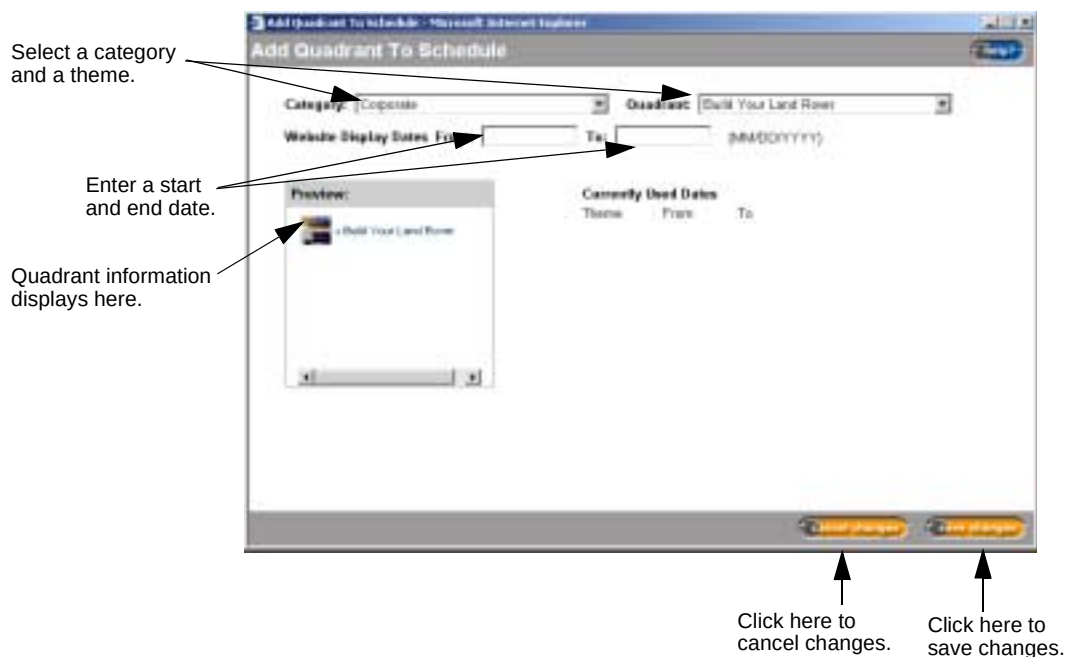

Select the **modify** icon to change a quadrant.

2 The Modify Quadrant form displays.

Click here to add a custom quadrant.

3 Select **Add**. The Add Quadrant To Schedule form displays.

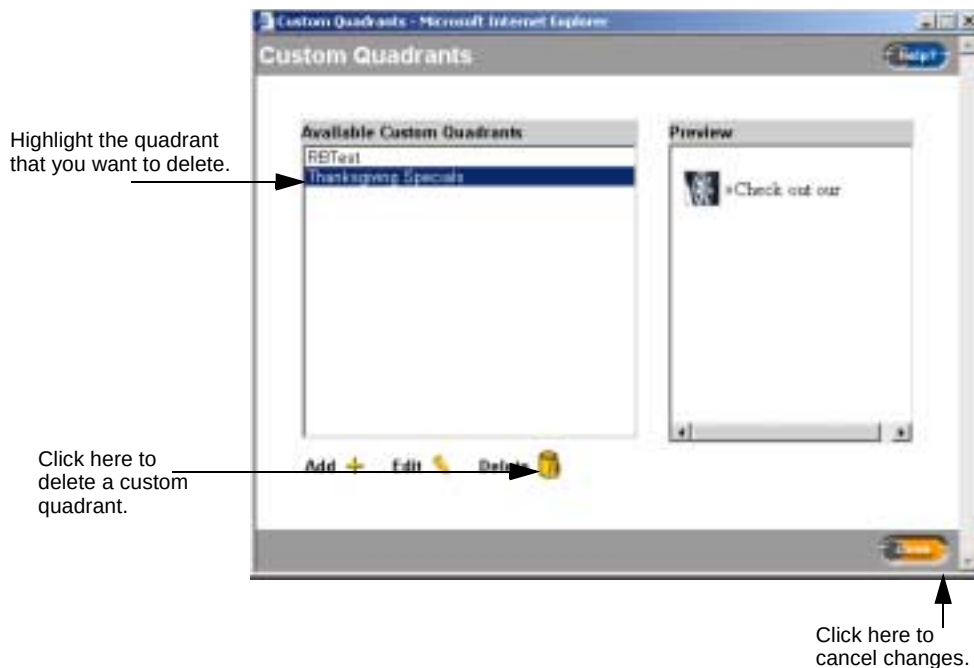

- 4 Select **Custom** from the **Category** drop-down list.
- 5 Select the desired custom quadrant from the **Quadrant** drop-down list. The information will display in the **Preview** area.
- 6 Enter a start and end date in the **Website Display Dates From** and **To** fields. The format is **MM/DD/YYYY**.
- 7 To cancel your changes, select **cancel changes** or to save your changes, select **save changes**. The Add Quadrant To Schedule form closes, and the Modify Quadrant form re-displays.
- 8 Select **close** to close the Modify Quadrant form.

Delete Custom Quadrants

This feature allows you to delete a previously created custom quadrant from the quadrants library. To delete a custom quadrant, perform the following steps:

- 1 From the **Manage** drop-down menu, select **Custom Quadrants**. The Manage Custom Quadrants form displays.

- 2 Highlight the quadrant you wish to delete in the **Available Custom Quadrants** section.
- 3 Select **Delete**. The system displays the following confirmation message: "Are you sure you want to delete the selected custom quadrant?"
- 4 To cancel the delete action, select **No** or to delete the quadrant, select **Yes**.

If **Yes** is selected, the system deletes the custom quadrant from the list of custom quadrants and from the database, closes the warning message, and refreshes the custom quadrant list in the Manage Custom Quadrants form. If you have deleted a custom quadrant from the quadrant library, which is currently used on the website, the system will replace the deleted quadrant with the default quadrant. The deleted quadrant will remain on the live site until you publish your changes. (See Publish Utility on page 114 for information on publishing changes.)

- 5 Select **close** to close the Manage Custom Quadrants form.

Manage Lead Management Preferences

The RetailerConnection utility allows you to specify the email address where you want to receive your lead data and the data format in which you want to receive the lead data.

To configure a lead management preference email address and format, perform the following steps:

- 1 Select **Lead Management Preferences** from the **Manage** drop-down list.

Select Lead Management Preferences from the Manage drop-down menu.

- 2 The Modify Lead Management Preferences form displays.

The screenshot shows the 'Modify Lead Management Preferences' form. It has a title bar that says 'Modify Lead Management Preferences - Microsoft Internet Explorer'. The form contains a text area for 'Email Address' with the value 'test@test.com' and a dropdown menu for 'Data Format' with 'Plain Text' selected. Below the form, there are two examples: 'Example 1' showing a dealership using a lead management tool (ADPs - Right Relationship 360) with email address 'sales@retailername.dealerspace.com' and format 'ADF 1.0'; and 'Example 2' showing a dealership using an email account (Microsoft Outlook) with email address 'sales@dealership.com' and format 'Plain Text'. At the bottom of the form are two buttons: 'Save Changes' and 'Cancel Changes'.

- 3 Enter the lead preference email and select an email format (either plain text or ADF 1.0). Select **save changes** to save your changes or **cancel changes** to exit.

Go To Utility

This function is located in the Utility portion of the Home page.

Click here to access the
Go To Utility.

This utility contains the following links:

- **Feed Back** - selecting this link opens the Feedback form. Refer to Feedback on page 23 for more information
- **Help** - selecting this link displays the online help. You can also access the online help by selecting the **help** button in the upper-right corner of the page.
- **Return to Gateway Page** - selecting this link returns you to the Gateway page.

Publish Utility

This feature is used to publish the content that you have created for the website. Publishing the content makes public all the changes you have made to the website. Content is not made publicly available until you save the changes you have made to the site and then select **publish my changes** in the Utility portion of the page. If you do not save your changes before you log off, the Content Management Tool will **not** store the changes to the website; they will be lost. If you save your changes before logging off, but choose not to publish them, the Content Management Tool will store the changes to the website and the next time you log on, the system will prompt you to either publish the changes and continue to the utility or continue without publishing.

If you entered a **Start** and **End** date for some of the content, the content will not be displayed on the website unless the current date falls between the **Start** and **End** date even though the changes have been published. Refer to View Published Changes by Date on page 117 for more information.

Publish Changes

Note: In order to publish changes, you must have the user role of **DC Publish**.

Content is not made publicly available until you select **publish my changes** in the Utility portion of the page.

To publish your changes, perform the following steps from the Utility portion of the page.

Click here to publish your changes.

- 1 Once you have made all of your changes, select **publish my changes**. The Publish form displays.

Publish

Are you sure you want to publish your changes? Changes will be visible on your public site.

Click here to cancel the publish action.

Click here to publish your changes.

- 2 To publish your changes, select **Yes**. The Home page re-displays. Changes will now be visible on your website.
- 3 To cancel the publish action, select **Cancel**. The Home page re-displays. The system will retain your changes, but they will not be published. If you decide that you want to delete your changes, refer to Delete Changes on page 116.

Delete Changes

If you decide that you do not wish your changes to be made public, you can use this feature to delete the changes.

To delete your changes, perform the following steps from the Utility portion of the page.

Click here to cancel
your changes.

- 1 Select **delete my changes**. The Delete form displays.

Delete

Are you sure you want to delete your changes? This will delete all changes you've made since the last time you've published your site.

Click here to cancel
the delete action.

Click here to delete
your changes.

- 2 To cancel the delete action, select **Cancel**. The Home page re-displays.
- 3 To delete your changes, select **Yes**. The Home page re-displays. All changes you have made since the last time you published your site will be deleted.

View Published Changes by Date

This function allows you to set a date to preview how your site will look on a certain date. For example, if you set up a theme to run for a certain weekend, you can enter that theme's start date and press **Enter**. The system will display what your site will look like on that particular date. If you entered a **Start** and **End** date for some of the content, the content will not be displayed on the website unless the current date falls between the **Start** and **End** date even though the changes have been published. The light grey area on the screen contains the Preview utility.

Use this section to view the site by date.

To view the website on a specified date, perform the following steps from the light grey area in the Utility portion of the page.

Enter the date you want to preview here.

Click here to view the modify icons on the site.

Click here to hide the modify icons and view the site as it will be displayed to visitors.

- 1 Enter the date which you would like to preview in the **Preview Date** field. The format is **MM/DD/YYYY**.

- 2 Press the **Enter** key on your keyboard. The system will display the website as it will look on the date entered.
- 3 To view the modify icons on the site, select **modify**. This is a toggle button.
- 4 To view the site as it will appear to your customers (i.e., without the modify icons), select **preview**. This is a toggle button.

Select the **modify** icon to change a quadrant.

Chapter 4

WYSIWYG Content Editor

This chapter focuses on steps you need to take to successfully build great, customized pages for your website that reflect your retailer store's unique service offerings.

Required actions:

- Modify page titles (page 124)
 - Format text (page 125)
 - Set default content (page 126)
 - Replace with Brand Content (page 129)
 - Create Other Versions of a WYSIWYG Page (page 131)
 - Go To Other Versions of a WYSIWYG Page (page 133)
 - Modify colors (page 135)
 - Add images (page 139)
-

-
- Check spelling (page 141)
 - Add Web and Email Links (page 143)
 - Create tables (page 155)

WYSIWYG Content Editor Overview

Note:

Content is not made publicly available until you select the **publish my changes** button on the Home page.

The WYSIWYG Content Editor - (What You See Is What You Get) allows you to edit the content and images on many of your website pages. This feature allows you to create great looking web content without requiring knowledge of HTML or other programming languages. The functions of this tool include text formatting, adding foreground and background colors, creating tables, adding images, and adding links for web pages and email addresses. To help you manage the content entered in the pages, the tool also has a built-in utility that allows you to check the spelling and to check the start and end dates on the web pages.

The WYSIWYG Content Editor can be used to modify the following pages:

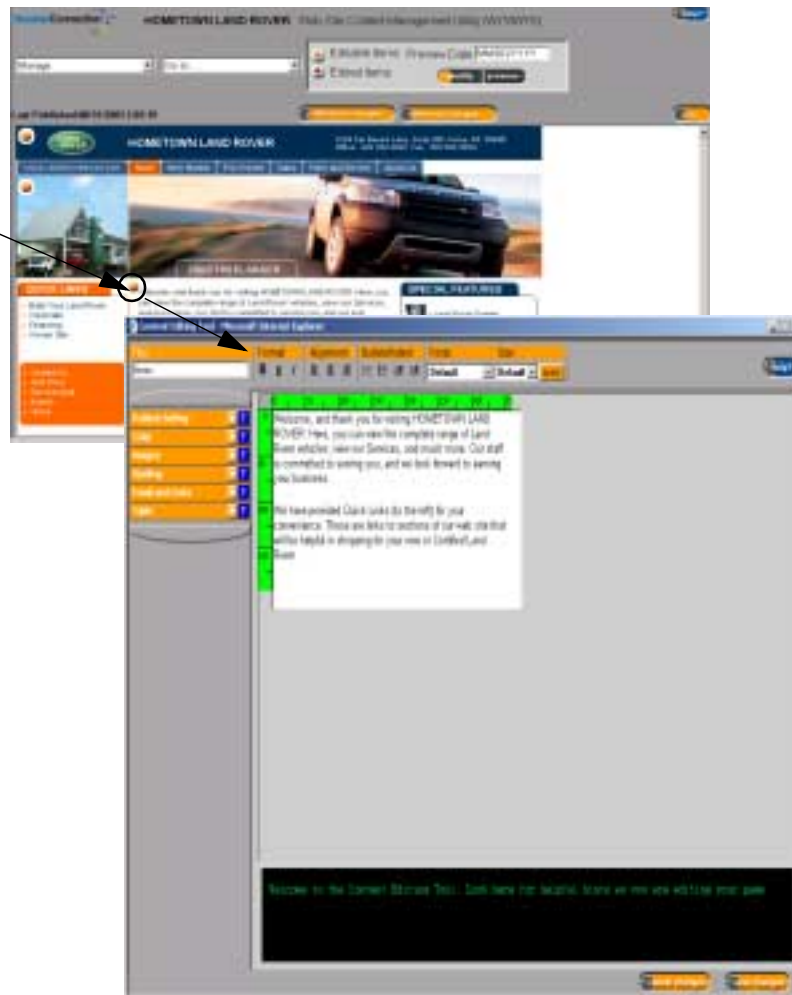

- Home
 - Main Home Page
- New Models
 - Custom Web Page
 - Wauname: The Voyage
- Pre-Owned
 - Custom Web Page(s)
 - Wauname: The Voyage
- Sales
 - Main Sales Page
 - Hours
 - Custom Web Page(s)
 - Wauname: The Voyage
- Parts and Services
 - Main Parts and Services Page
 - Kit (Accessories)
 - Hours
 - Custom Web Page(s)
 - Wauname: The Voyage
- About Us
 - Main About Us Page
 - History/Overview of the Dealership
 - Our People
 - Hours

-
- GEAR (Merchandise)
 - Events
 - Custom Web Page(s)
 - Wauname: The Voyage

You can either save your changes as you use each feature on the WYSIWYG Content Editor by selecting the **save changes** button or you can continue making changes using the other features and then save your changes once you are finished. It is recommended that you save your changes frequently to ensure you do not lose any information (i.e., due to a power failure, system failure, etc.).

The WYSIWYG Content Editor is accessed by selecting the edit icon on the page. In the following example, the edit icon for the Home page is selected.

Select the edit icon
on the page you
would like to modify.

Select the page edit icon to change text, add a graphic, or add links.

The white area of the WYSIWYG Content Editor is the preview page. This area will display what your page will look like as you modify the content. Along the bottom, you will see a black area. This is the message area. It displays when spell check is complete. It also displays if there are any errors with the links. And, it will inform you if you attempt a step incorrectly. For example, in order to add a table, you need to select a position with your cursor within the white area of the page. If you do not, a message will display in the message area stating that the system was unable to add the table because a position was not selected in the page.

The WYSIWYG Content Editor can be used to perform the following functions:

-
- Modify page titles (page 124).
 - Format text (page 125).
 - Edit publish settings (page 126).
 - Add foreground and background colors (page 135).
 - Add images (page 139).
 - Check spelling (page 141).
 - Add web page and email links (page 143).
 - Add tables (page 155).

Modify Page Titles

Tip:

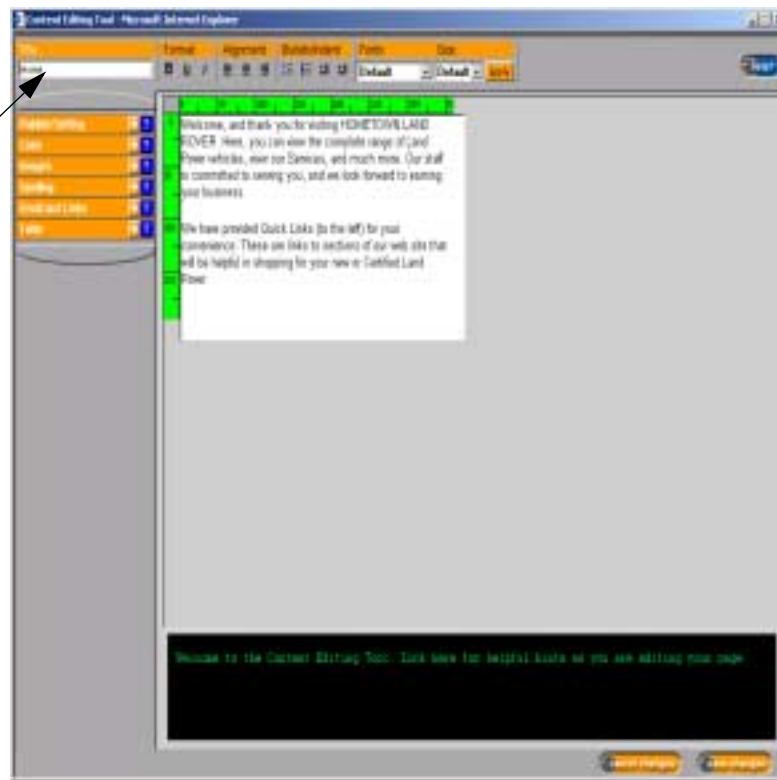

Make sure you modify the title on any custom page that you create; otherwise, the title of the page will display as "Custom Web Page".

When you begin editing a page, you have the option of keeping the existing page title or changing the title to a name you specify.

To modify the page title, perform the following steps (the following is an example of modifying the title of the Home page).

- 1 Select the edit icon in the main content area of the page. The WYSIWYG Content Editor form displays.
- 2 Enter a title for the page in the **Title** text box in the upper left-hand corner of the page. The title should be descriptive of the content within the page and sub-pages.

Modify the title of the page here.

Enter a title for the page. The title should be descriptive of the content within the page and sub-pages.

- 3 To cancel your changes, select **cancel changes**.
- 4 To save your changes, select **save changes**. The new title and page you created will now display on the website.

Text Formatting

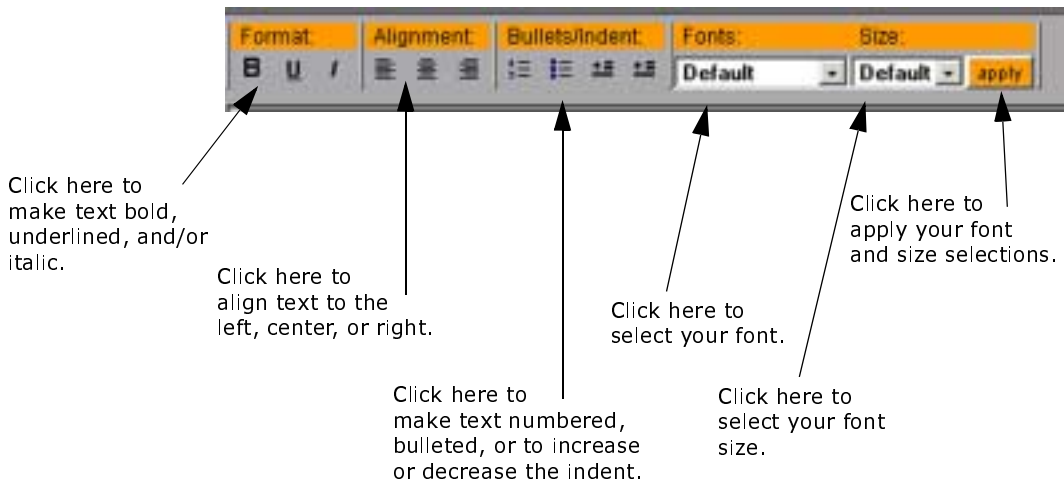

Tip:

Consider page layout consistency. For example, use the same font throughout the site with font changes (i.e., italics) to emphasize sentences or words. Use the underline feature sparingly as underlined text on a web page usually denotes a link.

Text formatting allows you to change the way text is displayed on your website. The available text formatting options are:

- Format
- Alignment
- Bullets/indents
- Font
- Size

These options are located along the top of the WYSIWYG Content Editor:

Use the text formatting tool to change the way text is displayed on your site.

Tip:

Text formatting can be applied before you start entering text by selecting the text formatting before entering the information.

To format the text on a page, perform the following steps:

- 1 Select the edit icon on the desired page.
- 2 Highlight or enter the text you would like to modify and make your selections on the text formatting bar along the top of the tool. You will see the text change after selecting the formatting. **Note:** if you are changing the **Fonts** or **Size**, select **apply** to apply your changes.
- 3 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Set Default Content

This feature allows you to set up default content for pages in the website to display whenever a custom page is not currently running (a custom page is used to publicize special promotions that run for a limited time). For example, on Monday, you can create an advertisement for a new vehicle sale that starts on Friday and ends on Sunday. Original default content is provided by RetailerConnection. This text can be modified using the **Publish Settings** tool. The modified text can then be set to be the default text. However, if you select **Delete** in the **Publish Settings** tool, the original default content provided by RetailerConnection will re-display. You should initially set up the default content to ensure the web page has relevant content at all times.

To create default content on an existing page, perform the following steps from the Utility portion of the page.

Click here to access the Publish Setting feature.

Click here to select the month and year.

Use either of these features to select the start and end dates.

Click here to make the page/content default.

Click here to create or delete default content.

Click here to cancel your changes.

Click here to save your changes.

Note:

If you decide at a later date to delete this new content, the original default content will re-display.

- 3 If you would like to delete the existing default content, you can select **New**. The page will become blank, and you will need to enter new content (for more information on entering text, refer to Text Formatting on page 125). Or you can highlight the existing text and press the **Delete** key on your keyboard.
- 4 If you would like to delete the existing page, select **Delete**. If default content remains, you need to highlight the content and press the **Delete** key on your keyboard.
- 5 Use the drop-down lists or arrows to select the desired month and year.
- 6 To select the start and end date, you can use either of the following methods:
 - Using the calendar, select the start date by left-clicking your mouse. Select the end date by right-clicking your mouse.
 - Using the **Day**, **Month**, and **Year** text boxes, enter the day, month, and year. The format is **MM/DD/YYYY**.
- 7 To make the page and its content a default page, select **Set as Default**.
- 8 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Replace with Brand Content

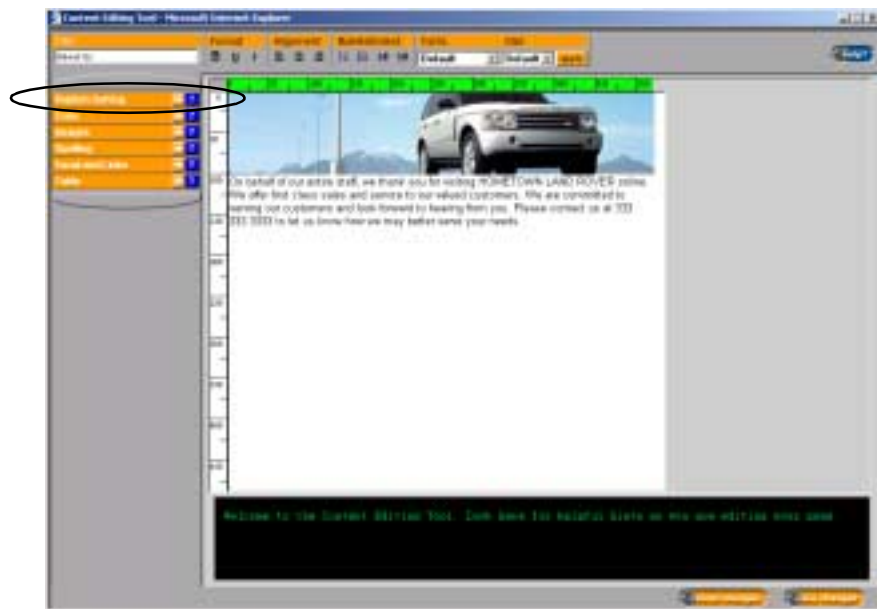

Warning:

By selecting this feature, you will be **replacing** your existing content with the brand content. Your original content will no longer be available.

This feature allows you to replace your existing content with the original brand content provided with your site. Once you have selected this function, the system replaces the current content with the original brand content; the replaced content will no longer be available. You can revert to brand content using the **Publish Settings** tool.

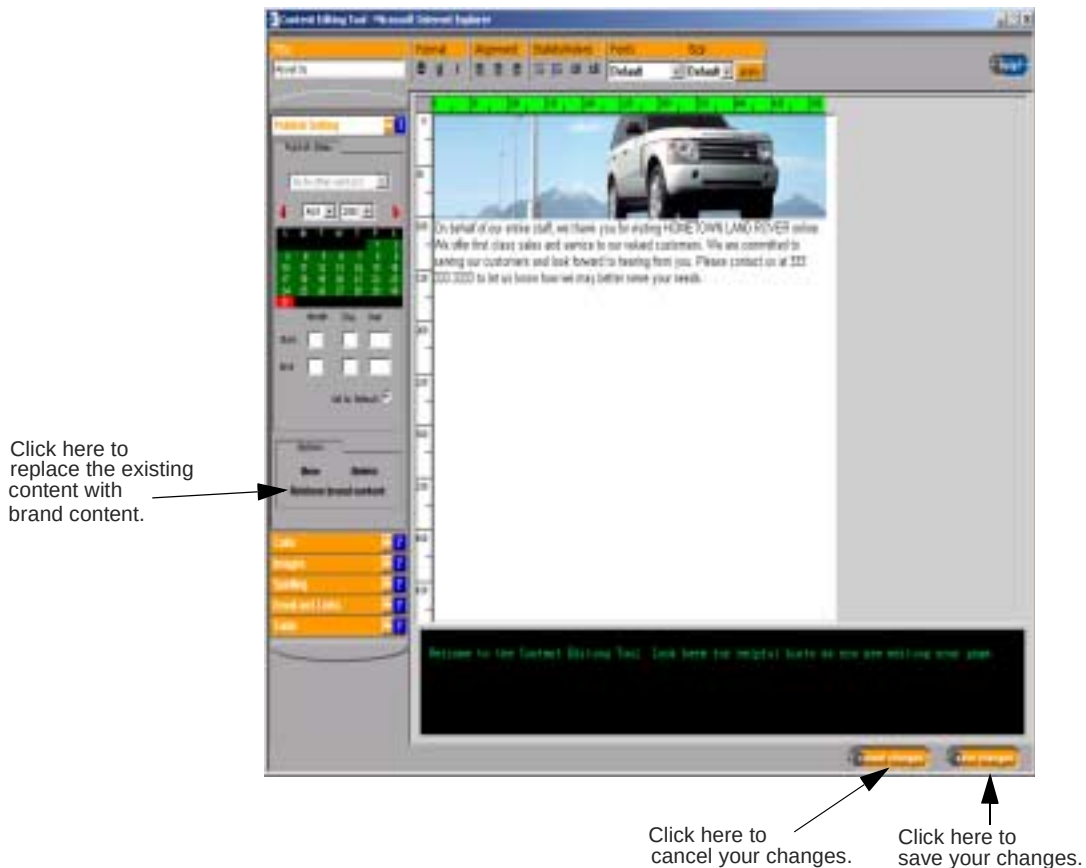

To replace your content with the brand content on a page, perform the following steps from the Utility portion of the page.

- 1 Select the edit icon on the page. The WYSIWYG Content Editor form displays.

Select Publish Settings to replace your content with brand content for your page.

- 2 Select **Publish Settings**. The Publish Settings form displays.

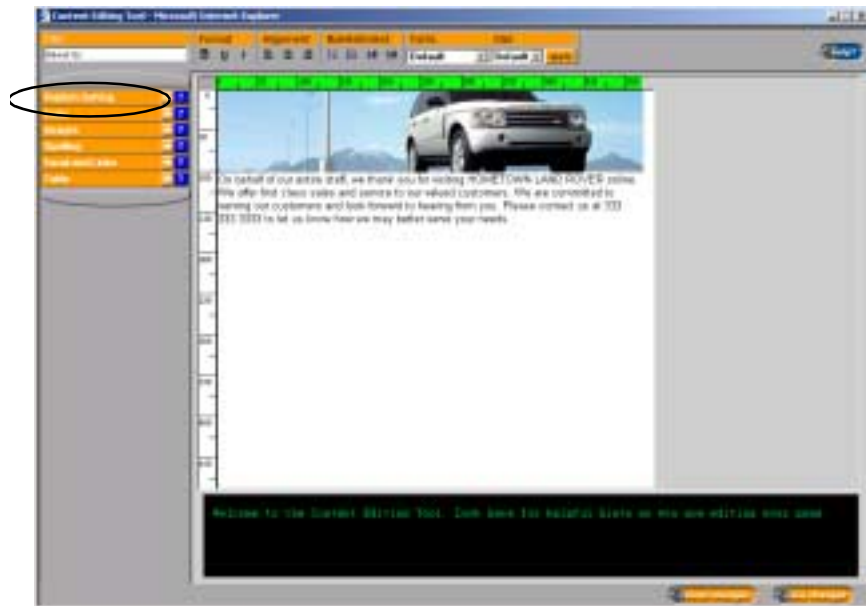

- 3 Select **Retrieve Brand Content**. The system will replace the current content with the original brand content.
Remember: once you have selected this function, whatever content you have replaced will no longer be available. If you would like to revert back to that content, you will need to recreate it.
- 4 Use the drop-down lists or arrows to select the desired month and year that you would like the brand content to display.
- 5 To select the start and end date, you can use either of the following method:
 - Using the calendar, select the start date by left-clicking your mouse. Select the end date by right-clicking your mouse.
 - Using the **Day**, **Month**, and **Year** text boxes, enter the day, month, and year. The format is **MM/DD/YYYY**.
- 6 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Create Other Versions of a WYSIWYG Page

This feature allows you to set up different versions of content for pages in the website. For example, on your Home page, you can create an advertisement for a new vehicle sale that starts on Friday and ends on Sunday. Then you can create content for your Home page that encourages your visitors to check out your Pre-Owned Vehicles page to display the following week. This feature lets you build out your pages similar to how you build out your themes on your site.

To create a different version of content on an existing page, perform the following steps from the Utility portion of the page.

- 1 Select the edit icon on the page. The WYSIWYG Content Editor form displays.

Select Publish Settings to create different versions of your page.

- 2 Select **Publish Settings**. The Publish Settings form displays.

Click here to access the Publish Setting feature.

Click here to select the month and year.

Use either of these features to select the start and end dates.

Click here to make the page/content default.

Click here to create the new content.

- 3 Select **New**. The page will become blank, and you will need to enter new content (for more information on entering text, refer to "Text Formatting" on page 125).

Note: **Set As Default** is automatically selected once you click **New**. If you do not wish to make this page your default page, you will need to enter a start and end date. Proceed to step 4.

If you would like this page to be your default page, do not enter any dates and proceed to step 6. **Note:** If you decide to keep this new page as the default page, any previous default page you have created will be overridden and will not be retrievable. If you would like to keep the information on your original default page, you must first go to that page **before** you create the new detailed page, enter a start and end date, and save your changes. That page will now be a version of your page. Then you can go into a new page, create your new default content and save it as the new default page. For more information on default content, refer to "Set Default Content" on page 126.

- 4 Use the drop-down lists or arrows to select the desired month and year that you would like this content to display.
- 5 To select the start and end date, you can use either of the following methods:

-
- Using the calendar, select the start date by left-clicking your mouse. Select the end date by right-clicking your mouse.
 - Using the **Day**, **Month**, and **Year** text boxes, enter the day, month, and year. The format is **MM/DD/YYYY**.
- 6 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

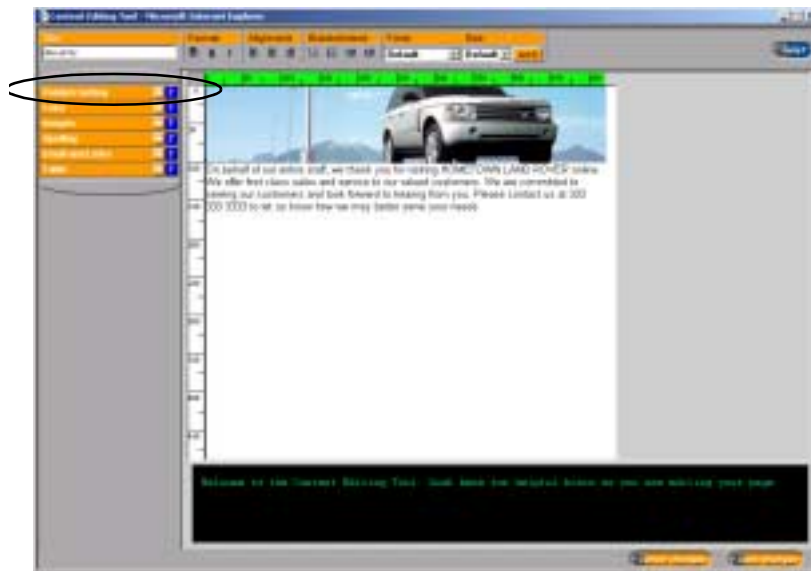

The system updates the content, closes the Content Editing Tool, and displays a preview of the new content. If you want to view the different versions of the page, use the View Published Changes By Date feature. For more information, refer to "View Published Changes by Date" on page 117 or the Go To Other Versions feature (refer to "Go To Other Versions of a WYSIWYG Page" on page 133).

Go To Other Versions of a WYSIWYG Page

This feature allows you to view the different versions of content you have created for pages in the website.

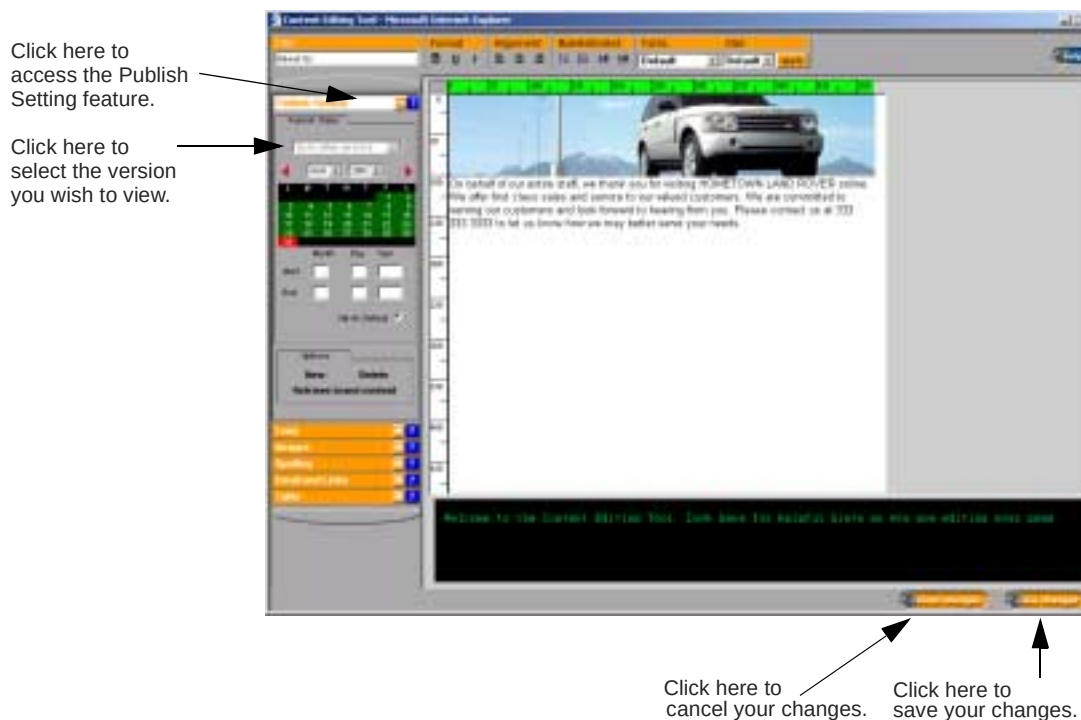

To view a different version of content on an existing page, perform the following steps from the Utility portion of the page.

- 1 Select the edit icon on the page. The WYSIWYG Content Editor form displays.

Select **Publish Settings** to view different versions of your page.

- 2 Select **Publish Settings**. The Publish Settings form displays.

-
- 3 Select the desired version from the **Go to other versions** drop-down menu.

The system displays a confirmation message asking if you would like to edit the content.

- 4 Click **OK**.

The system displays a confirmation message asking if you would like to save any changes made to the current document.

- 5 Click **OK**.

- 6 The system displays the selected version. You can then choose to modify the content. For more information on entering text, refer to "Text Formatting" on page 125.

- 7 If you would like to modify the dates, use the drop-down lists or arrows to select the desired month and year that you would like this content to display.

- 8 To select the start and end date, you can use either of the following methods:

- Using the calendar, select the start date by left-clicking your mouse. Select the end date by right-clicking your mouse.
- Using the **Day**, **Month**, and **Year** text boxes, enter the day, month, and year. The format is **MM/DD/YYYY**.

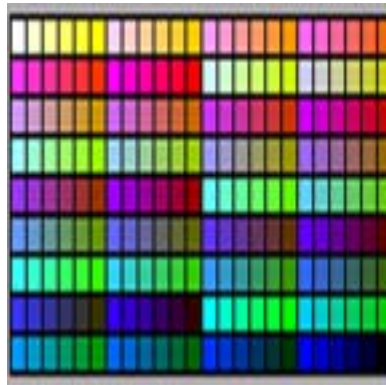

- 9 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

The system updates the content if necessary, closes the Content Editing Tool, and displays a preview of the selected version. If you would like to view the different versions of the page, use the View Published Changes By Date feature. For more information, refer to "View Published Changes by Date" on page 117.

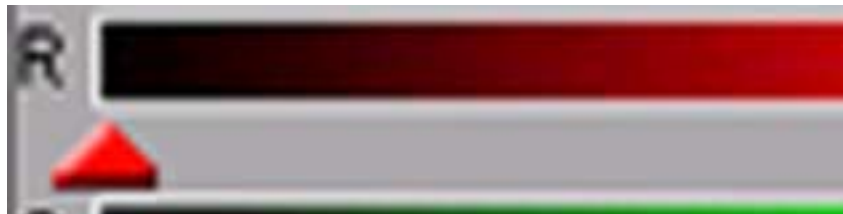

Add Foreground and Background Colors

Use this feature to change the foreground or background color on text. For example, this feature is helpful when you are trying to customize your page to match your retailer colors or when you are trying to match the heading navigation colors. This utility provides three options for entering a color selection:

- A color grid for quick color selection. With this method, you place your cursor on the desired color. The Foreground/Background icon will display a larger view of the color. In order to apply the color, you must click **Apply**. The following is an example of the color grid.

- A color spectrum for custom color selection. With this method, you click the arrow on the spectrum and slide it to the left or the right to determine your color. The Foreground/Background icon will display a larger view of the color. In order to apply the color, you must click **Apply**. The following is an example of the spectrum.

- A hexadecimal color code text box. This method is most commonly used by web developers or advanced users who want to achieve an exact color match. With this method, you enter the hexadecimal color code for the color you wish to have displayed. Using hexadecimal color codes allows you to mix your own custom colors by allowing you to specifying how much red, green, and blue light should be mixed into each color. Following is a list of codes for each component:

Tip:

Ask your web Developer to provide hex value of colors to match your other websites or signage.

- FF means full brightness
- CC means 80 percent brightness
- 99 means 60 percent brightness
- 66 means 40 percent brightness
- 33 means 20 percent brightness
- 00 means none of this color component

For a very handy chart showing the 216 most commonly used hexadecimal color codes, along with the colors they create, go to <http://24hourHTMLcafe.com/colors> and click

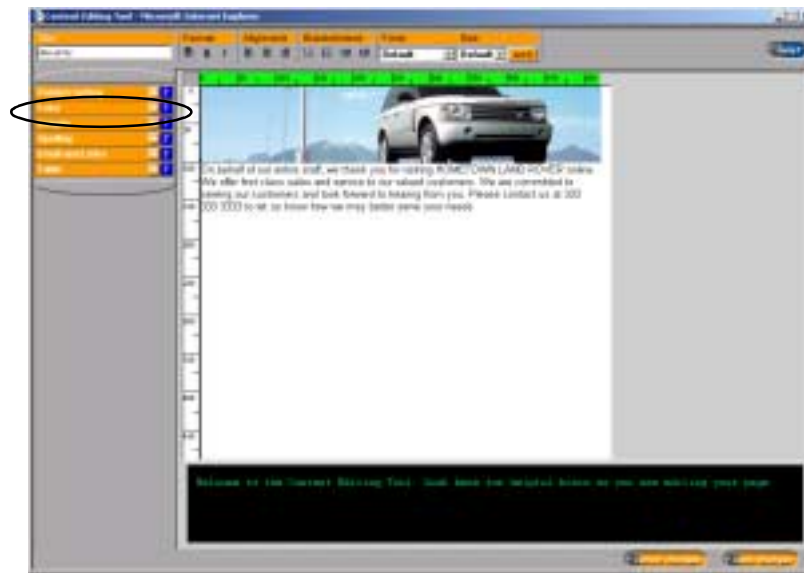

the Color Code Reference. Keep in mind that even though you can specify millions of different colors, some computers are set to display only the 16 standard colors (black, white, red, green, blue, yellow, magenta, cyan, purple, gray, lime, maroon, navy, olive, silver, and teal). Other computers only reliably display the 216 colors in the color code reference. All others will be approximated by dithered patterns, which can make text look messy and difficult to read. The following is an example of the hexadecimal color code text box.

Hex
ffffff

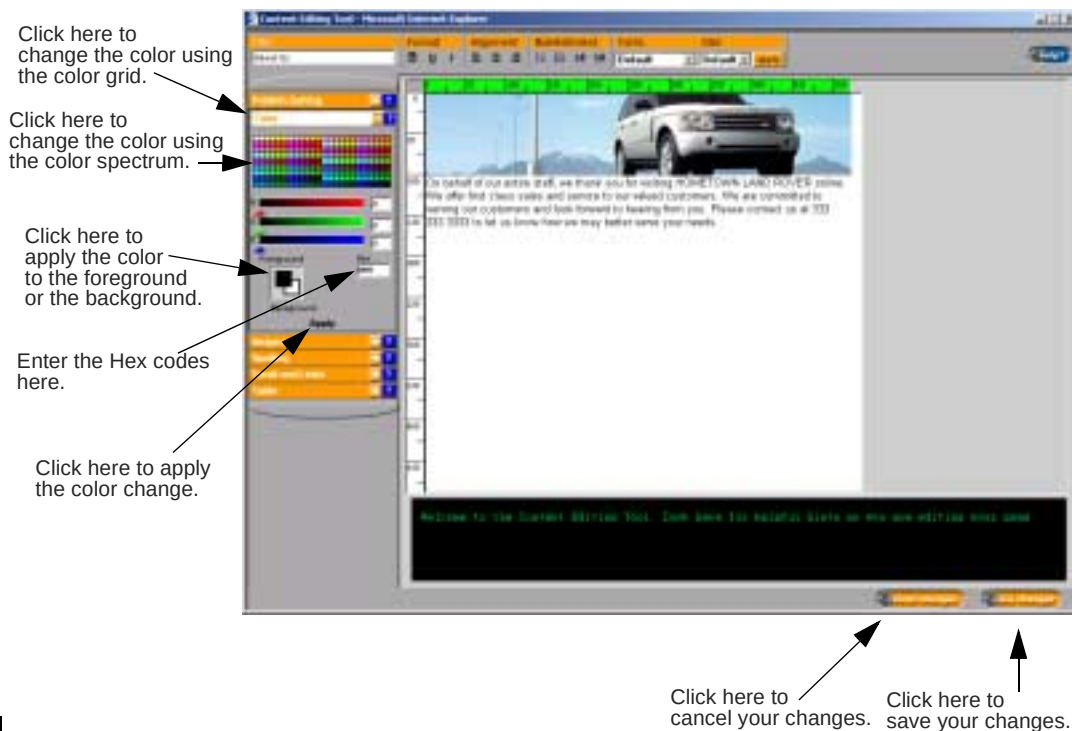

To add or modify foreground/background color, perform the following steps:

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

Select Color to change the foreground/background color on text.

- 2 Select **Color**. The Color form displays.

Tip:

You can apply color changes before entering the text.

- 3 Select either the foreground or background button .
 - The upper left-hand box selects the foreground color option.
 - The lower right-hand box selects the background color option.
- 4 Highlight the text whose color you would like to modify.
- 5 Select the color you want to apply using either the grid, spectrum, or Hex codes.
- 6 Select **Apply**.
- 7 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Add Images

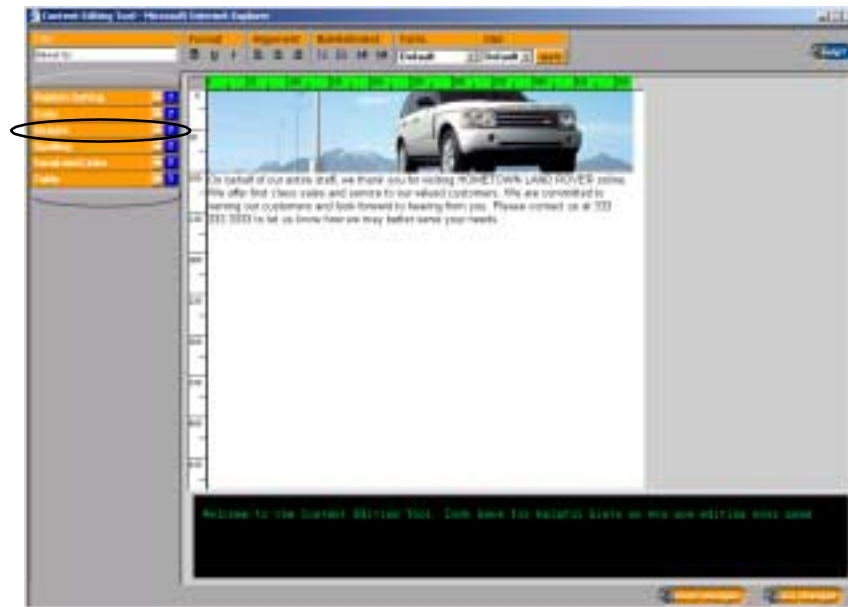

Tip:

When emailing images, it is recommended that the image size be 390 x 150 pixels.

Use this feature to add images to your website. Photos and icons can be added to the page being edited. This feature contains a pre-set image library. If you would like to add an image, you will need to send the image to the following email address: retailerconnection@channelnet.com When the image is approved, a new category will be created called "Your Retailer Images" which will contain all of your customized retailer images. The pictures may be cropped for size allotment.

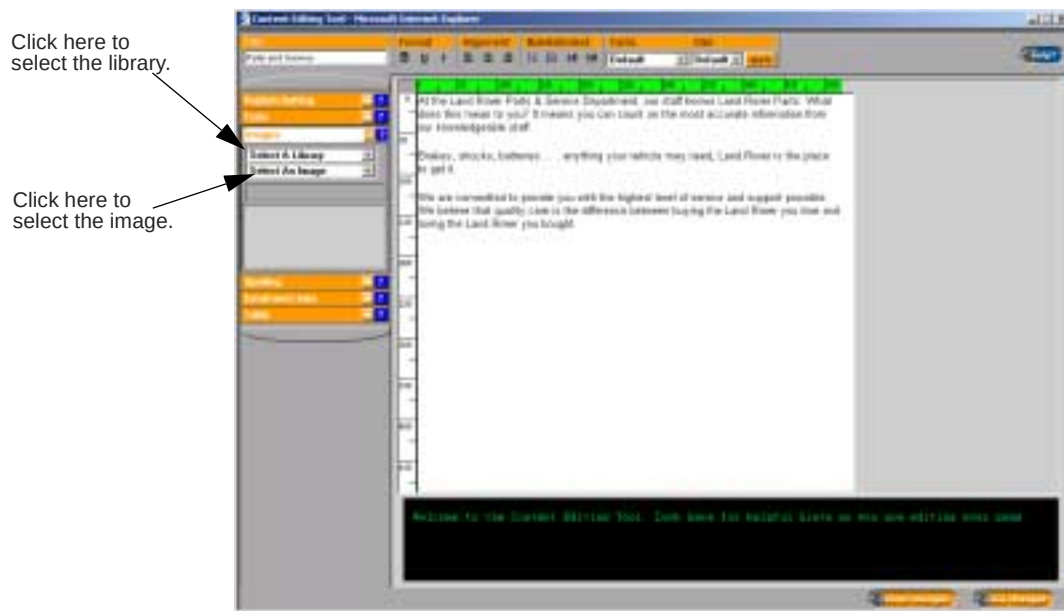

To add an image, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

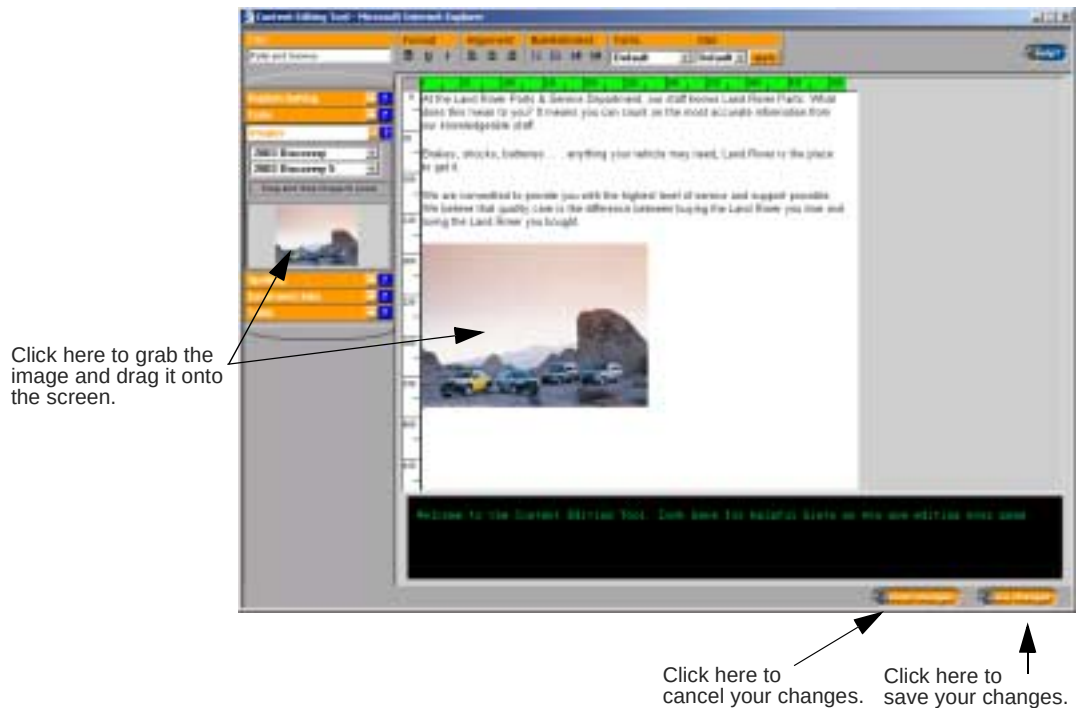

Select Images to add images to your page.

- 2 Select **Images**. The Images form displays.

- 3 Select a library from the **Select A Library** drop-down list.
- 4 Select the desired photo from the **Select An Image** drop-down list. A thumbnail image will display below the drop-down list.
- 5 Click on the thumbnail image and drag it to the desired position in the text area of the tool.

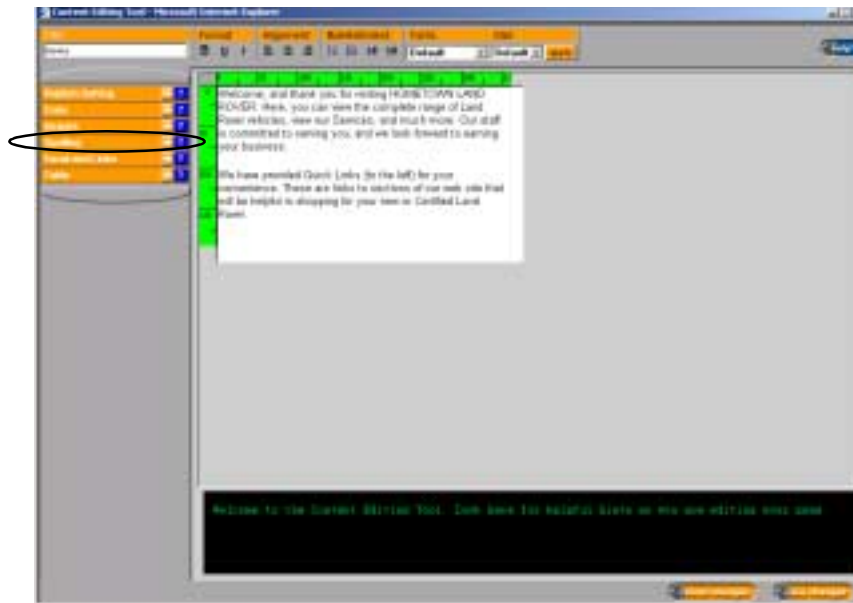

- 6 Use the **Alignment** tool to align the image on the left, center, or right portion of the page (for more information on the Alignment tool, refer to Text Formatting on page 125).
- 7 Use the image handles to determine the size of the image. Using the image handles will prevent the image from becoming skewed.
- 8 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Spell Checking

Use this feature to check the spelling entered in the text area of the page.

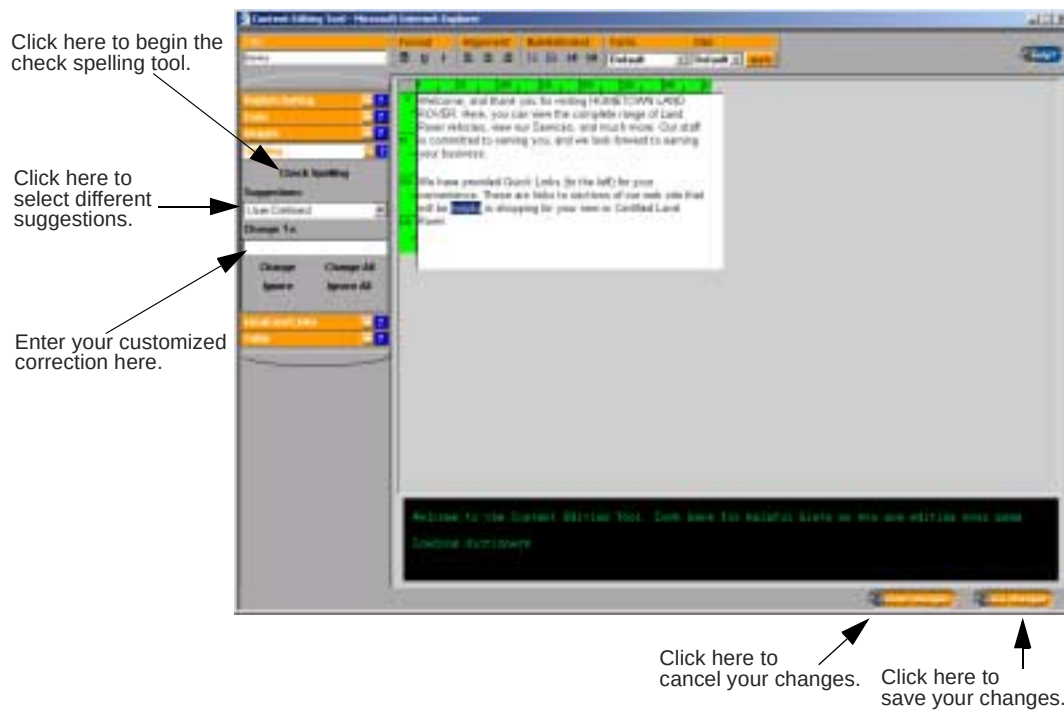

To check the spelling on your page, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

Select **Spelling** to check the spelling on your page.

2 Select **Spelling**. The Spelling form displays.

3 Select **Check Spelling** to begin checking your text.

The black message area will let you know that the system is loading the dictionary. If the system detects a misspelled word, it will display in the **Suggestions** drop-down list.

- If you agree with the suggestion in the **Suggestions** drop-down list, select **Change** (or **Change All** if you know there are several occurrences of the word).
- If you do not agree with the suggestion, but think the word is incorrect, click the **Suggestions** drop-down arrow, highlight the correct suggestion, and select **Change** (or **Change All** if you know there are several occurrences of the word).
- If you cannot find the appropriate suggestion in the **Suggestions** drop-down list, select **User Defined**. Then enter your own correction in the **Change To** text box and select **Change** (or **Change All** if you know there are several occurrences of the word).
- If you feel the word is correct, select **Ignore** (or **Ignore All** if you know there are several occurrences of the word).

When the system is finished spell-checking the document, the fields and buttons on the Spelling tool will become grey, and the black message area will display the message that the Spell Check is complete.

- 4 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Add Web Page and Email Links

This feature is where third party approved links can be selected to display on your site. A new category called "Retailer Store" will contain all approved links (for more information on link status, refer to "Manage External Links" on page 55). You can also use this feature to add email links and local links (which are links that direct the visitor to a different page on your website). Using links can enhance traffic within the website. For example, adding a link to your Pre-Owned Vehicles page throughout the website can promote pre-owned vehicle sales.

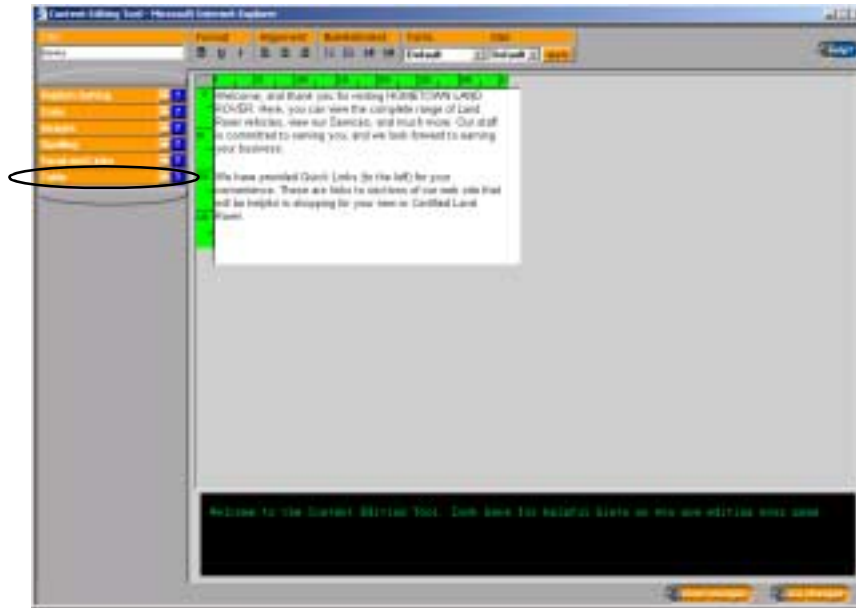

Add Email Links

You can use this feature to add multiple email addresses throughout the website. For example, you can add multiple

email addresses for the Parts and Services Department throughout the website to make contacting the department easier for the visitor.

To add an email link to your site, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

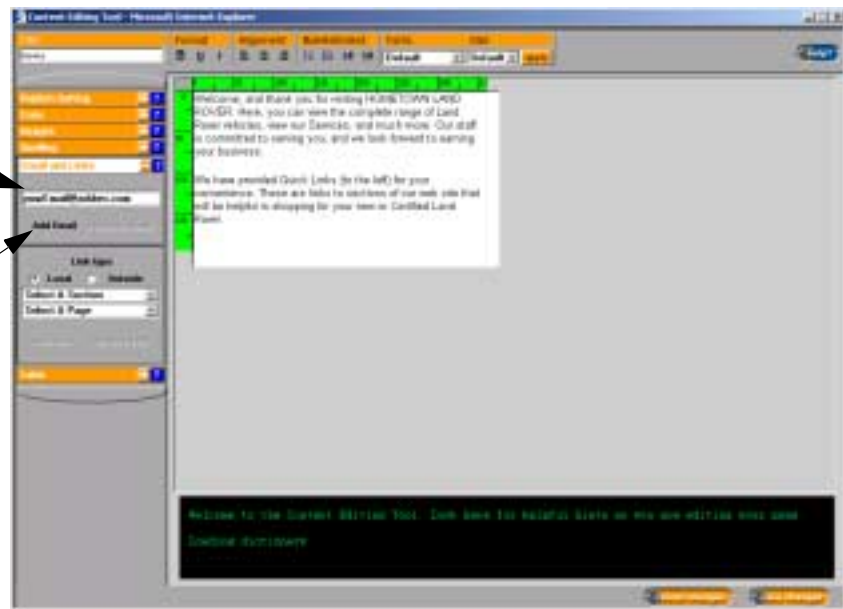

Select Email and Links to add links to your site.

- 2 Select **Email and Links**. The Email and Links form displays.

Enter the email address here.

Click here to add the email address.

Click here to cancel your changes. Click here to save your changes.

- 3 On the right portion of the tool, enter and highlight the text that you would like to become an email link.
- 4 In the text box, enter the external email address for the link.
- 5 Select **Add Email**. The text will become a link on the right side of the tool.
- 6 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

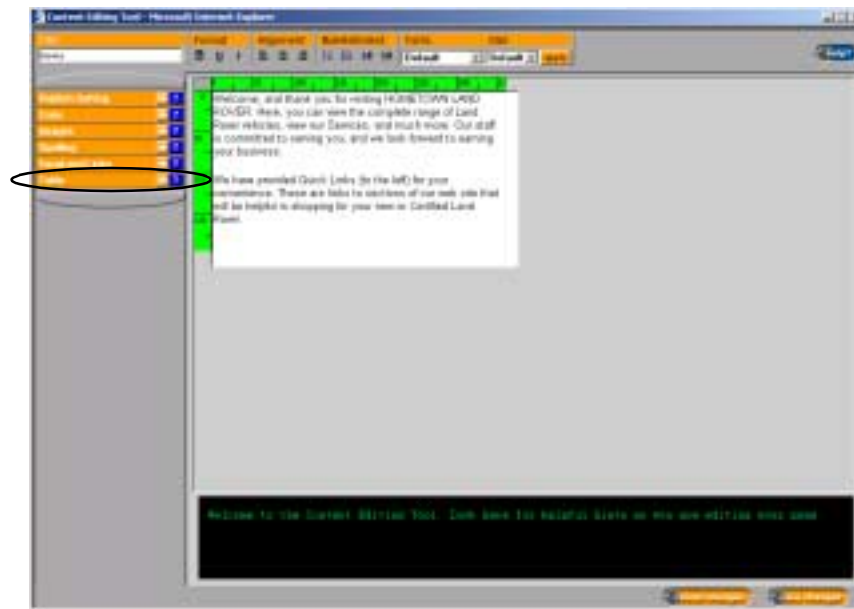

Note:

The delete action will only remove the link. If you would like to remove the text as well, you will need to highlight it and press the **Delete** key or **Backspace** key on your keyboard.

Delete Email Links

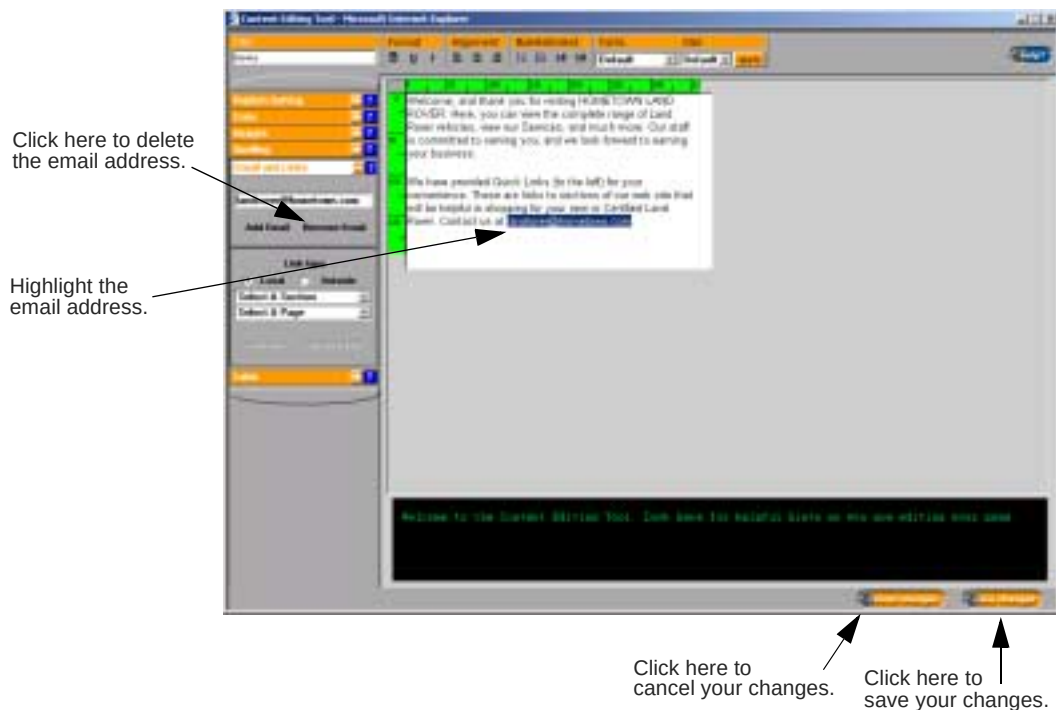

To delete an email link from your site, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

Select **Email and Links** to add links to your site.

- 2 Select **Email and Links**. The Email and Links form displays.

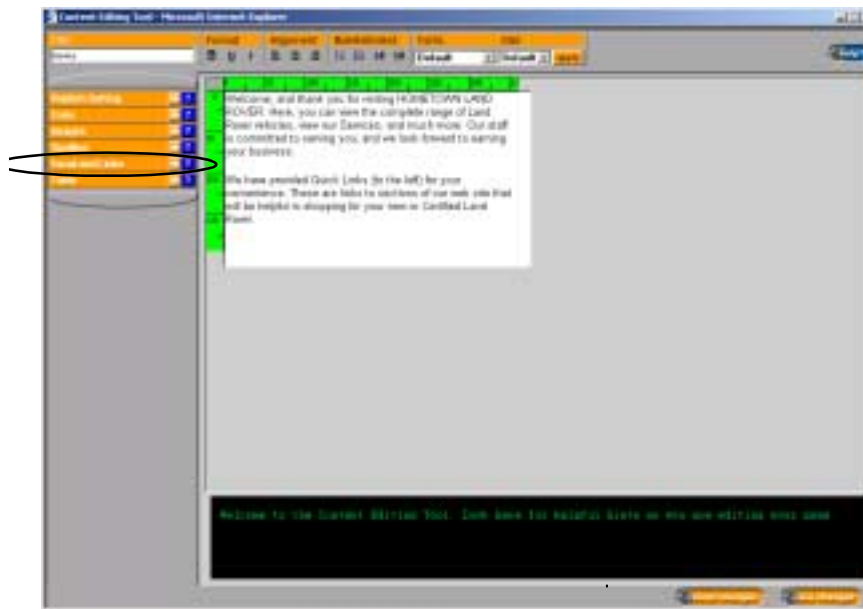

- 3 On the right portion of the tool, highlight the link that you would like to delete.
- 4 Select **Remove Email**. (The system does not ask for verification to proceed with the remove action. You will need to re-add the link if you would like to use it again. Refer to "Add Email Links" on page 143 for more information). The link is removed.
- 5 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Add Local Links

A local link will direct the customer to a different page in your website.

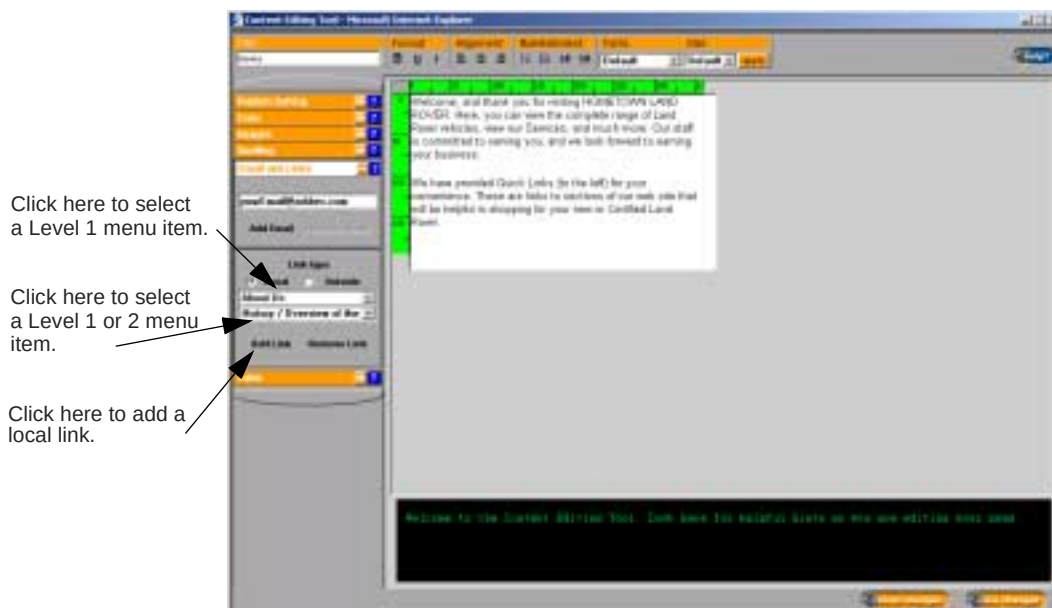

To add a local link to your site, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

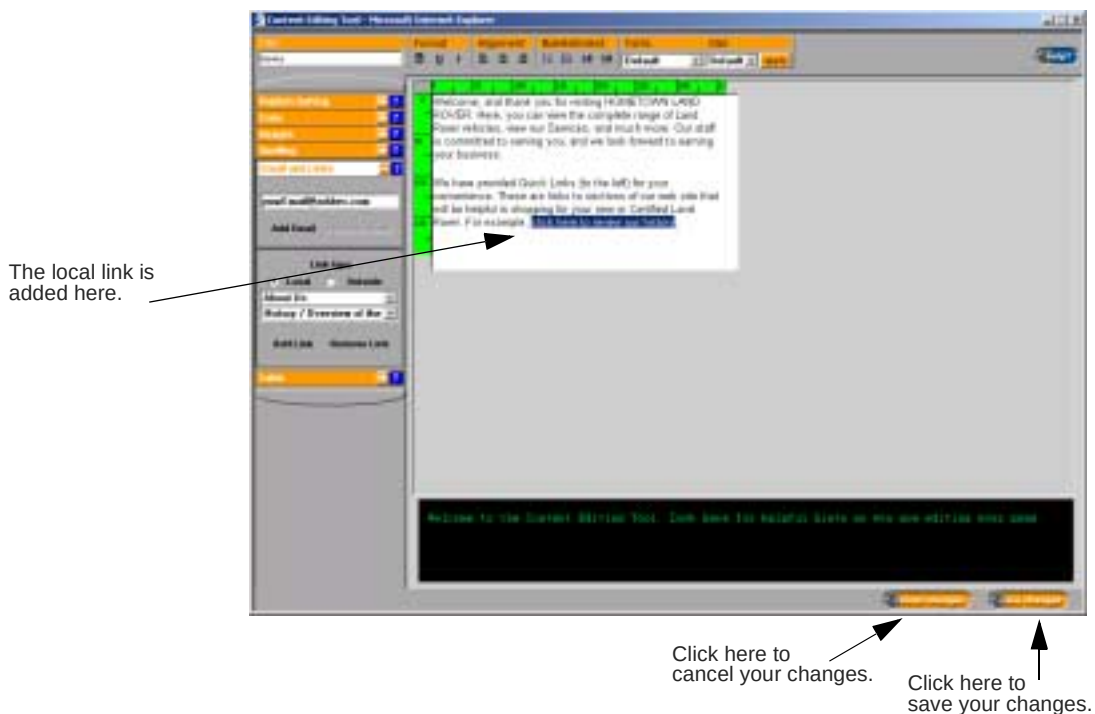

Select **Email and Links** to add a local link to your site.

- 2 Select **Email and Links**. The Email and Links form displays.

- 3 Enter and/or highlight the text that you would like to make into a local link.

- 4 Under **Link Type**, select the **Local** radio button.
- 5 Select the Level 1 menu item from the **Select A Section** drop-down list.
- 6 Select either the Level 1 menu item (if you want to direct the customer to that menu item's Home page) or a Level 2 menu item (if you want to direct the customer to a sub-page of the Level 1 page) from the **Select A Page** drop-down list. (Refer to Navigation Bar on page 43 for more information about Level 1 and Level 2 menu items.)
- 7 Select **Add Link**. The highlighted text becomes a link to the selected page.

- 8 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

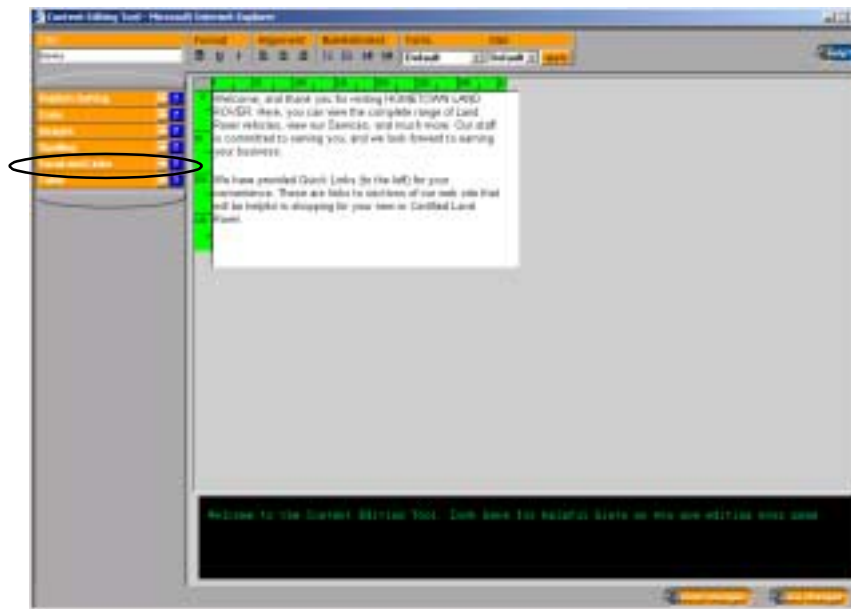

Note:

The delete action will only remove the link. If you would like to remove the text as well, you will need to highlight it and press the **Delete** or **Backspace** key on your keyboard.

Delete Local Links

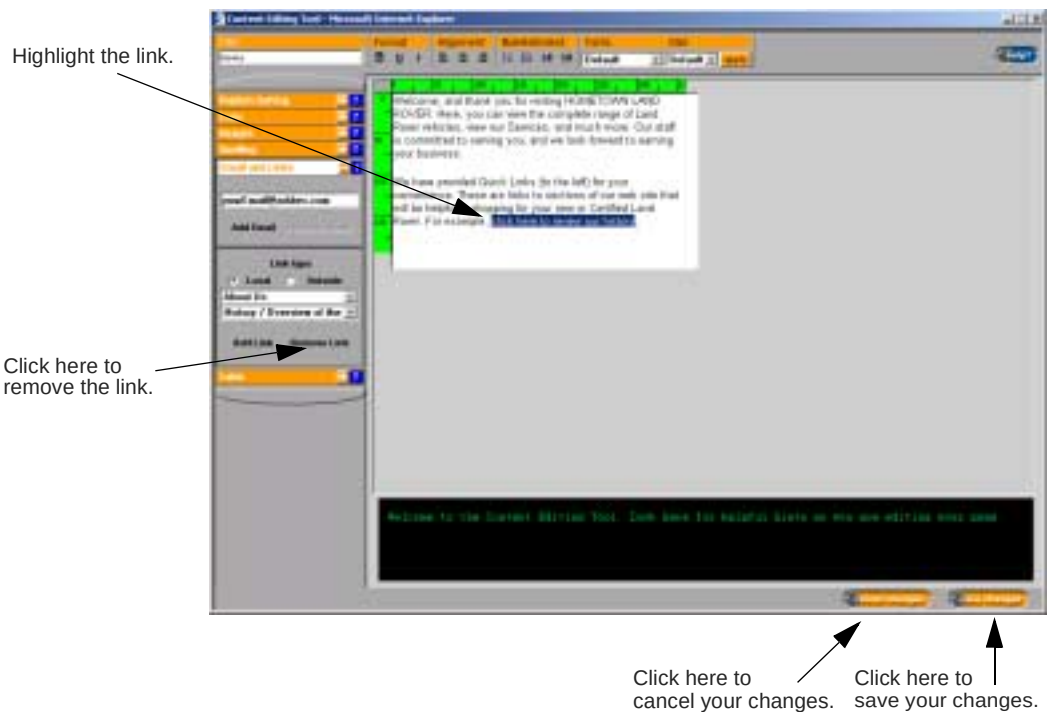

To delete a local link from your site, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

Select **Email and Links** to delete a local link from your site.

- 2 Select **Email and Links**. The Email and Links form displays.

- 3 Highlight the link that you would like to remove.
- 4 Select **Remove Link**. (The system does not ask for verification to proceed with the remove action. You will need to re-add the link if you would like to use it again. Refer to Add Local Links on page 147 for more information). The link is removed.
- 5 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Warning:

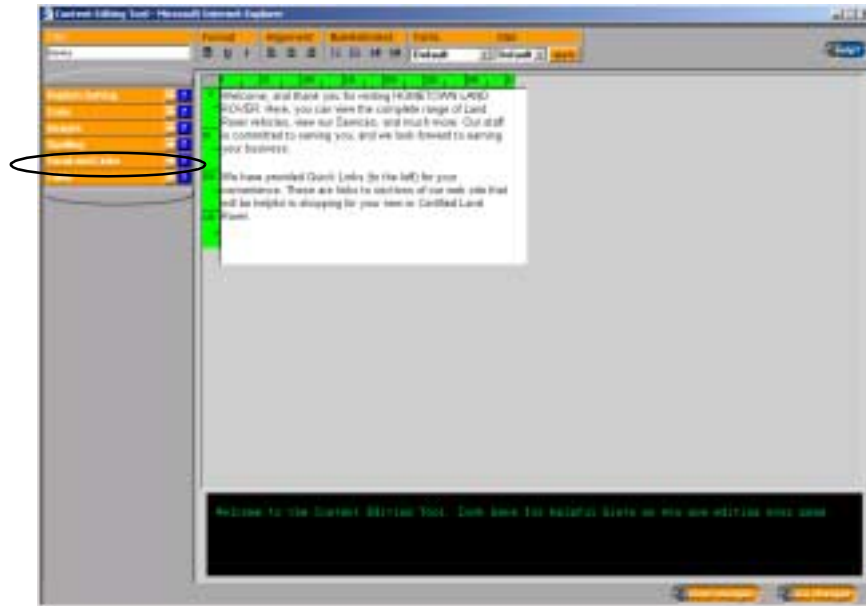

It is necessary to monitor any external links to make sure they are valid and operational. If an external link changes, you must update your link.

Add Third Party Links

This function allows you to add external third-party links to your website.

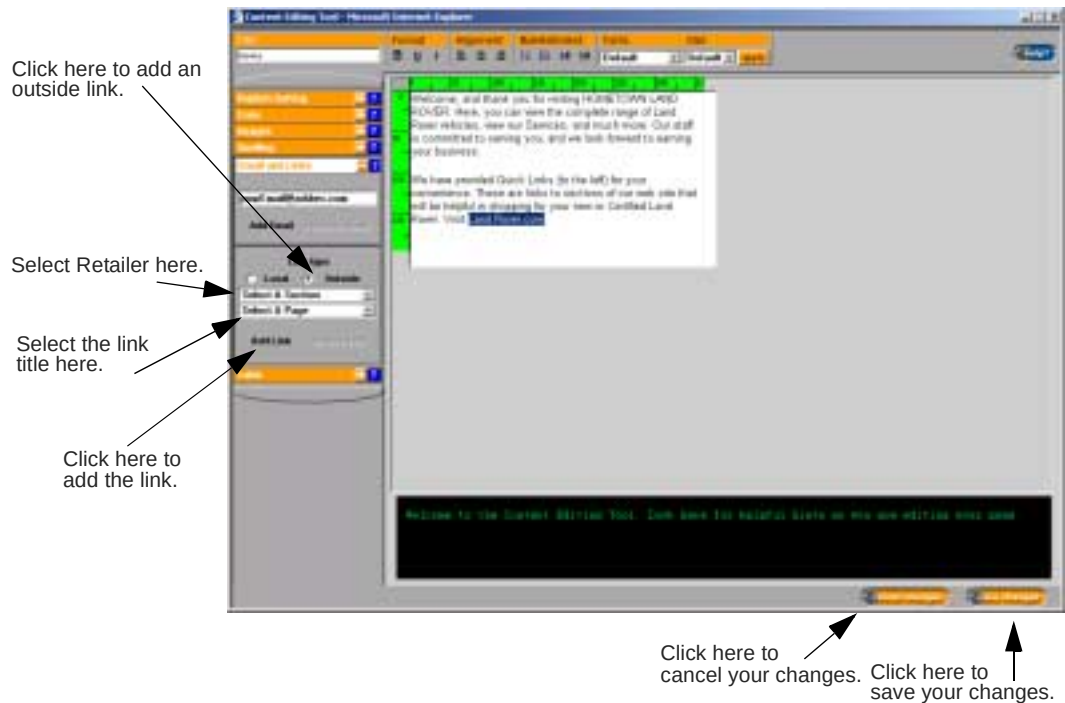

To add a third party link to your site, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

Select Email and Links to add a third party link to your site.

- 2 Select **Email and Links**. The Email and Links form displays.

- 3 Enter and/or highlight the text that you would like to make into a third party link.
- 4 Under **Link Type**, select the **Outside** radio button.
- 5 Select **Retailer** from the **Select A Section** drop-down list.
- 6 Select the link from the **Select A Page** drop-down list. (If the link does not display in this list, it may not have been approved. Refer to Modify External Links/View Status on page 57 for more information).
- 7 Select **Add Link**. The highlighted text becomes a link to the selected third party site.
- 8 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

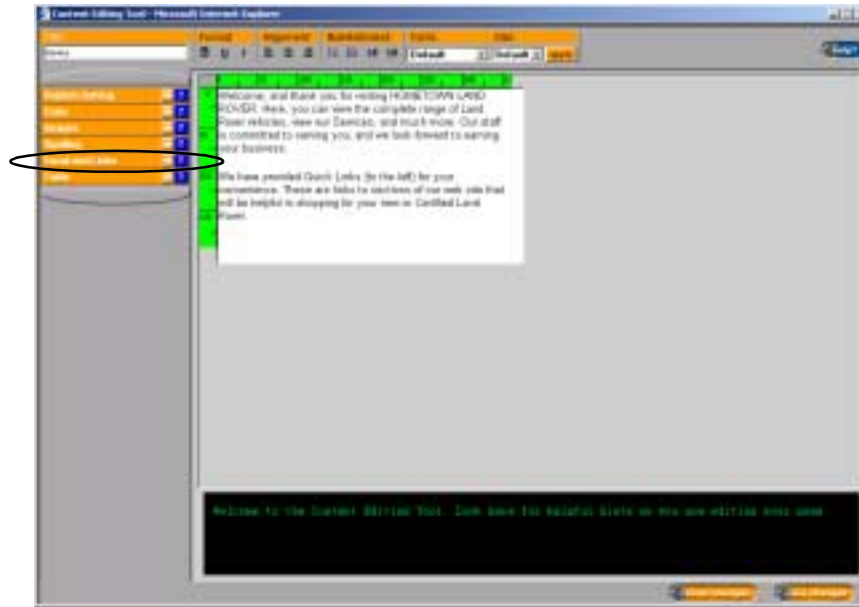

Note:

The delete action will only remove the link. If you would like to remove the text as well, you will need to highlight it and press the **Delete** or **Backspace** key on your keyboard.

Delete Third Party Links

To delete a third party link from your site, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

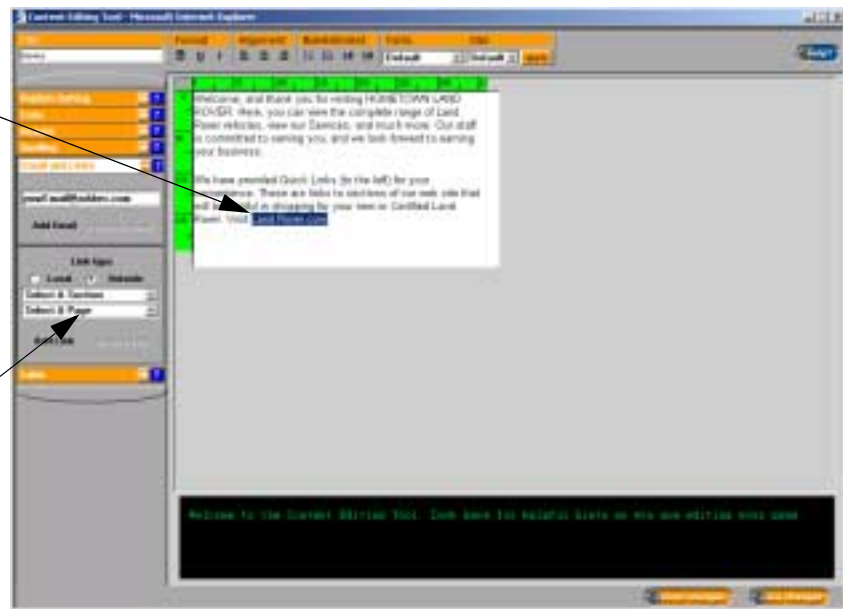

Select **Email and Links** to delete the third party link from your site.

- 2 Select **Email and Links**. The Email and Links form displays.

Highlight the outside link.

Click here to remove the link.

Click here to cancel your changes.

Click here to save your changes.

- 3 Highlight the link that you would like to remove.
- 4 Select **Remove Link**. (The system will not ask you to verify the remove action. If you would like to re-use the link, you will have to re-add it. Refer to Add Third Party Links on page 151 for more information). The link is removed.
- 5 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Add Tables

Note:

Adding graphics within tables to the web page can cause lengthy download times.

Use this feature to create a table in the text field to display on your web page. For example, a table can be used to create a pricing index that displays all the services and pricing for your Parts and Service Departments.

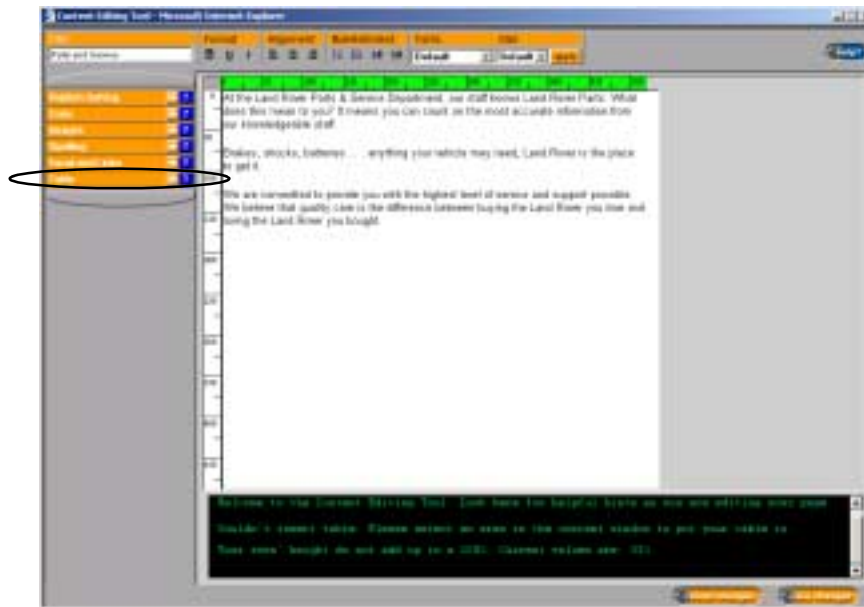

There are several table properties you can use to customize your table:

- **Border** - indicates the width in pixels of the table borders.
- **Padding** - indicates the amount of space between the edges of the cell and its contents.

- **Spacing** - indicates the amount of space between the cells in the table.
- **Width** - indicates the width of the table on the page, in either exact pixel values or as a percentage of page width.
- **Height** - indicates the height of the table on the page, in either exact pixel values or as a percentage of page height.
- **Rows** - indicates the number of rows to be included in the table.
- **Columns** - indicates the number of columns to be included in the table.

To add a table, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

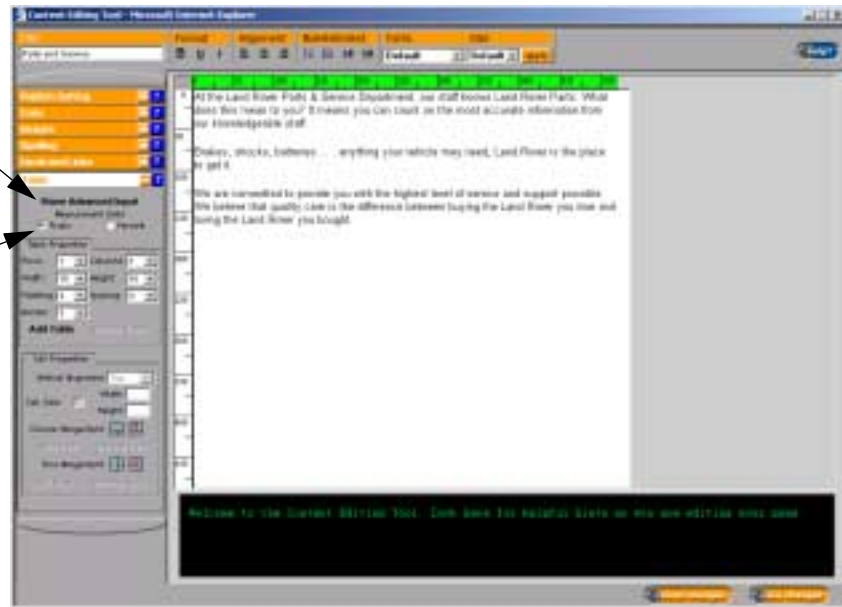

Select **Table** to add a table to your site.

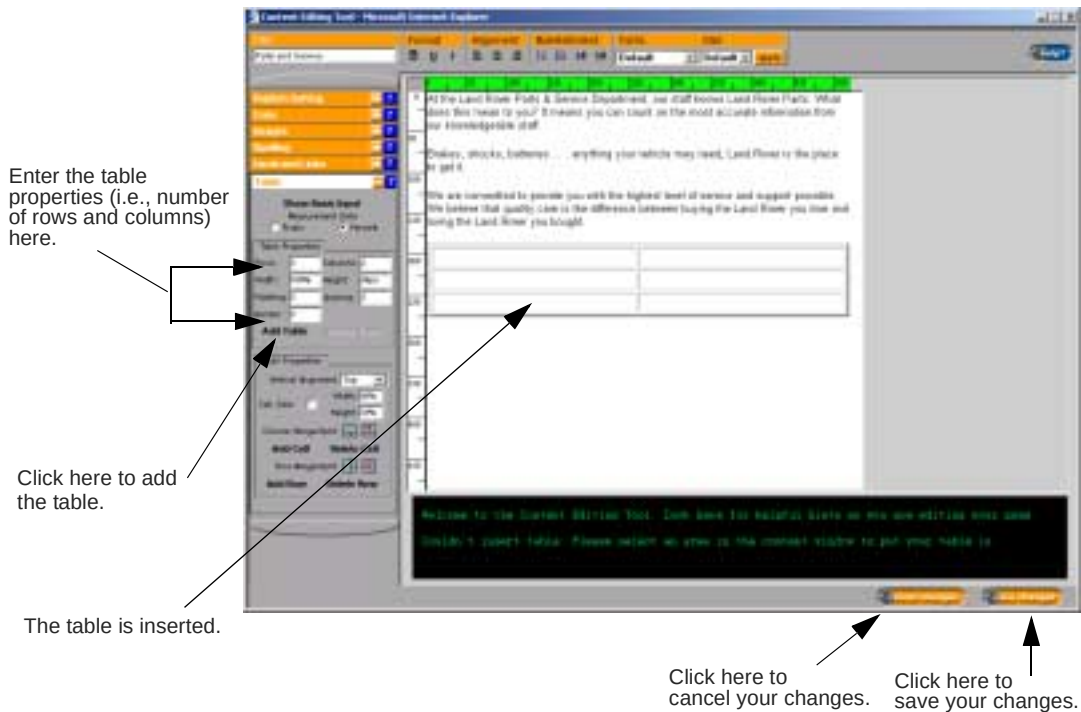

- 2 Select **Table**. The Table form displays.

Click here to toggle between Advanced and Basic input.

Click here to select Pixel or Percentage.

- 3 In the text area, place the cursor where you would like to add the table.
- 4 Select the **Show Advanced Input** or **Show Basic Input** toggle button.
 - **Show Advanced Input** allows you to enter customized criteria. You manually type in the properties of your table into the Table Properties section.
 - **Show Basic Input** provides drop-down lists from which you can select your criteria. The system automatically sets increments to choose from in the Table Properties section.
- 5 Select the **Pixels** or **Percent** radio button.
 - **Pixels** display the pixels per page. Use this option to enter the size of the table in pixels.
 - **Percent** displays the percentage of the page in width and height. Use this option to create a table that is a percentage of the window size.
- 6 In the Table Properties section, enter the properties for the table using the **Rows**, **Width**, **Columns**, **Height**, **Padding**, **Spacing**, and **Border** fields.
- 7 Select **Add Table**. The system inserts the table onto the text area.

- 8 Use the crosshairs to adjust the size of the table, if necessary.
- 9 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Edit Tables

The options in this feature help you to modify a table by adding columns and rows, increasing or decreasing cell span, setting the vertical alignment of a cell, adjusting cell width and height, and modifying the color of the table. This feature is helpful when updating or making modifications to an existing table. For example, this feature can be used to add new services and pricing to your Service Department pricing list on the website.

Add Columns and Rows

Using this feature, you can add a customized table.

To add a column or a row, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

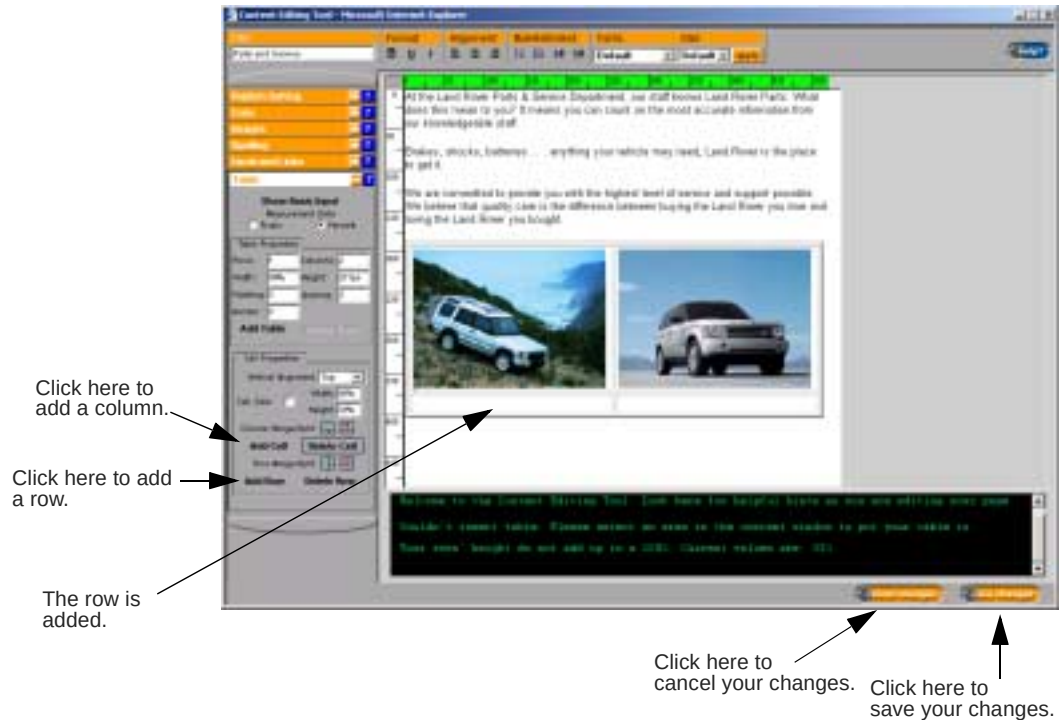

Select Table to add columns/rows to your table.

- 2 Select **Table**. The Table form displays.

Place the cursor in the cell where the row or column will be added.

- 3 Place the cursor in the cell where you would like to add the row or column.
- 4 Select **Add Cell** or **Add Row**.

- 5 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Delete Columns and Rows

To delete a column or a row, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

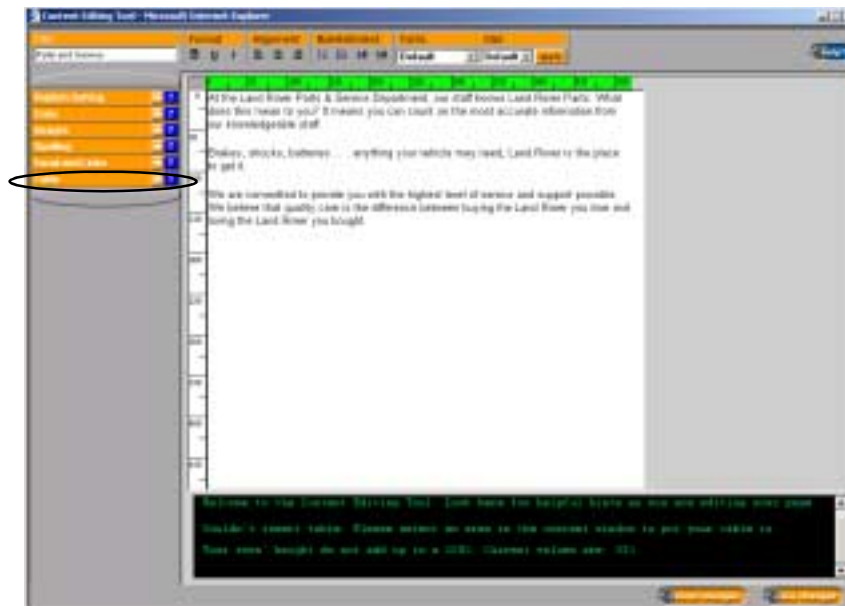

- 3 Place the cursor in the cell of the row or column you would like to delete.
- 4 Select **Delete Cell** or **Delete Row**.
- 5 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Adjust Vertical Alignment

Use this feature to align the text vertically in a selected cell.

To adjust vertical alignment, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

Select **Table** to adjust the vertical alignment.

- 2 Select **Table**. The Table form displays.

Select top, middle, or bottom to vertically align text.

Place the cursor in the cell you are modifying.

Click here to cancel your changes.

Click here to save your changes.

- 3 Place the cursor in the cell where you would like to adjust the vertical alignment.
- 4 In the Cell Properties, select **top**, **middle**, or **bottom** from the **Vertical Alignment** drop-down list.
- 5 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Adjust Horizontal Alignment

Use this feature to align the text horizontally in a selected cell.

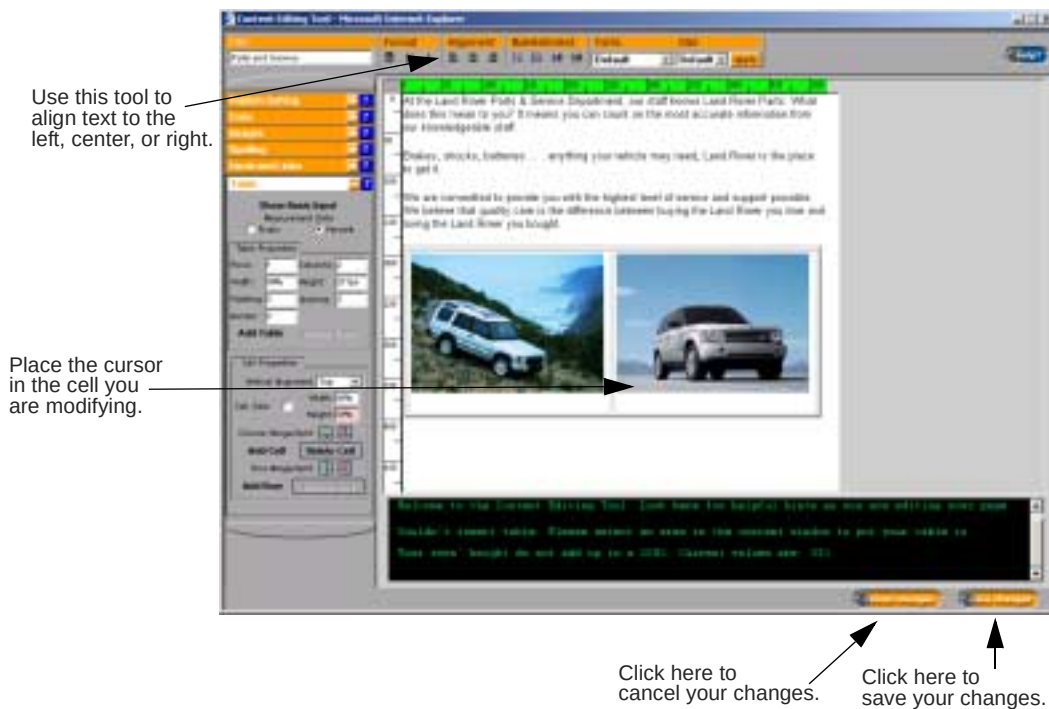

To adjust horizontal alignment, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

Select **Table** to adjust the horizontal alignment.

2 Select **Table**. The Table form displays.

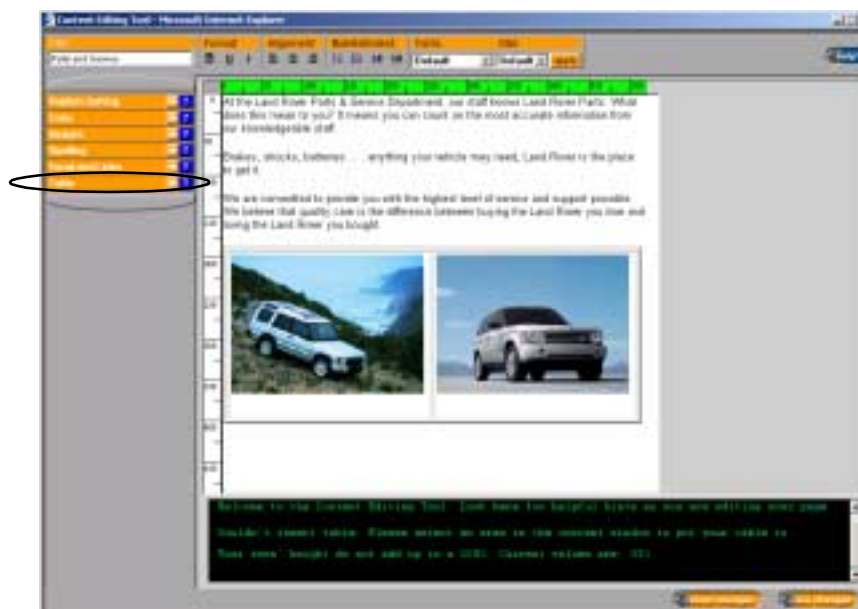

- 3 Place the cursor in the cell where you would like to adjust the alignment.
- 4 Use the **Alignment** tool to align the text to the left, center, or right (for more information on alignment, refer to Text Formatting on page 125).
- 5 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Adjust Cell Width and Height

Use this feature to set a specific width or height for a cell.

To adjust the cell width and/or height, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

Select **Table** to adjust cell width/height.

- 2 Select **Table**. The Table form displays.

Place the cursor in the cell you are modifying.

Modify the width here.

Modify the height here.

Click here to cancel your changes.

Click here to save your changes.

- 3 Place the cursor in the cell whose height and/or width you would like to modify.
- 4 In the Cell Properties section enter the new height in the **Height** field.
- 5 In the Cell Properties section, enter the new width in the **Width** field.
- 6 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Note:

The cell directly to the right or below the selected cell will be spanned.

Merge/Split Rows and Columns

Use this feature to merge cells. This is useful when entering large amounts of text and there is a need for more space in the cell.

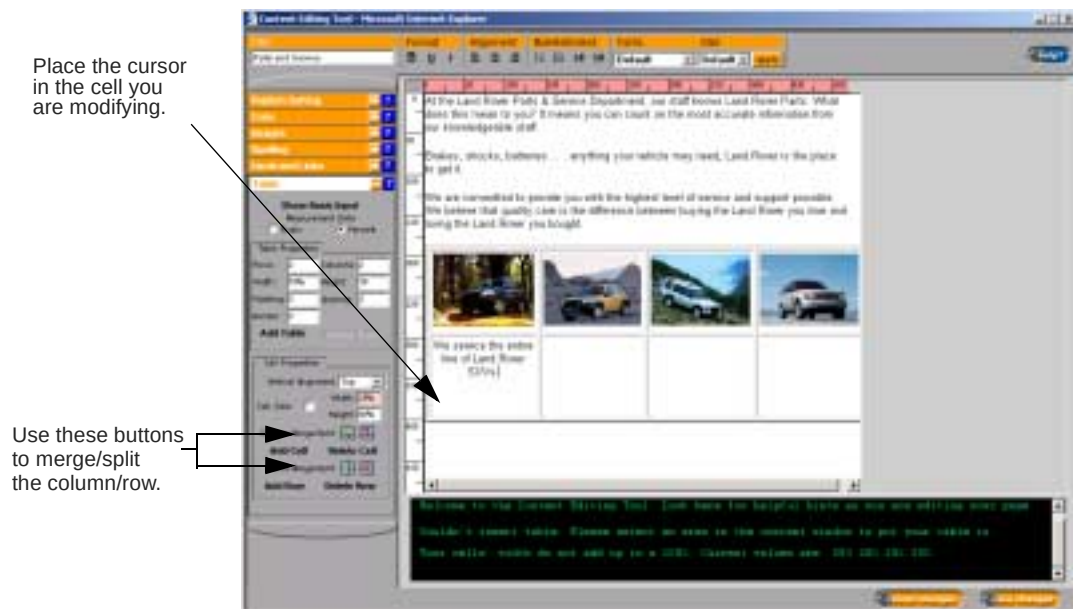

To merge or split a row or column, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

Select **Table** to split/merge columns/rows in your table.

2 Select **Table**. The Table form displays.

3 Place the cursor in the cell you would like to merge/split.

To merge the column, select the Increase Column Span button. The two columns will merge into one column.

Place the cursor in the cell you are merging or splitting.

Click here to merge two columns.

Click here to cancel your changes.

Click here to save your changes.

To split the column, select the Decrease Column Span button. The column will revert back into two columns.

To merge the row, select the Increase Row button. The two rows will merge into one row.

Place the cursor in the cell you are merging or splitting.

Click here to split the columns.

Click here to cancel your changes.

Click here to save your changes.

To split the row, select the Decrease Row button. The row will revert back into two rows.

- 4 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Modify Table Text Color

To modify the background and/or foreground color of the text in the table, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

Select Table to modify table color.

- 1 Select **Color**. The Color form displays.

Highlight the table text to which you are adding color.

Click here to cancel your changes.

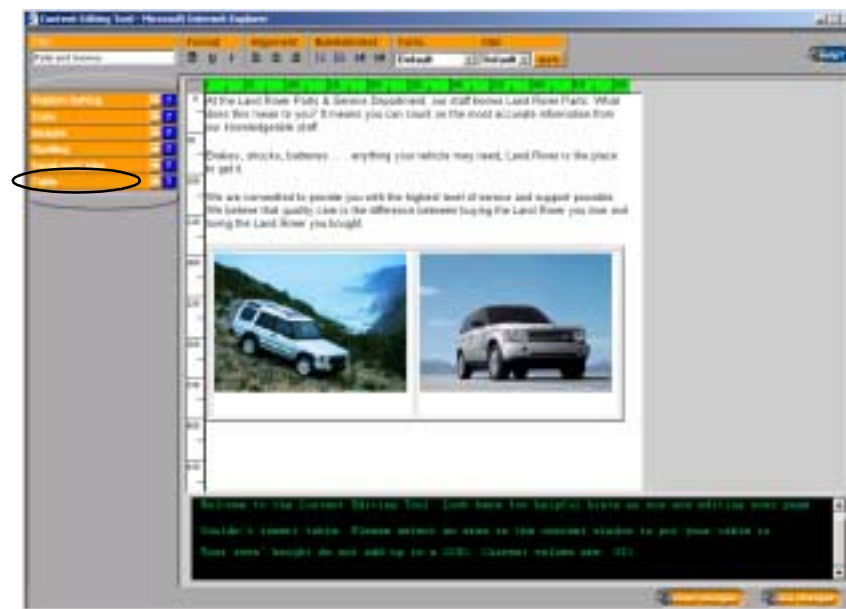

Click here to save your changes.

- 2 Highlight the table text to which you are adding color.
- 3 Using the spectrum, Hex codes, or color grid, select your desired color.
- 4 Select either the foreground or background button.
- 5 Select **Apply**. For more information on adding color, refer to Add Foreground and Background Colors on page 135.
- 6 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Delete Tables

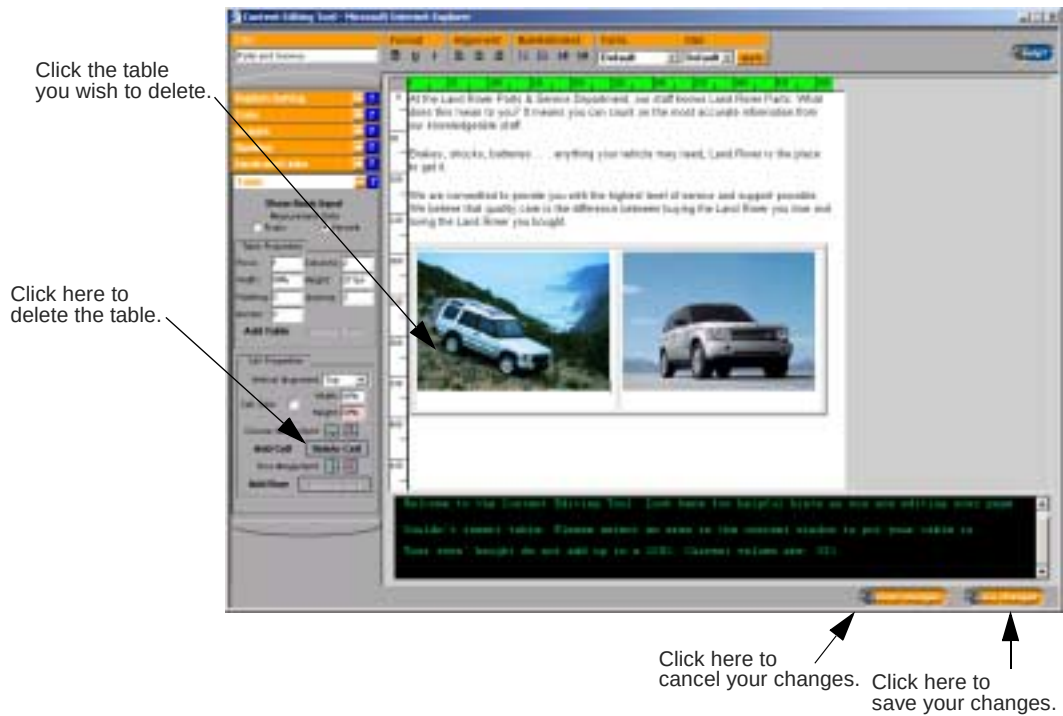

To delete a table, perform the following steps.

- 1 Select the edit icon on the desired page. The WYSIWYG Content Editor form displays.

Select Table to delete the table.

- 2 Select **Table**. The Table form displays.

- 3 Click the table you wish to delete.
- 4 Select **Delete Table**.
- 5 To save your changes, select **save changes** or select **cancel changes** to cancel your changes.

Chapter 5

Best Practices

The purpose of this chapter is to illustrate additional steps you can take to get the most out of RetailerConnection. Refer to the following sections:

- Best Practices (page 174)

Best Practices

Below are some quick and easy tips you can use so that customers get the most out of your Branded Retailer Website.

- Use the quadrants to advertise specials. These are brief and easy to read for customers.
- Utilize new vehicle deals, as they are quick to update and grab the customer's attention.
- Build your retailer store's image library with simple, clean graphics to assist you in building great pages.
- It is recommended that you add no more than three images to a page to allow for faster page downloads for your customers.

Integrate your traditional and online advertising to present a unified message and drive business.

- Examples of traditional advertising methods include: local television, signage, business cards, and promotions, etc.
- Examples of online advertising methods include: Internet search engines, online yellow pages, websites that have a lot of visitors close to your retailer store, as well as registering numerous URLs and directing them to your Branded Retailer Website.
- Update your themes to reflect new vehicle releases and promotions, holidays, etc. This will make your site more interesting.
- Be sure to check the Theme section of the utility, as many varieties of themes are added for holidays and special events.
- Reflect your retailer store's uniqueness by including your retailer store's qualifications, certifications, staff biographies, community involvement, heritage, and commitment to quality and customer satisfaction.
- Consider registering additional URLs for your retailer store using misspellings. This helps customers find retailer stores that might have difficult names to spell.
- When updating your website, click the **preview** button to see how the site will look on the live Internet for customers.
- Make your pages more interesting by using color, limiting paragraphs of text (use bulleted lists instead), using consistent fonts, and changing themes often.

-
- Make sure that any links you add to your site are always valid and operational. If a URL changes, make sure to go into your Content Manager Utility and update the URL.

Chapter 6

Troubleshooting

The purpose of this chapter is to illustrate additional steps you can take when encountering problems in RetailerConnection. Refer to the following sections:

- [Troubleshooting \(page 178\)](#)

Troubleshooting

Below are some tips for avoiding problems while using the RetailerConnection Website Utility.

- Make sure your browser is Internet Explorer version 6.0 or higher.
- For optimum viewing, be sure your screen resolution is set to a minimum of 800 x 600 pixels. If necessary, don't forget to use the horizontal and vertical scroll bars on your browser, so that you can view an entire page.
- When saving changes in a utility, be sure to click **save changes** in each edit window. Saving only the initial window will not save the modifications.
- Remember that when you first use the site, changes made to a site can take 24 to 48 hours before the live site reflects those modifications. At all other times, your published changes will become effective immediately.
- Do not give out your user name and password.
- Keep your PC fine-tuned to optimize speed.
- Delete your cache.
- Update your browser to obtain speed enhancements. For example, Internet Explorer 6.0 is faster than Internet Explorer 5.
- If you have any questions, contact the eBusiness Support Center at (800) 446-5066, Monday through Friday, 8:00 am to 7:00 pm EST.
